The CR Magnetics line of Instrumentation Grade Electrical Current Transformers are available in either Commercial or ANSI Metering Class. The Commercial Class transformers are lower cost and well-suited for current monitoring applications. The ANSI Metering Class transformers are higher-cost units intended for power monitoring applications where high accuracy and minimum phase angle error are required. Twelve different window openings and eight different mounting styles along with numerous secondary ratios are available to meet most applications. This short form catalog shows an overview of our most popular 5 amp secondary transformers. Contact factory for different sizes or unique electrical requirements.

### Applications

Ammeters  
Energy Measurement  
Watt/VAR/Watthour Measurement  
Current Sensing Relays

### Features

Low Cost  
Core Secured via Epoxy Resin  
Hand Tuned Accuracy  
Common Ratios in Stock

### Regulatory Agencies

### BASIC SPECIFICATIONS

|                       |                         |
|-----------------------|-------------------------|
| Basic Accuracy        | 10% FS or Better (ANSI) |
| Thermal Drift         | 100 PPM/°C              |
| Operating Temperature | -20° C to +75° C        |
| Installation Category | CAT II                  |
| Pollution Degree      | 2                       |
| Insulation Voltage    | 3500 Vac/1min           |
| Frequency Range       | 50Hz - 400Hz            |
| Torque Spec on Studs  | 10 in/lb.               |

### CUSTOM OPTIONS

Ultra-Low Frequency to 20 Hz

1.0, 0.2, and 0.1 Amp Secondary Ratios
