The Leading Edge in EMI Shielding Technology

SHIELDING SELECTION CONSIDERATIONS

Consider these important factors in the selection of appropriate shielding products for your design:

- n Operating Frequency
- n Materials Compatibility
- n Load/Forces
- n Corrosive Considerations
- n Commercial or Military Worldwide Compliance
- n Operating Environment
- n Cycle Life
- n Cost
- n Material Thickness/Alloy
- n Attenuation Performance
- n Fastening/Mounting Methods
- n Storage Environment
- n Nuclear, Biological, Chemical (NBC)
- n Shielding/Grounding/Other
- n Electrical Requirements
- n Space/Weight Considerations
- n Product Safety
- n Recyclability

Notice:

Leader Tech cannot guarantee that the same test data as described herein will be obtained. Thus, it is recommended that each user make their own tests to confirm laboratory test data and determine suitability of products for their particular application.

The products described in this catalog shall be standard quality, however, the products in this catalog are sold without warranty of fitness for a particular purpose, either expressed or implied, except to the extent expressly stated on Leader Tech's quotation or order acknowledgment. Leader Tech does not warrant that devices incorporating one or more of the products described in this catalog will be free of conflict with existing or future patents of third parties. All risks of lack of fitness, patent infringement, and the like are assumed by the user. Furthermore, nothing contained herein shall be construed as recommendation to make, use, or sell any product or process in conflict with existing or future patents.

APPLICATION OF FINGERSTOCK GASKETS

EMI designers know and trust the consistent performance of Fingerstock (CuBe) gaskets. To date, CuBe yields the best electrical spring contact available in this industry. The copper beryllium mills have well established techniques and for decades have produced CuBe alloys per ASTM, SAE, JIS, and DIN specifications.

Leader Tech uses only proven technology in creating copper beryllium springs, contacts and gaskets. Beginning with Alloy 25 (1/4 hard) BeCu, we stamp, form, and post heat-treat to a hardness of 340 to 390 DPH. This process is preferred in the EMI shielding industry because it has proven to produce the best electrical spring contacts. Leader Tech CuBe EMI shielding gaskets are the most reliable in the industry.

Leader Tech manufactures a wide variety of standard styles and sizes of CuBe gaskets. These gaskets operate in spaces from .010 inches up to .410 inches. Using CuBe materials as thin as .002 inch, we also offer many styles as soft gaskets that provide the low compression force needed in many applications. Leader Tech also designs and manufactures custom spring contacts and gaskets.

FINGERSTOCK GASKETS DO TWO THINGS VERY WELL:

- 1. Their mechanical spring characteristics far surpass all other gaskets in the industry.**
- 2. They offer the highest EMI shielding effectiveness.**

Leader Tech has been designing and manufacturing Fingerstock Gaskets since the early days of the computer and electronics industries. We combine these years of manufacturing and EMI experience with one key ingredient – the needs of the customer.

Our innovative Fingerstock Gasket designs are a direct result of our experience and customer input. Our Compact PCI line of EMI Gaskets is an example of a design that was driven by the needs of a customer and evolved into a line of gaskets that meet all the requirements for Compact PCI faceplate standards while providing superior mechanical and shielding performance.

Leader Tech offers many standard off-the-shelf Fingerstock Gaskets as well as the engineering and custom manufacturing experience to help you solve your application. Whether you need one prototype or a large quantity order, our team at Leader Tech is available to respond to your needs.

COMPRESSION/DEFLECTION PERFORMANCE

| Leader Tech. Part No. | Design Compressed Height | Compression Force (lbs./linear ft.) |
|-----------------------|--------------------------|-------------------------------------|
| 3-23T | 0.018 (0.46) | 25 |
| 6-34T | 0.049 (1.24) | 33 |
| 6-50T2 | 0.049 (1.24) | 43 |
| 9-19UD | 0.072 (1.83) | 30 |
| 11-32RH | 0.035 (0.89) | 34 |
| 11-45C | 0.090 (2.29) | 19 |

| Leader Tech. Part No. | Design Compressed Height | Compression Force (lbs./linear ft.) |
|-----------------------|--------------------------|-------------------------------------|
| 14-45DT | 0.098 (2.49) | 24 |
| 22-60AH | 0.140 (3.56) | 25 |
| 22-60RH | 0.070 (1.78) | 48 |

| 25-78FS | 0.150 (3.81) | 36 |

The data presented is based on testing and to our knowledge is accurate and true. Since applications, test methods, and test procedures may vary, we recommend that users of our products perform their own test to assure the suitability of these specific applications. We offer no product warranty, either expressed or implied, except that any product proven defective will be replaced. Freedom from present or future patent infringement cannot be guaranteed, nor can the suitability of our products for specific applications.

ORDERING INFORMATION

When placing an order or requesting a quotation, please give part number, your required finish I.D. from the chart below, and required length.

| PART NUMBER EXAMPLE: | | |
|----------------------|-------------|--------|
| Stock Item | Finish Code | Length |
| 11-S-32RH | - SN - | 16 |

The above example is the "Slot Mount Series" gasket shown on page 11. The height is .11 inch and the width is .32 inch. The "-S-" indicates a soft gasket. The "SN" indicates a bright tin finish. See list below for available finishes. This part is available in lengths of 16 inches. Consult factory for custom lengths or for availability in 25' coils.

| Available Plating Finishes: | | |
|-----------------------------|--|-------------------------|
| Finish Type | Applicable Specifications | Leader Tech Finish Code |
| Bright Finish | - | BD |
| Bright Tin | ASTM B-545, CLASS A | SN |
| Satin/Matte Tin | ASTM B-545, CLASS A | ST |
| Tin Lead | ASTM B-579, SC2 | SNpb |
| Electro-less Nickel RoHS | ASTM B-733, SC 1, CLASS 1 | NI |
| Zinc/Chromate Clear | ASTM B-633, SC1, TYPE III | Zinc |
| Zinc/Chromate Yellow | ASTM B-633, SC1, TYPE II | ZincY |
| Clear Cadmium Chromate | ASTM B-766, CLASS 5, TYPE III | CDC |
| Yellow Cadmium Chromate | ASTM B-766, CLASS 5, TYPE II | CDY |
| Bright Silver | ASTM B-700, TYPE 2, GRADE B, CLASS N | AG |
| Satin/Matte Silver | ASTM B-700, TYPE 2, GRADE A, CLASS N | MAG |
| Gold | ASTM B-488, TYPE I, CODE C, CLASS 1.25 | AU |
| Solderable Unplated | - | SU |

Standard plating finish is .0001 inch (.0025 mm) minimum. Plating processes and thicknesses may be varied to meet customer needs. Standard plating finish for gold is 0.00005 inches. See adjacent list of available finishes and consult factory for additional options.

ADHESIVE MOUNTING OF FINGERSTOCK GASKETS

Leader Tech tape mounted CuBe gaskets offer pressure-sensitive, double-sided adhesive for strong bonding to a wide variety of surface conditions. Ideal for all-purpose contact strips used in metal cabinets and electronic enclosures and is unaffected by temperatures from -67 to +250°F (-55 to 121°C)

Simply follow these four easy steps:

1. Remove all grease and oily residue with a solvent such as isopropyl alcohol/water mixture (rubbing alcohol) or heptane. Dry and smooth the mounting surface with emery cloth if necessary.
2. Peel off the protective paper backing from the pressure sensitive adhesive tape.
3. Place the gasket in correct position. Press firmly to ensure a good bond to surface. Avoid repositioning, which might impair the effectiveness of the adhesive or may bend or kink the strip. NOTE: On strips where fingers cover the solid portion of the gasket, pressure may be applied by inserting a mandrel in the strip and pressing down.
4. At room temperature approximately 50% of the ultimate strength will be achieved after 20 minutes, 90% after 24 hours, and 100% after 72 hours. In some cases, bond strength can be increased and ultimate bond strength can be achieved more quickly by exposure of the bond to elevated temperature, e.g., 150°F (66°C) for 1 hour.

METALS GALVANIC COMPATIBILITY CHART

Tape

The AH Series gaskets are adhesive mounted general-purpose gaskets used in both compression and wiping applications. Sizes range from .11" (2.8mm) to .32" (8.1mm) in height. Applications include electronic enclosures, shielded cabinets, and MRI chamber doors.

XX - Select material/finish (see page 6)

DOME TOP SERIES

The Dome Top Gaskets are known for their large surface area for electrical contact and smooth wiping action. Also available in a solid top profile allowing for omni-directional wiping. Together with the Slot Mount Series, the Dome Top Gaskets are a mainstay in the enclosure/chassis industries. Commonly mounted with adhesive tape.

MOUNTING
OPTIONS
Tape

The Dome Top "Solid" Series gaskets have a strip that connects each finger along the top. This allows for unique angular wiping action without snagging. Other features are the same as the Dome Top Series.

XX - Select material/finish (see page 6)

SLOT MOUNT SERIES

Slot mount gaskets are a standard in the electronic enclosure industry. These gaskets are used in shorter lengths as ESD contacts and longer lengths as EMI gaskets, which clip into slots or slide onto mounted tracks.

MOUNTING CONCEPTS

FOLDED SERIES

Leader Tech's Folded Gasket series are industry standard, general-purpose gaskets that allow a large range of deflection and compression forces. These gaskets are available with or without tape for alternate attachment methods. Also available in a snag-free version where, under compression, the leading edge of the gasket slides into an extended and folded base which prevents possible damage to the gasket.

| FS Folded | | Black = inches Blue = mm Comp = Compressed | | | | | | | | | | | | | | | | | | |

The Leader Tech FS gaskets are industry standard, general-purpose gaskets that allow a large range of deflection and compression forces. These gaskets are available without tape for alternate attachment methods. Consult factory for information.

The FSC was created to provide snag-free gaskets with FS gasket features. The base of the gasket is extended from the mounting area and then folded up, over, down, and then comes to rest over the leading edge of the formed spring. Under compression, the leading edge of the gasket slides under and is "captured." This "no snag" feature is also used to prevent possible gasket damage.

MOUNTING OPTIONS
Tape
Rivet
Solder

The FSDS is an FS gasket with its base lying on the same plane as the curve in the spring form, with the mounting area shortened. This mounting is often modified for custom applications.

XX - Select material/finish (see page 6)

TWIST SERIES

The Twist series gaskets are designed for demanding compression applications. This series can compress to material thickness and provide excellent shielding performance. Profiles include standard flat, right angle, double twist, and clip-on.

CLIP-ON SERIES

The Clip-On Gaskets are used in enclosures, shielded cabinets, and on circuit cards as ESD contacts and EMI gaskets. For edge mount applications, close attention must be given to clip size, lance requirements, deflection parameters and finger configuration. Leader Tech provides application assistance in the development of specifications.

CONTACT SERIES

Contact gaskets are primarily used for grounding and shielding in high frequency applications. These gaskets provide engineers and designers with flexibility to solve their shielding and grounding issues. They are available in a variety of different lengths, widths and profiles. Standard factory length for Contact Series strips is 16". Individual contacts available in tape & reel packaging. Adhesive tape is optional - please consult factory.

THIN GAUGE CUSTOM MECHANICAL SPRINGS & STAMPINGS

For over 30 years, Leader Tech has been supplying customers with high quality precision custom prototypes, short run and high volume stampings. Our in-house tool & die design and build expertise, combined with our extensive manufacturing capabilities, allow us to manufacture custom precision components for many applications. Our expertise is not limited to just the stamping portion of the application but can include value added operations such as the addition of insulating materials, hardware and other required features. From prototype to high volume production runs, Leader Tech can meet your custom needs with the shortest and most reliable lead times in the industry.

From prototypes within days to long production runs, your Leader Tech Team is ready to assist you. Please call us at 813-855-6921 or email us at sales@leadertechinc.com with your requirements.

CONDUCTIVE ELASTOMER EMI SHIELDING GASKETS FOR ELECTRONIC ENCLOSURES

Leader Tech's complete line of TechSIL Conductive Elastomer compounds is QPL certification by the Defense Logistics Agency. This unrivaled commitment to excellence distinguishes our company as the only MIL-SPEC approved & certified manufacturer of all 12 conductive elastomer formulations. This prestigious designation authorizes us to formulate, extrude and mold conductive elastomers to stringent MIL-DTL-83528D specifications.

Leader Tech's high-performance TechSIL gaskets are manufactured using proprietary base formulations of silicone, fluorosilicone and EPDM rubber that are embedded with highly conductive fillers including: Silver, Silver/Copper, Silver/Aluminum, Silver/Nickel, Silver/Glass, and Nickel Coated Graphite. We offer numerous standard gasket profiles as well as unlimited variations of extruded, molded, sheet stock, and die-cut finishes.

TechSIL Conductive Elastomers provide engineers with a highly customizable gasketing solution that delivers a shielding effectiveness of up to 110 dB across wide temperature variations and environmental conditions. An onsite applications engineer is also available to help formulate materials to meet your custom requirements. To learn more about this product line and our capabilities, make sure to request or download the complete TechSIL Conductive Elastomer catalog from our website.

ORIENTED WIRE SERIES

Leader Tech's *TechSIL 8000 Oriented Wire* gasketing is designed for use in suppressing EMI/RFI up to 100 dB in the E-Field/up to 50 dB in the H-Field, while offering an effective environmental seal between mating surfaces. This material is comprised of monel or aluminum wire oriented perpendicular to the mating surfaces and embedded in solid or sponge silicone elastomer. The wires are crimped for additional resiliency and to optimize the mechanical performance of the gasket. The silicone based *TechSIL* has 700-900 wires per sq./in. and is capable of withstanding temperatures from -80° to a maximum of 500° F (-62° to 260°C). *TechSIL Oriented Wire* materials are available in strip or sheet form and can easily be die cut into complex shapes or fabricated into custom frame gaskets. All *TechSIL 8000* materials meet the DESC drawing 90046.

TECHMESH KNITTED WIRE

Leader Tech's *TechMESH Knitted Wire* gaskets are designed to provide EMI/RFI Shielding of joints and seams of electronic enclosures. The unique construction of the *TechMESH Knitted Wire* consists of many interlocking loops that act as small springs which provide for a resilient all-metal conductive gasket with high attenuation characteristics. *TechMESH* provides shielding effectiveness up to 130 dB in the E-Field and up to 80 dB in the H-Field. The standard wire materials are Tin Plated Copper Clad Steel, Monel and Aluminum in cross-sections of rectangular, round, round-with-fin, and double-round-with-fin. All cross-sections are available in both ALL Mesh or Elastomer Core configurations. The *TechMESH Knitted Wire* gaskets are supplied on spools of 25 ft. or cut to our customers specification.

Additional wire options are available upon request

TECHMESH COMBO STRIP

Leader Tech's *TechMesh Combo Strip & Gaskets* are designed for use in applications requiring EMI/RFI shielding and environmental sealing. These materials are comprised of monel or tin plated copper clad steel knitted wire mesh which are bonded to neoprene sponge, silicone sponge or silicone solid elastomer strips. The wire mesh provides shielding performance up to 125 dB in the E-Field and up to 80 dB in the H-Field while the elastomer materials can withstand temperatures from -103° to a maximum of 500° F (-75° to 260°C). These materials have an optional pressure sensitive adhesive backing for ease of installation. The *TechMesh Combo Strip & Gaskets* are available in standard and custom strip configurations. Leader Tech can also fabricate custom frame gaskets to customers specification.

Additional wire options or metal compression stops are available upon request.

The data presented is accurate and true to our knowledge. Since applications, test methods and test procedures may vary, we recommend that users perform their own tests to assure suitability for specific applications. We offer no product warranty, either expressed or implied, except we will replace any product found to be defective.

TECHMESH TAPE

Leader Tech's **TechMESH Tape** has double layered strip of knitted wire mesh to provide effective EMI shielding and grounding for electric and electronic cable assemblies. This is particularly useful in applications where the need for EMI protection is determined after the cable assembly is complete and standard braided shielded cable cannot be used. The flexible structure of Leader **TechMESH Tape** permits it to conform to irregular surfaces and the cable contours during the wrapping process. **TechMESH Tape** is 0.020" (0,51mm) thick. It is available in tin plated copper clad steel (-71) or Monel (-72) width 10-12 openings per inch.

Performance Advantages

- Tin plated for excellent solderability
- Useful in both shielding and grounding applications for static discharge
- Tin plated copper clad steel wire provides greater strength and performance than other mesh tape materials
- Knit loop structure provides uniform coverage minimizing wrinkles and creases
- Available in other alloys and wire dimensions
- Supplied in 50 ft. (15,2mm) rolls (Note: When determining quantity needed, 50% overlap is recommended)

TECHNICAL DATA

Shielding gaskets are, very simply, connectors of two opposing metallic planes which make them appear as one continuous surface, by connecting across the openings. Depending on the frequencies involved, the openings must be reduced as closely as possible to a continuous seal.

Leader Tech's unique Fabric Shielding Gasket structure is a combination of a highly conductive nickel/copper ripstop fabric and a resilient polyurethane foam core. Leader Tech's FSG products have superior shielding properties and ensure long performance life all in a cost effective manner.

Leader Tech (FSG):

Fabric: Nickel/Copper RipStop

Foam: Open Cell Polyurethane

Compression Set: <15% (ASTM D3574)

Temperature Range: -40°F to 158°F (-40°C to 70°C) (ASTM D746)

Surface Resistivity: ≤0.050 Ω/inch² (ASTM F390)

Flammability Rating: UL94V0

Shielding Effectiveness: >Up to 105 dB (MIL-DTL-83528C)

Pressure Sensitive Adhesive: Non-conductive, high peel strength

ROHS: Compliant

REACH: Compliant

SHELF LIFE: If stored properly, product retains its performance and properties for 24 months from date of manufacture. (It is suggested that products are stored at room temperature conditions of 70°F (21°C) and 50% relative humidity.)

Tolerances:

TYPICAL CROSS SECTION TOLERANCES

±.010 in. (0.25 mm) for all dimensions up to 0.04 in. (1.02 mm)

±.020 in. (0.50 mm) for all dimensions above 0.04 in. (1.02 mm)

(Detailed part drawings are available upon request)

TYPICAL LENGTH TOLERANCES

| | | | |
|--------------------|-----------------|----------|-----------|
| 0.20 to 6.00 in. | (5 - 152 mm) | ±.03 in. | (0.76 mm) |
| 6.01 to 18.00 in. | (153 - 457 mm) | ±.06 in. | (1.52 mm) |
| 18.01 to 48.00 in. | (458 - 1219 mm) | ±.08 in. | (2.03 mm) |

*Other sizes available.
Consult factory.

Shelf-life is based on the pressure sensitive adhesive which is 24 months

Black = inches
Blue = mm

Typical Performance

Shielding Effectiveness
80 - 115dB

Frequency Range
20Mhz - 10GHz

Dura-Layer Construction
Polyurethane foam core with high-performance fabric

Recommended Compression
30-50% of gasket height

| Typical Cross Section Tolerances | | | |
|--|------------------------------------|----------|-----------|
| ±.010 in. | (0.25 mm) for all dimensions up to | 0.04 in. | (1.02 mm) |
| ±.020 in. | (0.50 mm) for all dimensions above | 0.04 in. | (1.02 mm) |
| Detailed part drawings are available upon request. | | | |
| Typical Length Tolerances | | | |
| 0.20 to 6.00 in. | (5 - 152 mm) | ±.03 in. | (0.76 mm) |
| 6.01 to 18.00 in. | (153 - 457 mm) | ±.06 in. | (1.52 mm) |
| 18.01 to 48.00 in. | (458 - 1219 mm) | ±.08 in. | (2.03 mm) |

FSG FOR ELECTRONIC ENCLOSURES CONT.

D-SUB MINIATURE

very conformable to irregular surfaces.

- Eliminates any gap problem between connector and I/O surface plates. Compresses from .100" to .025" (2.5 to 0.6mm)
- Outside conductive surface is metalized CuNi fabric
- 9, 15, 25, 37 and 50 pin connector gaskets available in stock
- Available with adhesive tape. Please consult factory for ordering information
- Consult factory for custom profiles, thicknesses and sizes available
- For metal option - see page 22

SHIELDING FABRICS & CONDUCTIVE TAPES

Shielding Fabrics

Shielding effectiveness is determined by a combination of the reflection and absorption of RF signals. Absorption depends on the thickness of the shield material. However, reflection occurs at the shield surface and its effectiveness is independent of thickness. Reflection is the determining factor for all high frequency signal attenuation. (Note: When using these materials for conductive shielding gaskets, conductivity is the determinant.) Maximum reflection occurs with the highest conductivity materials – the best being copper, nickel and combinations of both.

Applications

Bonding or laminating to complex geometric shapes with optional hot melt or conductive adhesive.

- Large surface coverage with minimal seams due to 41" material width
- ESD/RFI-EMI shielding attenuation > 70dB up to 10 GHz for CuNi type
- Seal enclosure panels and frames, seams or joints
- Use for architectural shielding or shielded room wall and ceiling finishing

Options

- All materials are available in non-adhesive, hot melt or conductive adhesive backing
- Standard sheets are 41" x 36" (1041 x 914 mm)
- Longer lengths can be custom ordered – please consult factory for information
- Full rolls are 325' (99M) long – please consult factory for ordering information. Note: conductive adhesive versions are 164' (50M) long

Fabric Shielding Tapes

Applications

Cable shielding, enclosure seams, shielded room joints, PCB component shields, irregular surface/component shields, alternative to custom die-cut shielding gaskets or sections.

- Service Temperature: -40°F to 212°F (-40°C to 100°C)
- Adhesion: (peel) 50 oz/in. (54N/100mm)
- Material: CuNi metalized fabric and conductive acrylic adhesive backing w/release liner

CFS CONDUCTIVE FOAM SHIELDING MATERIAL FOR DIE-CUT GASKETS

CFS Conductive Foam Shielding Material consists of resilient Nickel-Copper polyurethane foam which is layered between two pieces of conductive polyester fabric. This CFS Conductive Foam is ideal for applications that require low compression forces but excellent shielding effectiveness.

Performance

Operating Temperatures: -40F – +156F (-40C - +70C)

Surface Resistivity: <0.2 ohms/sq

Shielding Effectiveness: 60dB Typical 10MHz – 3GHz

Flammability: UL94-HBF Unless otherwise noted UL94-V1*

Typical Compression Load: 2.1 PSI at recommended 30% compression

Availability

Sheets: Up to 1.0m x 1.0m (*Custom Sizes Available*)

Finishing: Precision Die-Cut Forms & Shapes

Available with Conductive Adhesive

Material Characteristics

High Shielding Effectiveness

Low Compression

Low Surface Resistivity

Applications

Intricate die cuts forms

I/O panels

Backplanes

Connectors

Access panels

CUSTOM AND DIE-CUT SHIELDING GASKETS

In addition to our large assortment of stock products, Leader Tech offers customers the ability to create custom and die-cut shielding gaskets using any of our conductive elastomer formulations or fabric shielding gasket materials. Our extensive manufacturing capabilities include extrusion, molding and precision die-cut shapes and sizes.

All of our high-performance custom shielding gaskets can be made from your choice of twelve MIL-DTL-83528 Conductive Elastomer compounds or from our Fabric Shielding Gasket material. Depending on your unique application requirements, our engineering team will work to develop a custom gasketing solution that exhibits superior shielding properties and ensures a long performance life in a cost effective manner.

Please review your application with our Material Specialist and Engineering Group to determine the best materials to use for your application.

Die Cut Gasket Design Recommendations and Tolerances

NOTES:

1. Minimum recommended flange width (W) is .125".
2. Hole diameter (D) must exceed material thickness (T).
3. Distance edge of hole to edge of gasket (E) must exceed material thickness (T).
If not possible, then a slot is required.
4. Recommend assign datum to hole C/L and not to edge of gasket.

| Tolerance Range | | | | |
|-----------------|-------------|----------|-----------|------------|
| FEATURE TYPE | Sample Dim. | 0 - 4" | 4.1 - 12" | 12.1 - 24" |
| Length/Width | A, B, W | +/- .020 | +/- .030 | +/- .040 |
| Hole Location | C, F | +/- .010 | +/- .015 | +/- .020 |
| Hole Diameter | D | +/- .020 | +/- .030 | +/- .040 |

We've Got You Covered

Reliable Board, Enclosure and Cable Shielding Solutions

Leader Tech is a world-leading innovator and US-based manufacturer of EMI shielding products for circuit boards, enclosures and cables. In addition to our best selling standard, modified standard and custom CBS shields, Leader Tech offers an expansive line of beryllium copper fingerstock gaskets, conductive elastomers, advanced RF absorber materials and EMI/RFI ferrites.
