Description

The WL1271 daughter card for AM18x and OMAP-L1 EVMs is a WLAN and Bluetooth® (BT) add-on card, based on the LS Research TIWi module with WL1271 device. WL1271 is part of TI's WLink™ 6.0 product family. The add-on card comes bundled with a comprehensive software package for Linux and Windows, providing mobile WLAN connectivity solution for home/SOHO and public environments, and a Bluetooth driver integrated to Linux Bluetooth driver. WL1271 daughter card will be included in the EVM Box for AM1808 EVM (TMDSEVM1808L).

For additional information (including integrated software development kit [SDK] package and driver release), please visit the [Wiki](#).
