MAX96701

14-Bit GMSL Serializer with High-Immunity/Bandwidth Mode and Coax/STP Cable Drive

Compact 1.6Gbps Serializer with Crosspoint and CRC Protection of Video and Control Data for ADAS Applications

Description

The MAX96701 is a compact serializer in a 4mm x 4mm TQFN package especially suited for automotive camera applications. In high-bandwidth mode, the parallel-clock maximum is 116MHz for 12-bit linear or combined HDR data types.

The embedded control channel operates at 9.6kbps to 1Mbps in I²C mode, allowing programming of serializer, deserializer (SerDes), and camera registers independent of video timing.

For driving longer cables, the IC has programmable pre/deemphasis. Programmable spread spectrum is available on the serial output. The serial output meets ISO 10605 and IEC 61000-4-2 ESD standards. The supply range is 1.7V to 1.9V.

The MAX96701 is available in a 24-pin TQFN package with 0.5mm lead pitch, and operates over the -40°C to +115°C temperature range.
