ASEK71020 Evaluation Board

ACS71020 DEMO BOARD AND COMPONENTS

Allegro ACS71020 demo board is pictured in Figure 1 below. Refer to Table 1 for symbol names and descriptions of onboard components. Note: Board is pictured without capacitors and resistors attached.

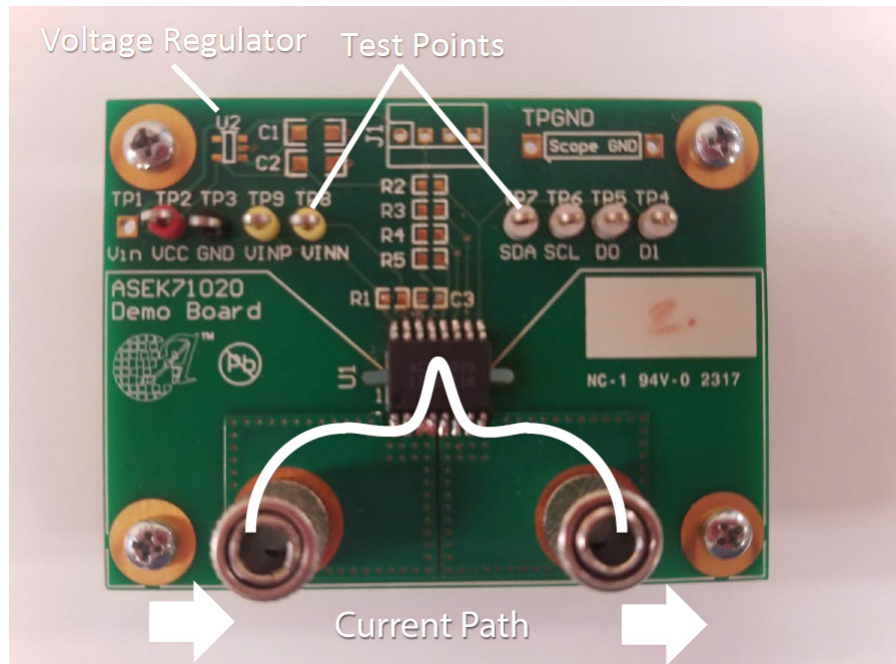

Figure 1: Allegro ACS71020 Current Sensor Demo Board

Table 1: Summary of Demo Board Components

Symbol	Description
U1	Location of Allegro ACS71020
U2	Voltage regulator
C1/C2	0.1 μ F regulator capacitors
C3	0.1 μ F device bypass capacitor
R1	R_{SENSE} resistor voltage step down circuit. Application specific.
R2-R5	Digital I/O pull-up resistors (used for SPI or I ² C communication)

Figure 2: Schematic for ACS71020 Demo Board

PINOUT DIAGRAM AND TERMINAL LIST

Pinout Diagram

Table 2: Terminal List Table

Number	Name	Description	
		I2C	SPI
1, 2, 3, 4	IP+	Terminals for current being sensed; fused internally	
5, 6, 7, 8	IP-	Terminals for current being sensed; fused internally	
9	DIO_1/CS	Digital I/O 1	Chip Select (CS)
10	DIO_0/MOSI	Digital I/O 0	MOSI
11	SCL/SCLK	SCL	SCLK
12	SDA / MISO	SDA	MISO
13	VCC	Device power supply terminal	
14	GND	Device Power and Signal ground terminal	
15	VINN	Negative Input Voltage	
16	VINP	Positive Input Voltage	

ACS71020 Recommended Application Circuit

A resistor divider circuit shall be used to step down measured the voltage of the system. The voltage across VINP and VINN shall not exceed 275 mV as stated in the datasheet. This application example steps the voltage down to ± 250 mV for expected V_{peak} . The standard application schematic is shown in Figure 3. Refer to the ACS71020 device datasheet for more information.

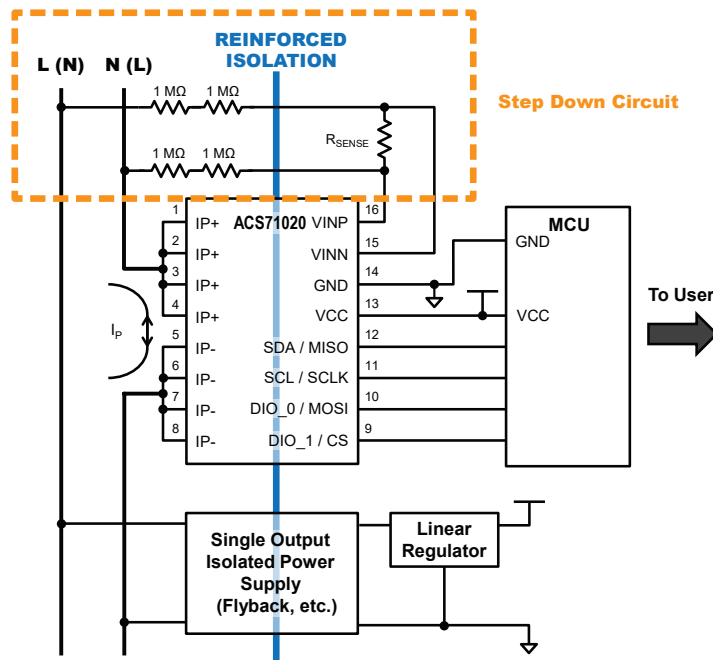

Figure 3: Recommended Application Circuit from Datasheet

Step Down Circuit

Figure 4 shows the step down application circuit in finer detail. The appropriate value for the sense resistor “R” shall be determined by the user as to not exceed 275 mV across VINP and VINN.

Figure 4: Step Down Circuit

Table 3 shows recommended resistor values for popular application voltages, and assumes the step down circuit in Figure 4.

Table 3: Recommended R_{SENSE} based on V_{RMS}

V_{RMS} (V)	V_{peak} (V)	Range of V_{IN} (V)	R Max (Ω)	R_{SENSE} Recommended (k Ω)
50	70.7	0.25	14194	13
100	141.4	0.25	7085	5.6
110	155.54	0.25	6440	5.1
120	169.68	0.25	5902	4.7
150	212.1	0.25	4720	3.9
220	311.08	0.25	3217	2.2
240	339.36	0.25	2949	1.8
