Metallized Polyester Film Capacitor

for 105°C (Electrical Appliance and Material Safety Law (Japan) approved for AC power source)

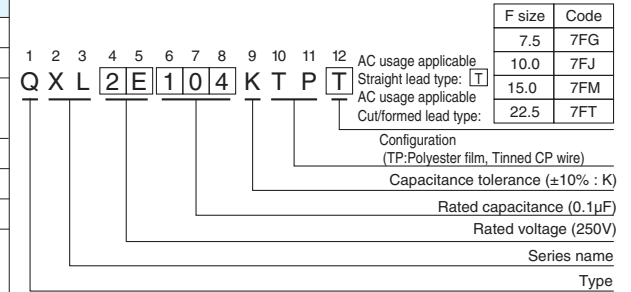

- Highly reliable and superior in high frequency applications, self-healing and non-inductive construction, using a dielectric of metallized polyester film.
- Finished by inner dipping, with liquid epoxy resin and outer coating with flame-retardant epoxy resin, those double coatings provide excellent humidity resistance.
- Designed in a small and compact size, but yet with higher capacitance, for high density mounting.
- Compliant to the RoHS directive (2011/65/EU,(EU)2015/863).
