**NOTE:**

1. The current rating (Irated) is based upon the temperature rise of the component and represents the rms current which will cause a typical temperature rise of 55C with 50LFM forced cooling
2. The temperature of the component (ambient plus temperature rise) must be within the stated operating temperature range.
3. Optional Tape & Reel packaging can be ordered by adding a "T" suffix to the part number (i.e. PA2741NL becomes PA2741NLT). Pulse complies to industry standard tape and reel specification EIA481.
4. Inductance values shown are all nominal +/- 35% except those identified with an asterisk (\*) which indicates that the inductance is a minimum value.
5. Leakage inductance values as shown are the minimum value except those identified with an asterisk (\*) which indicates the value shown in a typical value.

Please note that for PA2741NL and PA2742NL the part should be connected as follows:  
Customer to connect pins (1,2) and (4,3) together on board to form a single winding (1,2-4,3).  
Customer to connect pins (8,7) and (5,6) together on board to form a single winding (8,7-5,6)  
All ratings (leakage and DCR) are with respect to the above winding configuration.
