

USB Battery Charger (LIR2032)

TEK012

USB-powered charger for LIR2032 coin cell batteries. **DO NOT use with non-rechargeable CR2032 batteries!**

Teknikio make a range of fun and beautiful sewables (or stickables - you can use them in origami/papercraft projects too), that are designed with children and education in mind, but they suit explorers, inventors, and curious minds of all ages: 8 to 108!

They've also put together a couple of fab guides on **sewables** and **origami** to teach you the basics and give you some project ideas.
