BIDOS® P2433 Q

V105Q121A-850

850 nm Multi-Mode VCSEL Power Array
Designed for Sensor Field of Interest : 60° x 45°

Applications

- Access Control & Security

Features

- Package: QFN Package
- ESD: 2 kV acc. to ANSI/ESDA/JEDEC JS-001 (HBM, Class 2)
- Very small SMT package
- VCSEL power array
- High optical power
- IR Laser with photodiode

Ordering Information

| Type | Optical output power typ. P_{opt} | Ordering Code |
|---------------|---|---------------|
| V105Q121A-850 | 3 W | Q65113A5438 |

Depending on the mode of operation, these devices emit highly concentrated visible and non-visible light which can be hazardous to the human eye. Products which incorporate these devices must follow the safety precautions given in the “Notes” section.

Maximum Ratings

$T_A = 25\text{ °C}$

| Parameter | Symbol | | Values |
|---|----------------|------|------------------------------------|
| Operating temperature (refers to T_A ; $T_A = 85\text{ °C}$ with reduced efficiency) | T_{op} | min. | -20 °C |
| | | max. | 85 °C |
| Storage temperature | T_{stg} | min. | -40 °C |
| | | max. | 100 °C |
| Soldering temperature $t_{max} = 10\text{ s}$ | T_s | max. | 260 °C |
| ESD withstand voltage acc. to ANSI/ESDA/JEDEC JS-001 (HBM, Class 2) | V_{ESD} | max. | 2 kV |
| IR Laser | | | |
| Junction temperature | T_j | max. | 125 °C |
| Forward current pulsed $t_p \leq 500\text{ }\mu\text{s}$; $D = 0.01$ | $I_{F\ pulse}$ | max. | 6 A |
| Reverse voltage ⁵⁾ | V_R | | Not designed for reverse operation |
| Photodiode | | | |
| Reverse voltage ⁵⁾ | V_R | max. | 20 V |
| Breakdown voltage | V_{BR} | min. | 50 V |

Stresses beyond those listed under Absolute Maximum Ratings may cause permanent damage to the device.

Characteristics

$t_p = 300 \mu\text{s}$; $D = 0.05$; $T_A = 25 \text{ }^\circ\text{C}$

Notes

Depending on the mode of operation, these devices emit highly concentrated visible and non visible light which can be hazardous to the human eye. Products which incorporate these devices have to follow the safety precautions given in IEC 60825-1.

Subcomponents of this device contain, in addition to other substances, metal filled materials including silver. Metal filled materials can be affected by environments that contain traces of aggressive substances. Therefore, we recommend that customers minimize device exposure to aggressive substances during storage, production, and use. Devices that showed visible discoloration when tested using the described tests above did show no performance deviations within failure limits during the stated test duration. Respective failure limits are described in the IEC60810.

Disclaimer

Attention please!

The information describes the type of component and shall not be considered as assured characteristics. Terms of delivery and rights to change design reserved. Due to technical requirements components may contain dangerous substances.

For information on the types in question please contact our Sales Organization.

If printed or downloaded, please find the latest version on our website.

Packing

Please use the recycling operators known to you. We can also help you – get in touch with your nearest sales office. By agreement we will take packing material back, if it is sorted. You must bear the costs of transport. For packing material that is returned to us unsorted or which we are not obliged to accept, we shall have to invoice you for any costs incurred.

Product and functional safety devices/applications or medical devices/applications

Our components are not developed, constructed or tested for the application as safety relevant component or for the application in medical devices.

Our products are not qualified at module and system level for such application.

In case buyer – or customer supplied by buyer – considers using our components in product safety devices/ applications or medical devices/applications, buyer and/or customer has to inform our local sales partner immediately and we and buyer and /or customer will analyze and coordinate the customer-specific request between us and buyer and/or customer.

Glossary

- 1) **Typical Values:** Due to the special conditions of the manufacturing processes of semiconductor devices, the typical data or calculated correlations of technical parameters can only reflect statistical figures. These do not necessarily correspond to the actual parameters of each single product, which could differ from the typical data and calculated correlations or the typical characteristic line. If requested, e.g. because of technical improvements, these typ. data will be changed without any further notice.
- 2) **Testing temperature:** $T_A = 25^\circ\text{C}$ (unless otherwise specified)
- 3) **Tolerance of Measure:** Unless otherwise noted in drawing, tolerances are specified with ± 0.1 and dimensions are specified in mm.
- 4) **Tape and Reel:** All dimensions and tolerances are specified acc. IEC 60286-3 and specified in mm.
- 5) **Reverse Operation:** This product is intended to be operated applying a forward current within the specified range. Applying any continuous reverse bias or forward bias below the voltage range of light emission shall be avoided because it may cause migration which can change the electro-optical characteristics or damage the LED.
- 6) **Wavelength:** The wavelengths are measured with a tolerance of ± 1 nm.
- 7) **Brightness:** The brightness values are measured with a tolerance of $\pm 11\%$.
- 8) **Forward Voltage:** The forward voltages are measured with a tolerance of ± 0.1 V.
- 9) **Photocurrent:** The photocurrent values are measured (by irradiating the devices with a homogenous light source and applying a voltage to the device) with a tolerance of $\pm 11\%$.
