Trimmer Capacitors & Non-Magnetic Components

Introduction to Voltronics Corporation

Voltronics has been supplying high performance multi-turn trimmers since 1963. Our range of trimmers are suitable for applications that require high precision, mechanically stable with a high tolerance to vibration and shock. Our success is based on a unique sealed, non-rotating piston design that has become one of the designers preferred choices for demanding applications.

As well as our extensive range of standard products we are able to design and manufacture customized products for our specialty customers. In addition we are able to offer a range of half turn trimmers suitable for less stringent applications, but still providing good stability and voltage handling capabilities.

For more than 30 years Voltronics has been partnered with leading MRI manufacturers, supporting them with the highest quality non-magnetic components. This has grown from just supplying trimmer capacitors to now include a broad offering of non-magnetic components focussed on MRI applications.

J-Series engineering kits are a great way to become familiar with our products. Each kit contains 4 or 5 units of every value. Please be sure to inquire about tuning tools when ordering.

* Tuning tools are included with this kit.

**Tuning tools are not included with this kit.

Washing Instructions:

The J-Series trimmer capacitors can withstand cleaning cycles up to 10 PSI and have been used by customers for more than a decade in many diverse environmental conditions. Without knowing your particular washing or cleaning environment, we recommend these basic guidelines:

- 1) Water wash or isopropyl alcohol cleaning agents are acceptable providing that baths are clean and uncontaminated. For maximum effectiveness, the cleaning process should occur immediately after soldering.
- 2) Either brush or spray methods are acceptable.
- 3) * Drying out components with forced hot air is highly recommended.
- 4) Also, we do recommend turning the tuning screw 3 or 4 complete revolutions prior to arriving at the final "set."

* If a water wash process is used and water does get inside, we recommend that the parts be heated above 100C for a minimum of 15 minutes, so that the water evaporates. After this, the rotor should be turned 1-2 times to redistribute the internal grease.

A & E - Standard AIR Trimmer Capacitors

The Only Internally-Sealed Air Trimmer

Voltronics' concentric ring air trimmer capacitors are designed for use at frequencies up to 1.5 GHz. They are ideal for applications such as mobile radios, aerospace communication, crystal oscillators and filters, radar, cable TV and innumerable other commercial and military programs. The unique internal O-ring seal make wave soldering and vapor degreasing possible without the need to attach a separate cap.

Available in two styles:

"A" Series - Solder sealed and qualified to MIL-C-14409.

"E" Series - Epoxy sealed for economical commercial applications.

Other features include:

- Ten full linear turns
- Internal stops
- Extreme stability under shock & vibration
- Screw head does not move in and out
- Extended shaft option of metal or plastic
- Long life with no dynamic tuning noise

Note:

All parts shown here can be ordered as non-magnetic: Add "NM" to Part Number, i.e., NMAP10

A1 & A3 - Low Cost PTFE Trimmer Capacitors

The Voltronics A1 & A3 Series of high reliability solid dielectric trimmer capacitors is an ideal economical replacement for conventional miniature air and sapphire dielectric trimmers and assures no intermittent noiseless performance.

High reliability solid dielectric, positive tuning stops and up to 13 full turns of linear tuning make the A1 Series an outstanding performer: 40 psi sealed, high voltage and non-magnetic versions are readily available.

General Specifications	A1_4	A1_8	A1_12
Capacitance Range	0.45-4pF	0.5-8pF	0.6-11pF
DC Working Voltage	250	125	125
DC Withstanding Voltage	500	250	250
Self-Resonant Frequency*	2.3 GHz at 4pF	1.7 GHz at 8pF	1.2 GHz at 11pF
Number of Turns	7	7	13
Q (min) at 100 MHz @ Max. C*	4000	3000	2000
Temperature Coefficient	0±50 ppm/°C	0±100 ppm/°C	0±150 ppm/°C
Insulation Resistance @ 25° C	10 ⁶ megohms		
Operating Temperature	-65°C to +125°C		
Tuning Torque	0.3 to 1.0 in-oz		
Shock	1,500g, 0.5 millisees.		
Vibration	50g at 10-2000 Hz		

* Self-resonant frequency and Q are assured with no terminals on parts.

Options

The "HV" Option - high voltage applications: Add "HV" to the part number, i.e., A1T4HV.

Specifications are as follows:

Capacitance	DC Volts Working	DC Volts Withstanding
4pF	1,000	2,000
8pF	500	1,000
11pF	500	1,000

Non-Magnetic Option:

Most parts shown can be ordered as non-magnetic. Add "NM" to the part number, i.e., NMA1J8.

Sealed Option:

All parts shown can be ordered as 40 psi sealed. Add "S" to the part number, i.e., A1M4S.

Tape & Reel Options:

Consult Factory - M & J style only
Recommended Tuning Tool: TT-400

Options

The "HV" Option - high voltage applications: Add "HV" to the part number, i.e., A3T10HV.

Specifications are as follows:

DC Volts Working	DC Volts Withstanding
1,000	2,000

General Specifications	A3_10
Capacitance Range	1.0-10.0pF
DC Working Voltage	250
DC Withstanding Voltage	500
Self-Resonant Frequency*	2.3 GHz
Number of Turns	7
Q (min) at 100 MHz @ Max. C*	2000
Temperature Coefficient	0±50 ppm/°C
Insulation Resistance @ 25° C	10 ⁶ megohms
Operating Temperature	-65°C to +125°C
Tuning Torque	0.5 to 2.0 in-oz
Shock	1,500g, 0.5 millisees.
Vibration	50g at 10-2000 Hz

* Self-resonant frequency and Q are assured with no terminals on parts.

A2 & A4 - Low Cost Miniature PTFE Trimmer Capacitors

The Voltronics A2 Series is among the smallest multi-turn piston trimmer capacitors in the industry. Utilizing a high reliability solid dielectric, positive tuning stops and 3 standard mounting configurations this trimmer capacitor is an ideal replacement for expensive sapphire dielectric trimmers. Applications include tuning and impedance matching of high frequency, and high power amplifiers especially where small size and high performance are critical requirements.

Options

The "HV" Option - High Voltage Options:
Add "HV" to the part number, i.e., A2M1HV.

Specifications are as follows:

DC Volts Working	DC Volts Withstanding
1,250	2,500

Tape & Reel Options:

Consult Factory - M & J style only

General Specifications	A2_1
Capacitance Range	0.3–1.2pF
DC Working Voltage	250
DC Withstanding Voltage	500
Self-Resonant Frequency*	5 GHz at 1.2pF
Number of Turns	7
Q (min) at 100 MHz @ Max. C*	2000
Temperature Coefficient	0±150 ppm/°C
Insulation Resistance @ 25 °C	10 ⁶ megohms
Operating Temperature	-65 °C to +125 °C
Tuning Torque	0.1 to 1.0 in-oz
Shock	1,500g, 0.5 milliseconds.
Vibration	50g at 10-2000 Hz

* Self-resonant frequency and Q are assured with no terminals on parts.

The Voltronics A4 Series unique design using minimal parts simplifies the manufacturing process to effect one of the most economical high performance trimmer capacitors available in the industry. The Voltronics A4 Series also features a high reliability solid dielectric, positive tuning stops and up to 5 full turns of linear tuning in the shortest length of any similar trimmer capacitor. The Voltronics A4 is an ideal choice for tuning and impedance matching, high frequency and high power amplifier circuits.

Options

The "HV" Option - high voltage applications:
Add "HV" to the part number, i.e., A1T4HV.

Specifications are as follows:

Part No.	DC Volts Working	DC Volts Withstanding
A4_3 HV	500	1,000
A4_5 HV	500	1,000

Non-Magnetic Option: All parts can be ordered as non-magnetic. Add "NM" to the part number, i.e. NMA4J3

Tape & Reel Options: Consult Factory - M style only

SD Option -
for applications requiring high reliability but lower voltage

Part No.	Working Voltage	Withstanding Voltage
K_1SD	250	500
A or K_4SD	250	500
A_25SD	125	250
A_30*	250	500
A_40SD	250	500
A_55SD	125	250

General Specifications	A4_3	A4_5
Capacitance	0.45–3pF	0.6–5pF
DC Working Voltage	125	125
DC Withstanding Voltage	250	250
Self-Resonant Frequency*	3 GHz at 3pF	1.8 GHz at 5pF
Number of Turns	4	5
Q (min) at 100 MHz @ Max. C*	3000	2000
Temperature Coefficient	0±100 ppm/°C	0±300 ppm/°C
Insulation Resistance @ 25 °C	10 ⁶ megohms	
Operating Temperature	-65 °C to +125 °C	
Tuning Torque	0.3 to 1.0 in-oz	
Shock	1,500g, 0.5 milliseconds.	
Vibration	50g at 10-2000 Hz	

* Self-resonant frequency and Q are assured with no terminals on parts.

Note: A_30 not available in high voltage configuration

A_HV & E_HV - High Voltage PTFE Trimmer Capacitors

The Only Internally-Sealed HV PTFE Trimmers

Voltronics' concentric ring PTFE dielectric trimmer capacitors are designed for use at frequencies up to 1.5 GHz. They are ideal for HIGH VOLTAGE applications. The solid internal PTFE dielectric prevents ionization, a major advantage in space, high altitude and high voltage applications. The unique internal O-ring seal makes wave soldering and vapor degreasing possible without the need to attach a separate cap.

Available in two styles:

"A_HV" Series - Solder sealed ceramic body. "E_HV" Series - Epoxy sealed plastic body.

General Specifications	A_4HV / E_4HV	A_10 HV / E_10HV	A_15 HV / E_15HV	A_25 HV / E_25HV
Capacitance Range	1-4pF	1-10pF	1-16pF	1-23pF

Tuning Torque	.05 to 5.0 in-oz	.05 to 5.0 in-oz	.05 to 5.0 in-oz	.05 to 5.0 in-oz
Shock	1,500g, 0.5 millisecons.	1,500g, 0.5 millisecons.	1,500g, 0.5 millisecons.	1,500g, 0.5 millisecons.
Vibration	50g at 10-2000 Hz	50g at 10-2000 Hz	50g at 10-2000 Hz	50g at 10-2000 Hz

* Self-resonant frequency and Q are assured with no terminals on parts.

Extended Range

Other features include:

- Ten or 29 linear turns
- Internal stops
- Extreme stability under shock & vibration
- Screw head does not move in and out
- Extended shaft option of metal or plastic
- Long life with no dynamic tuning noise

General Specifications	A_40HV	A_55HV
Capacitance Range	1.5-40pF	1.5-55pF
Q (min) at 100MHz @ Max. C*	2000	
Q (min) at 75 MHz@ Max. C*		780

SERIES LEAD STYLE CAPACITANCE OPTIONS
P, J & T Lead Styles Refer to page 16

Options:

Extended metal shaft.
Add 'E' to the part number i.e. AT10-4E

For Non-Magnetic parts add 'NM' to part number, i.e. NMAT10-4

NT Series Ultra High Voltage PTFE Trimmer Capacitors

4kV to 20kV

Voltronics new "NT" series of PTFE trimmers are designed for applications requiring greater capacitance and voltage ratings than the popular smaller trimmers but without the large size and expense of vacuum capacitors.

The "NT" Line Offers:

- High voltage
- Non-rotating piston, long life & no tuning noise
- Extremely stable under shock & vibration
- Screw head does not move in & out

Extended Shaft Options:

Add "E" to the part number
e.g. NT10-5E

Part Number	DC Working Voltage	DC Withstanding Voltage	Capacitance (pF) <	Capacitance (pF) >	"A" Dim ±.06	"B" Dim ±.06

AIR/PTFE Trimmer Capacitors - Lead Styles

Note: All bushing threads are .234" -64

P Series - High Q Sealed Sapphire Trimmer Capacitors

Voltronics "P" line of sapphire subminiature trimmer capacitors is unique in design. The trimmers have a high Q, zero temperature coefficient, and are internally O-ring sealed to keep out flux and cleaning fluid. Yet, sizes are the same as the MIL unsealed styles. The tuning screw does not move in and out, and RF current does not run along it. Sapphire is ideal for precision trimmer capacitors. Its dielectric constant is extremely stable and the dielectric loss is below 0.0003 over frequencies up to 10GHz. Sapphire is chemically inert, totally moisture resistant, and mechanically strong.

Other features include:

- High Q, low temperature coefficient, and internal seal
- Low self-inductance for use to 10 GHz
- Interchangeability with unsealed designs
- Long life, no measurable tuning noise

General Specifications	P Series
Capacitance	0.6-2.5/0.6-4.5/0.8-8.0pF
DC Working Voltage	500
DC Withstanding Voltage	1000
Seal	Internal O-ring
Temperature Coefficient	0 ± 50 ppm/°C
Insulation Resistance @ 25°C	10 ⁹ megohms
Operating Temperature	- 55°C to +125°C
Tuning Torque	0.2 to 2.0 in-oz
Shock	100g, 6 milliseconds.
Vibration	60g at 10-2000 Hz

NOTE: For diameter and length dimensions on Figures 2-7, see figure 1.

High Frequency Data

*This high frequency data was taken on a Boonton Model 34A Resonant Coaxial-line with the parts set at their maximum rated capacitance values. Connections to the parts were made directly on the body of the capacitors.

Glass and Quartz Trimmer Capacitors

Design Features

The unique Voltronics non-rotating precision trimmer capacitor design offers the following advantages over conventional rotating types:

- Linear tuning with no reversals
- A true high frequency device with high Q's, low RF losses, low constant inductance and high self-resonant frequencies
- A superior seal because the screw head and O-ring do not move in and out
- Greater life -10,000 cycles minimum
- Much smaller sealed MIL sizes
- Ability to provide extended metal or plastic shafts

Dielectric

The dielectric is a tube which has been precision drawn in a vacuum so that its inner diameter is held within $\pm 0.0002''$. The choices are:

- 1. Annular Band Glass:** A solid tube of a specially selected formulation of glass which is metallized on the outside.
- 2. Embedded Band Glass:** Two tubes of glass fired together with a metallized silver band embedded between them. The inner tube is only 0.005" thick to provide much higher capacitance values.
- 3. Quartz:** A pure-grade silicon oxide offering higher Q and voltage ratings in each size with the trade-off of lower capacitance and higher cost.

General Specifications

(where not specified on detail pages)

Piston Action

Non-rotating

Blind Hole Tuning

Screw head does not move in and out

Linearity

$\pm 1\%$ with no capacitance reversals

Resolution

#2-72 tuning screw for fine tuning—approximate pico-farads per turn in active tuning range:

- | | |
|--------------------------------|------------|
| 1. Annular band glass | .6 to .8 |
| 2. Embedded band glass | 2.3 to 3.0 |
| 3. Quartz | .3 to .36 |
| 4. "H" Series high range glass | 3.9 to 4.2 |

Insulation Resistance

Annular band glass and quartz:
 10^6 Megohms at 25°C to 125°C
 Embedded band glass:
 10^6 Megohms at 25°C
 10^5 Megohms at 125°C

Tuning Torque

1 to 8 inch ounces

Life

Over 10,000 cycles

Temperature Coefficient

Annular Band Glass: ± 50 ppm/°C
 Embedded Band Glass: ± 150 ppm/°C
 Quartz: 0 to +50 ppm/°C

Dielectric Withstanding Voltage

Twice DC working voltage (listed with each part)

Capacitance Tuning Range

From below minimum to above maximum value listed for each part. Capacitance measured at 1 MHz on Boonton Electronics 7600 bridge using Voltronics V1265 guarded test jig. AM measurements taken with leads perpendicular to unit regardless of final configuration.

Temperature Range

All glass dielectrics: -55°C to 125°C
 Quartz dielectric: -55°C to 150°C

Other Specifications

All other specifications including vibration, shock, moisture and seal (where applicable) per MIL-C-14409D

Drawing Tolerances (where not specified)

Decimal: XXX $\pm .016''$
 XX $\pm .03''$

Quality Factor

Recommended Tuning Tool: TT-100 or TT-600

S Series - Smallest Sealed Glass Trimmer Capacitors

The PC17 styles are the only vertically mounted glass trimmers in MIL-C-14409D.

Voltronics "S" Series are up to 40% shorter with 25% more range than any other sealed standard glass RC. trimmers. The use of Voltronics' unique non-rotating piston design provides linear tuning, high "Q", long life, and high self-resonant frequencies. The O-ring seal assures protection up to 40 p.s.i. against dust, moisture, flux, solder, and cleaning solvents.

Dielectric	Capacitance Range (pF)		Q (Min.) at 1 MHz	Horizontal Mount Figure 1			Vertical Mount* Figure 2		Surface Mount Figure 3

FIG. 1

FIG. 2

FIG. 3

FIG. 4

NOTES:

1. All Fig. 2 thru Fig. 4 parts have same end view as Fig. 1. Fig's 2 and 3 have mounting dimensions of Fig. 1
2. C diameter of Fig. 1 parts .27 for embedded band and .25 on all other parts.

Detailed General Specifications on Page 18

Optional Configurations

EXTENDED PLASTIC SHAFT

Add "E1" to Type Number
(ex. TP9CE1)

EXTENDED METAL SHAFT

Add "E" to Type Number
(ie., TP9E)

PRINTED CIRCUIT LUG

Add "L" to Type Number
(ie., TP28L)

Differential Glass Trimmers

	Fig.	Capacitance Range (pF)				A	B	C
		Min. (1)	Min. (2)	Max. (1) Max. (2)	Typical Crossover			
TM3D	1	1.5	2.0	3	2.4	.31	-	.09
TM8D	1	1.5	2.5	8	5.5	.55	-	.22
TM12D	1	1.5	3.0	12	7.7	.75	-	.31
TM16D	1	1.5	3.5	16	10.1	.94	-	.41
TM28D	1	1.5	5.0	26	16.0	1.44	-	.66
TP3D	2	1.5	2.0	3	2.4	.31	.28	.09
TP8D	2	1.5	2.5	8	5.5	.55	.45	.22
TP12D	2	1.5	3.0	12	7.7	.75	.61	.31
TP16D	2	1.5	3.5	16	10.1	.94	.75	.41
TP28D	2	1.5	5.0	26	16.0	1.44	1.13	.66

Note: For sealed versions, add "G" to part number, ie., TM8DG. The "A" dimension will be 0.11" longer.

For a differential trimmer capacitor, the capacitance of one element increases while the other element decreases, with the sum remaining approximately constant.

DIFFERENTIAL STYLES

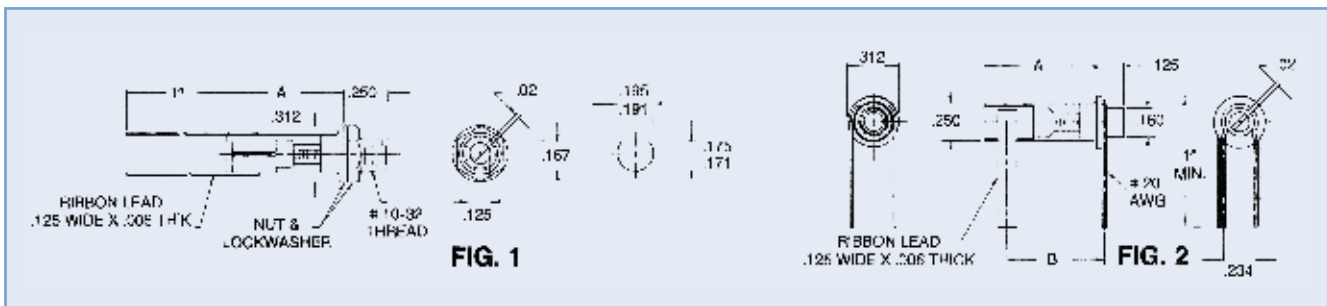

Split Stator Glass Trimmers

	Fig.	Capacitance Range (pF)				A	B
		Plate/Plate		Plate/Brushing			
		Min.	Max.	Min.	Max.		
TM4S	1	0.8	2.0	0.8	4.2	.55	-
TM9S	1	1.5	4.5	0.8	9.0	1.02	-
TM14S	1	2.0	7.0	1.0	14.0	1.67	-
TP4S	2	0.8	2.0	0.8	4.2	.55	.47
TP9S	2	1.5	4.5	0.8	9.0	1.02	.91
TP14S	2	2.0	7.0	1.0	14.0	1.67	1.53

Note: For sealed versions, add "G" to part number, ie., TM4SG. The "A" dimension will be 0.11" longer.

Both elements of a split stator trimmer tune at approximately the same rate.

SPLIT STATOR STYLES

General specifications on page 18 apply except:

- DC Working Voltage: 500
- Temperature coefficient: 0±100 ppm/°C.

Pre-Set Trimmers

Every trimmer in this catalog can be set at a fixed value by Voltronics. This saves you the labor of setting the trimmer and can replace a fixed capacitor. If any part of the circuit drifts with temperature or time, the trimmer can be tuned. This will save not only initial set-up time, but will allow tuning without changing fixed components.

Voltronics trimmers are as stable as fixed capacitors and many are less expensive!

Tuning Tools

MATAL (Fig.1)			
Part No.	Tip A	Tip B	Capacitor Series
TT-100	.110X.018	.070X.012	A, E, K, KE, DRO, Glass, NT P
TT-200	.110X.018	.032X.088	A, E, K, KE, DRO, Glass, NT
TT-300	.060X.018	.070X.012	A1, A3 P
TT-400	.060X.018	.036X.012	A1, A3 A2, A4

Ceramic (Fig.2)		
Part No.	Tip A	Capacitor Series
TT-500	.07X.016	A1, A3, A, E, K, KE, DRO
TT-600	.10X.016	Glass, NT
TT-700	.050X.016	P
TT-900	.038X.016	A2, A4

The TT-500 thru TT-900 tuning tools are ideal for continual use. They fit into the hand with the rotatable top fixed in the palm. The tips are made of high strength ceramic. Use these tools where metal tips affect tuning.

DRO - Microwave Tuners For Dielectric Resonator

These precise tuners provide fine, stable adjustments to microwave components such as cavities, DRO's, wave guides and filters. Applications as diverse as space telemetry to supermarket door openers use these products. The self-locking slots in the threads together with the fine pitch provide reliable, permanent settings. They eliminate the loose fits and low resolution of standard threads. Tuning is smooth with controlled torque and no noise. Bushings, rotors and dielectric rods may be purchased separately. The DRO tuners are sealed either with an O-ring or by a true hermetic solder seal. The many versions of screw tuners are either entirely metallic or with dielectric rods of sapphire, alumina or quartz.

Tuning Element Taps

Fluted taps are offered for each part because the thread sizes are fine and non-standard.

Selection Guide	
Style	Designation
DRO tuners	D & DK
DRO hermetically sealed tuners	D-HS
Metallic tuning elements	MT
Metallic rotors	MR
Dielectric tuning elements	DT
Dielectric rotors	DR
LC tuning elements	LCT
Tuning element Taps	VT

Dro Tuners

The Voltronics DRO Tuner design is based upon the proven tuning mechanisms of its trimmer capacitors. The parts have O-ring sealed front ends, long life, positive stops and low loss. The tuners have up to 10 full turns of resolution. The disk diameter ("A" Dim.) can be modified to meet your requirements. The hermetically sealed parts have high temperature solder joints. When soldered into your case, there is a hermetic barrier to the inside of your cavity. The part's O-ring seal keeps moisture and other contaminants from getting inside the tuner.

Part No.	Thread Size	For Series
VT-0	1.7mm-0.2mm	DR067

Product Guide - Non Magnetic Trimmers

Increasing magnetic resonance applications caused Voltronics to launch an active engineering effort in this field years ago, one that continues today. Due to the severe non-magnetism requirements in these industries, we use only materials that exhibit no measurable magnetism. Commercial brass and plating materials are not acceptable. Our strict traceability and testing regimes insure this essential parameter.

Most of our trimmers are internally sealed so that they withstand immersion in flux and solvents without leaking. Most of our non-magnetic trimmers have been used and tuned at temperatures as low as 4K. Many of our selection of trimmers have been developed for specific customer needs – let us design a high performance trimmer for your application.

Product Selection Guide - Consult Factory for Complete Catalog

Product Line	Description	Series	Maximum Capacitance	Maximum DC Working Voltage	Typical minimum Q value

NT Series - Non Magnetic PTFE Trimmer Capacitors

4kV to 20kV

High Voltage Applications

Voltronics new "NT" series of PTFE trimmers are designed for applications requiring greater capacitance and voltage ratings than the popular smaller trimmers but without the large size and expense of vacuum capacitors.

Other features include:

- High voltage
- Non-rotating piston, long life & no tuning noise
- Extremely stable under shock & vibration
- Screw head does not move in and out

V9000 - Non Magnetic PTFE Trimmer Capacitor

The V9000 trimmer capacitor is a unique design: truly sub miniature at just 0.64" in length, but offers the highest working voltage rating, of 2kV and capacitance value, up to 12pF, available in its size. Using a Sapphire dielectric, for its ideal dielectric constant, it is extremely stable, is chemically inert, moisture resistant and mechanically strong. Recently launched, additional features are still under development, contact Voltronics for our usual custom modifications and adaptations.

General Specifications

Capacitance Range	1.0pF to 12.0pF Typical
DC Working Voltage @ 12.0pF	2000V
DC Withstanding Voltage @ 12.0 pF	3000V
Q Factor @ 100MHz & 12.0 pF	3000 Min
Insulation Resistance	105 MΩ @ 25°C
Temperature Coefficient	500 ± 200 ppm/°C

Mechanical Specifications

Tuning Torque	0.5 in oz to 3.0 in oz
Rotational Life	600 Turns Min
Construction	Non-Magnetic

Environmental

Operating Temperature	-55°C to +125°C
RoHS Compliant

Product Guide - Non Magnetic High Q Multilayer Capacitors

Made from highly stable, low loss dielectric formulations, these traditional porcelain MLCs are known for their high RF power handling capability. Available in all industry common case sizes. The special silver-palladium termination and the proprietary ceramic formulations guarantee consistent non-magnetic performance. All MLCs in these series are RoHS compliant. Chips are available either with standard termination or can be fitted with ribbon leads, depending on your application.

Description

- Porcelain Capacitors • Zero TC • Low Noise • Low ESR, High Q
- High Self-resonance • Established Reliability
- Capacitance range 0.1-5100 pF

Functional Applications

- Impedance Matching • DC Blocking • Bypass • Coupling
- Tuning & Feedback

Case Size Series	Dimensions inches	Working Voltage Range, Volts DC	Capacitance Range, pF
5	0.055" x 0.055"	Up to 250V	0.1 to 100
11	0.110" x 0.110"	Up to 1000V	0.1 to 1000
25	0.220" x 0.250"	Up to 2500V	1.0 to 2700
38	0.380" x 0.380"	Up to 7200V	1.0 to 5100

Electrical Specifications	
Dissipation Factor	0.05% @ 1 MHz max.
Dielectric Withstanding Voltage	250% of rated WVDC for 5 sec. Unless specified in chart

Non Magnetic High Q Multilayer Capacitors

Recommended Procedure for Hand Soldering Chip Capacitors

Equipment: Weller Ec-2001 soldering system (42 watt) or equivalent (1/8" tip) for 11 Series, (1/4" tip) for 25 Series or (3/8" tip) for 38 Series
310 ± 10 degrees C tip temperature

Solder: Sn60/Sn62/Sn36

Flux: Alpha 611 type RMA or equivalent

Cleaning Solvents: 2-propanol or commercial defluxing solvent

Procedure:

1. Preheat chip and stripline to 100-120°C for a minimum of one minute. If solder other than the above is used, preheat to within 50-70°C of reflow temperature.
2. Dip chip in flux for 2-3 seconds, or apply flux to chip and stripline area. Apply solder paste if necessary.
3. Place iron on stripline for three seconds to preheat, then move slowly to contact chip for approximately four seconds to effect reflow.
4. When reflow is achieved, withdraw iron slowly, allow to cool naturally.
5. Clean area thoroughly, with 2-propanol or other defluxing solvent. If possible, use ultrasonic cleaning for these steps.
6. Inspect solder fillet for coverage and defects.

Termination Guide

New (RoHS)	- "M"	Flexible polymer / Ag layer, 400-500µ-in Cu barrier, 200µ-in Sn plate.
New	- "R"	Ag layer, 400-500µ-in Cu barrier, 10,000-1 2,000µ-in 90/10 Sn/Pb plate
Original	- "S"	PdAg plate
New	- "V"	Ag layer, 400-500µ-in Cu barrier, 100-150µ-in 90/10 Sn/Pb plate
New (RoHS)	- "W"	Ag layer, 400-500µ-in Cu barrier, 200µ-in Sn plate

MATERIAL GUIDE/Temp. coefficient

"AH"	+90 ± 20ppm/ °C
"CF"	0 ± 15ppm/ °C

Series 11>	10lbs. min.	5lbs. min.
Series 25>	10lbs. min.	10lbs. min.
Series 38>	20lbs. min.	20lbs. min.

The quality system is approved to MIL-I-45208 & 10001. All parts are 100% thermal stress tested.

Attachment Methods

All parts are constructed to be compatible with commonly used industry methods. Reflow soldering, wave soldering, vapor phase soldering ("S" termination) and conductive epoxy ("R" termination) may be used.

Cleaning

Chip capacitors can withstand commonly used cleaning agents such as water, alcohol, and degreaser solvents. Ascertain that no flux residues are left on the chip surfaces and no flux is trapped under the chip. Flux residue will degrade Q, insulation resistance and reliability.

Shelf Life

Capacitors will be solderable for a minimum of one year from date of shipment if properly stored in the original packaging. Dry nitrogen storage is preferable for longer periods.

Precautions

The rate of heating and cooling must be controlled to preclude thermal cracking of the devices. Processes, heating or cooling, should not exceed a rate of 20000 per minute. Spikes must not exceed 100°C maximum for any solder operation. Avoid forced cooling or contact with heat sinks, such as conveyor belts, metal tables or cleaning solutions, before the chips reach ambient temperatures.

Why Rounded Corners?

Rounded corners provide uniform termination on these MLC products. The greater surface area improves solder attachment and provides a more uniform adhesion to the board. Rounded corners also reduce the chance of tomb-stoning and mechanical thermal shock types of stress.

5 Series - Non Magnetic High Q Multilayer Capacitors

General Specifications

38 Series - Non Magnetic High Q Multilayer Capacitors

Dimensions

Quality Factor (Q)

Note: For a detailed Q chart go to www.voltronicscorp.com

General Specifications

Case Size	.380" L x .380" W x .130" H
Capacitance Range	1pF to 5,100pF
DC Working Voltage	7,200 1 to 100pF 3,600 120 to 390pF 2,500 470 to 680pF 1,000 820 to 2200pF 500 2700 to 5100pF
DC Withstanding Voltage	2.5 x Working Voltage
Quality Factor	See chart below
Temperature Coefficient	+90 ±20ppm/°C
Operating Temperature	-55°C to +125°C
Insulation Resistance @ 25°C	10 ⁵ megohms

Product Guide - Non Magnetic Coils

To further support our magnetic resonance customers around the world, Voltronics supplies a comprehensive line of totally non-magnetic air coil inductors and potted inductors. In concert with our ISO9001 approved partner, Voltronics can also supply your BALanced UNbalanced transformer coil requirements. We understand that each application is unique. We ask that you provide us with your drawings or samples of your coils and we will provide a quote and samples in two weeks. When your application requires high performance non-magnetic components, think first of Voltronics.

Consult Factory for Specific Requirements

Non Magnetic Diodes

In support of our magnetic resonance customers around the world, Voltronics now offers a comprehensive line of non-magnetic diodes. With our ISO9001 approved partner, Voltronics wants to be your diode design partner for your future unique needs and your reliable supplier of your current requirements. Our comprehensive capabilities include PIN diodes, dual diodes, Schottky diodes, and more. When your application requires high performance non-magnetic components, think first of Voltronics.

RF Actuated Diode Switch

The MX51363-145 is designed to be used as a surface coil blocking network. The part consists of four step recovery diodes, connected as two anti parallel pairs.

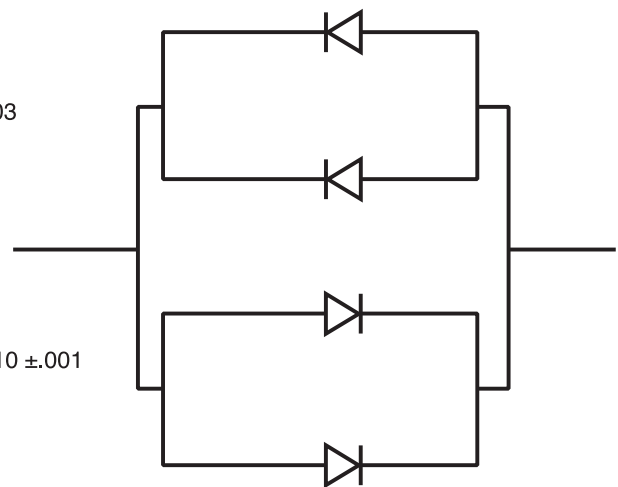

Specifications:

Total junction capacitance plus package capacitance, measured with an RF source voltage less than or equal to 71 mV RMS at 50 MHz and no DC bias, shall not exceed 3.5pF.

Q equal to or greater than 1,000.

Thermal resistance not to exceed 60°C / Watt

Maximum junction operating temperature shall be 125°C

IRMS	100 milliamps maximum
Saturation Current	Less Than 50 milliamps
Minority Carrier Lifetime	24 nanoseconds (nominal)

Non Magnetic Hardware

Due to the severe non-magnetism requirements in the magnetic resonance industries, we use only high purity metals that exhibit no measurable magnetism. Commercial brass is simply not acceptable for these applications. Our strict traceability and testing regimes insure this essential parameter.

We can offer sizes, styles, and lengths beyond those shown in the tables on these pages – such as Cheese Head, Round Head, and set screws. We also offer flat washers to complete your needs.

Coils also require inserts, pins, and other special shapes that are custom-designed to satisfy the specific requirements of the coil designer. The ability to quickly and precisely supply custom designs is part of our heritage and we are eager to sample our high quality hardware based on your requirements. As with the screws, washers, and nuts on this and the preceding page, we use only high purity metals that exhibit no measurable magnetism.
