SEMI S2 Compliant EMO Switches and Switch Guards

# ø16mm XA Series / ø22mm XW Series SEMI Emergency Off (EMO) Switches

**New**

XA and XW series emergency stop switches are now available with EMO markings. When used in combination with switch guards ensures compliance to SEMI S2 standards.

## < Structure and Features >

### ø16mm XA Series

- World's First** • Up to four contacts
- Only 27.9 mm deep behind the panel for any number of contacts

### ø22mm XW Series

- World's Shortest** • Shortest for four-contact type
- Only 48.7 mm deep behind the panel for any number of contacts, reducing space.

### Safe Break Action

- World's First** When the contact block is detached from the operator, the NC contact opens (OFF).

Detaching the Contact Block

When the contact block is detached from the operator, the cam directly opens the NC main contacts (contacts are off).

### Direct Opening Action

All normally closed contact elements of an emergency stop devices shall have a direct opening action (positive opening action), according to annex K of IEC 60947-5-1. (IEC 60947-5-5; 5.2)

Achievement of contact separation (of a contact element) of the switch actuator through non-resilient members (for example not dependent upon springs) (IEC 60947-5-1; Annex K)

### Safety Lock Mechanism

The emergency stop signal shall be maintained until the emergency stop device is reset (disengaged). (IEC 60947-5-5; 6.2)

### Safety Potential Structure

**New**  
3rd-generation  
(Safety Potential Structure)

With the XA and XW emergency stop switches, the potential energy level of the latched status is lower than that of the normal status. In the event the contact block is damaged due to excessive shocks, the NC contacts will turn off, thus leading to safety by stopping the machine.

## About SEMI

SEMI is an international industry association whose member companies produce materials, equipment, and related technology for manufacturing semiconductor, flat panel display (FPD), and micro-electromechanical systems (MEMS) products. The SEMI safety guideline was published for the semiconductor industry and it is observed with the same importance as standards.

SEMI S2-0706, 12.1 describes as follows; "The equipment should have an 'emergency off' (EMO) circuit. The EMO actuator (e.g., button), when activated, should place the equipment into a safe shutdown condition, without generating any additional hazard to personnel or the facility." Because the semiconductor environment involves solvents and chemicals in many cases, some of which are toxic, interrupting the power source may cause secondary accidents. SEMI safety guideline requires the installation of an emergency off switch which disconnects only the part responsible for the hazardous situation, and maintains the functions of safety-related devices (e.g., smoke detectors, gas/water leak detectors, pressure measurement devices, etc.).

Emergency off buttons should be located or guarded to minimize accidental activation (SEMI S2-0706, 12.5.1). The emergency off button should be red and mushroom shaped. A yellow background for the EMO should be provided (SEMI S2-0706, 12.3).

- Location of EMO switches on semiconductor manufacturing equipment  
Acceptance criteria: controls should not be located above 1638 mm (64.5 in.) or below 838 mm (33 in.) (SEMI S8-0705, 9.1.2).
- No operation or regularly scheduled maintenance location should require more than 3 m (10 feet) travel to an EMO button (S2-0706, 12.5.2).

# ø16 XA Series SEMI EMO Switches

## ø16mm XA Series EMO Switches

**The World's First ø16 mm, 4-contact Emergency Stop Switch.**  
**Compact size—only 27.9 mm deep behind the panel.**

- Lead-free, RoHS compliant.
- The depth behind the panel is only 27.9 mm for 1 to 4 contacts.
- IDEC's original "Safe break action" ensures that the contacts open when the contact block is detached from the operator.
- 1 to 4NC main contacts and 1NO monitor contact
- Push-to-lock, Pull or Turn-to-reset operator
- Direct opening action mechanism (IEC60947-5-5, 5.2, IEC60947-5-1, Annex K)
- Safety lock mechanism (IEC60947-5-5, 6.2)
- Degree of protection IP65 (IEC60529)

Note 2: SEMI S2-0703, 12.5.1 compliant.

Note 3: SEMATECH Application Guide for SEMI S2-93, 12.4. compliant.

Note 4: Degree of protection IP65 applies to the combination of an emergency stop switch and an EMO switch guard.

Note 5: HW9Z-KG1, HW9Z-KG2, and HW9Z-KG3 can be used with ø29mm or ø40mm mushroom buttons. ø60mm jumbo mushroom buttons cannot be installed.

**Note:**

EMO switch guards have been designed for applications in semiconductor manufacturing equipment only. Do not use EMO switch guards with emergency stop switches which are installed on machine tools or food processing machines. (Machinery Directive of the European Commission and IEC 60204-1 require that emergency stop switches be installed in a readily accessible area, and the usage of switch guards is not permitted.)

## Panel Cut-out

•  $\varnothing 16$  mm

•  $\varnothing 22$  mm

When anti-rotation is not required or when the panel cut-out does not have anti-rotation recess, remove the projection using pliers.

## Installation

•  $\varnothing 16$  mm

To tighten the locking ring, use locking ring wrench MT-100 and tighten to a torque of 0.88 N-m.

•  $\varnothing 22$  mm

To tighten the locking ring, use locking ring wrench MW9Z-T1 and tighten to a torque of 2.0 N-m.

## ø16mm XA Series / ø22mm XW Series Emergency Stop Switches

### ø16mm XA Series

The world's first ø16mm, 4-contact emergency stop switch—only 27.9mm deep behind the panel.

- Contact: Main 1NC to 4NC, Monitor 1NO
- Rated Operating Current: Main contacts  
AC: 250V, 3A (resistive load)  
DC: 250V, 0.2A (resistive load)  
Monitor contacts  
AC: 250V, 0.6A (resistive load)  
DC: 250V, 0.2A (resistive load)
- Illumination Ratings: 24V AC/DC, 11 mA

### ø22mm XW Series

The world's first ø22mm, 4-contact emergency stop switch—only 48.7 mm deep behind the panel.

- Contact: Main 1NC to 4NC, Monitor 1NO to 2NO
- Rated Operating Current: Main contacts  
AC: 250V, 3A (resistive load)  
DC: 250V, 0.2A (resistive load)  
Monitor contacts  
AC: 250V, 0.6A (resistive load)  
DC: 250V, 0.2A (resistive load)
- Illumination Ratings: 24V AC/DC, 15 mA

## LW Series Flush Silhouette Switches

Flush bezel projects only 2 mm from front of the panel.

ø28mm round and 28mm square black plastic bezels. Round metal bezels are also available.

- ø25.3mm round panel cut-out, 24.5mm square panel cut-out.
- Collective mounting is possible.
- Separate type control units with a locking lever enable easy installation even when mounted collectively.
- Gold-clad silver or silver contacts.
- IP65 protection (IEC 60529)
- UL recognized and CSA certified. EN compliant.
