

Microcontroller Supervisory Circuit with Push-Pull Output

Features

- Holds microcontroller in reset until supply voltage reaches stable operating level
- Resets microcontroller during power loss
- Precision monitoring of 3V, 3.3V and 5V systems
- 7 voltage trip points available
- Active low $\overline{\text{RESET}}$ pin (MCP809) or active high RESET (MCP810)
- Push-pull output
- Holds $\overline{\text{RESET}}$ /RESET for 350 ms (typical)
- $\overline{\text{RESET}}$ /RESET to V_{DD} = 1.0V
- Accuracy of ± 125 mV for 5V systems and ± 75 mV for 3V systems over temperature
- 45 μA typical operating current
- Temperature range:
 - Industrial (I): -40°C to $+85^{\circ}\text{C}$

DESCRIPTION

The Microchip Technology Inc. MCP809/810 is a voltage supervisory device designed to keep a microcontroller in reset until the system voltage has reached the proper level and stabilized. It also operates as protection from brown-out conditions when the supply voltage drops below a safe operating level. Both devices are available with a choice of seven different trip voltages and both have push-pull outputs. The MCP809 has a low active $\overline{\text{RESET}}$ pin and the MCP810 has a high active RESET pin. The MCP809/810 will assert the $\overline{\text{RESET}}$ /RESET signal whenever the voltage on the V_{DD} pin is below the trip-point voltage.

MCP809/810

1.0 ELECTRICAL CHARACTERISTICS

1.1 Maximum Ratings*

V_{DD} 7.0V
 All inputs and outputs w.r.t. V_{SS} -0.6V to V_{DD} +1.0V
 Storage temperature -65°C to +150°C
 Ambient temp. with power applied -65°C to +125°C
 ESD protection on all pins ≥ 2 kV

***Notice:** Stresses above those listed under “Maximum Ratings” may cause permanent damage to the device. This is a stress rating only and functional operation of the device at those or any other conditions above those indicated in the operational listings of this specification is not implied. Exposure to maximum rating conditions for extended periods may affect device reliability.

DC AND AC CHARACTERISTICS

| All parameters apply at the specified temp and voltage ranges unless otherwise noted. | | V _{DD} = 1.0 - 5.5V Industrial (I): -40°C to +85°C | | | | | |
|---|--|--|----------------------|-------|------|-------|---|
| Parameter | | Symbol | Min. | Typ. | Max. | Units | Test Conditions |

MCP809/810

2.0 APPLICATIONS INFORMATION

2.1 The Need for Supervisory Circuits

For many of today's microcontroller applications, care must be taken to prevent low power conditions that can cause many different system problems. The most common causes are brown-out conditions where the system supply drops below the operating level momentarily, and the second, is when a slowly decaying power supply causes the microcontroller to begin executing instructions without enough voltage to sustain SRAM and producing indeterminate results.

FIGURE 2-1: TYPICAL APPLICATION

2.2 Negative Going V_{DD} Transients

Many system designers implementing POR circuits are concerned about the minimum pulse width required to cause a reset. Figure shows typical transient duration vs. reset comparator overdrive for which the MCP809/810 will not generate a reset pulse. It shows that the farther below the trip point the transient pulse goes, the duration of the pulse required to cause a reset gets shorter. A 0.1 μF bypass cap mounted as close as possible to the V_{DD} pin provides additional transient immunity.

FIGURE 2-2: TYPICAL TRANSIENT RESPONSE

Effect of Temperature on Timeout Period (t_{RPU})

The timeout period (t_{RPU}) determines how long the device remains in the reset condition. This is controlled by an internal RC timer and is effected by both V_{DD} and temperature. The graph shown in Figure 2-3 shows typical response for different V_{DD} values and temperatures.

FIGURE 2-3: TYPICAL t_{RPU} VS. TEMPERATURE

FIGURE 2-4: I_{DD} VS. TEMPERATURE

3.0 PACKAGING INFORMATION

3.1 Package Marking Information

3-Lead Plastic Small Outline Transistor (SOT23)

Example:

SOT23 PARTS LABELING:

The table below identifies the first 2 characters (XX) in the 4-character field (XXNN) for marking of the 3-Lead SOT23 package.

| Mark | Part Number | Mark | Part Number |
|------|-----------------|------|-----------------|
| QR | MCP809T-270I/TT | RR | MCP810T-270I/TT |
| QS | MCP809T-300I/TT | RS | MCP810T-300I/TT |
| QT | MCP809T-315I/TT | RT | MCP810T-315I/TT |
| QU | MCP809T-450I/TT | RU | MCP810T-450I/TT |
| QV | MCP809T-460I/TT | RV | MCP810T-460I/TT |
| QW | MCP809T-475I/TT | RW | MCP810T-475I/TT |
| QZ | MCP809T-485I/TT | RZ | MCP810T-485I/TT |

| |
|---|
| <p>Legend: XX...X Customer specific information*</p> <p>YY Year code (last 2 digits of calendar year)</p> <p>WW Week code (week of January 1 is week '01')</p> <p>NNN Alphanumeric traceability code</p> |
|---|

| |
|--|
| <p>Note: In the event the full Microchip part number cannot be marked on one line, it will be carried over to the next line thus limiting the number of available characters for customer specific information.</p> |
|--|

- * Standard OTP marking consists of Microchip part number, year code, week code, and traceability code. For OTP marking beyond this, certain price adders apply. Please check with your Microchip Sales Office. For QTP devices, any special marking adders are included in QTP price.

ON-LINE SUPPORT

Microchip provides on-line support on the Microchip World Wide Web (WWW) site.

The web site is used by Microchip as a means to make files and information easily available to customers. To view the site, the user must have access to the Internet and a web browser, such as Netscape or Microsoft Explorer. Files are also available for FTP download from our FTP site.

Connecting to the Microchip Internet Web Site

The Microchip web site is available by using your favorite Internet browser to attach to:

www.microchip.com

The file transfer site is available by using an FTP service to connect to:

<ftp://ftp.microchip.com>

The web site and file transfer site provide a variety of services. Users may download files for the latest Development Tools, Data Sheets, Application Notes, User's Guides, Articles and Sample Programs. A variety of Microchip specific business information is also available, including listings of Microchip sales offices, distributors and factory representatives. Other data available for consideration is:

- Latest Microchip Press Releases
- Technical Support Section with Frequently Asked Questions
- Design Tips
- Device Errata
- Job Postings
- Microchip Consultant Program Member Listing
- Links to other useful web sites related to Microchip Products
- Conferences for products, Development Systems, technical information and more
- Listing of seminars and events

Systems Information and Upgrade Hot Line

The Systems Information and Upgrade Line provides system users a listing of the latest versions of all of Microchip's development systems software products. Plus, this line provides information on how customers can receive any currently available upgrade kits. The Hot Line Numbers are:

1-800-755-2345 for U.S. and most of Canada, and

1-480-792-7302 for the rest of the world.

013001

MCP809/810

READER RESPONSE

It is our intention to provide you with the best documentation possible to ensure successful use of your Microchip product. If you wish to provide your comments on organization, clarity, subject matter, and ways in which our documentation can better serve you, please FAX your comments to the Technical Publications Manager at (480) 792-4150.

Please list the following information, and use this outline to provide us with your comments about this Data Sheet.

To: Technical Publications Manager Total Pages Sent
RE: Reader Response
From: Name _____
Company _____
Address _____
City / State / ZIP / Country _____
Telephone: (____) _____ - _____ FAX: (____) _____ - _____

Application (optional):

Would you like a reply? Y N

Device: **MCP809/810** Literature Number: **DS11194C**

Questions:

1. What are the best features of this document?

2. How does this document meet your hardware and software development needs?

3. Do you find the organization of this data sheet easy to follow? If not, why?

4. What additions to the data sheet do you think would enhance the structure and subject?

5. What deletions from the data sheet could be made without affecting the overall usefulness?

6. Is there any incorrect or misleading information (what and where)?

7. How would you improve this document?

8. How would you improve our software, systems, and silicon products?

PRODUCT IDENTIFICATION SYSTEM

To order or obtain information, e.g., on pricing or delivery, refer to the factory or the listed sales office.

| <u>PART NO.</u> | <u>X</u> | <u>X</u> | <u>/XX</u> |
|---|---|--|------------|
| Device | RESET/ RESET V _{TRIP} Voltage | Temperature Range | Package |
| Device: | MCP809T: | Supervisory circuit with active low <u>RESET</u> output (tape & reel) | |
| | MCP810T: | Supervisory circuit with active high <u>RESET</u> output (tape & reel) | |
| <u>RESET/RESET</u> V _{TRIP} Voltage: | 270 = | 2.55 ≤ V _{TRIP} ≤ 2.70 | |
| | 300 = | 2.85 ≤ V _{TRIP} ≤ 3.00 | |
| | 315 = | 3.00 ≤ V _{TRIP} ≤ 3.15 | |

| | 460 = | 4.35 ≤ V _{TRIP} ≤ 4.60 | |
| | 475 = | 4.50 ≤ V _{TRIP} ≤ 4.75 | |
| | 485 = | 4.60 ≤ V _{TRIP} ≤ 4.85 | |
| Temperature Range: | I | = -40°C to +85°C | |
| Package: | TT | = SOT-23 (3 lead) (offered in tape & reel only) | |

Examples:

- MCP809T-270I/TT = Tape & Reel, V_{TRIP} range of 2.55V - 2.70V, Industrial Temp., SOT-23 package
- MCP810T-300/TT = Tape & Reel, V_{TRIP} range of 2.85V - 3.00V, Industrial Temp., SOT-23 package

Sales and Support

Data Sheets

Products supported by a preliminary Data Sheet may have an errata sheet describing minor operational differences and recommended workarounds. To determine if an errata sheet exists for a particular device, please contact one of the following:

- Your local Microchip sales office
- The Microchip Corporate Literature Center U.S. FAX: (480) 792-7277
- The Microchip Worldwide Site (www.microchip.com)

Please specify which device, revision of silicon and Data Sheet (include Literature #) you are using.

New Customer Notification System

Microchip received QS-9000 quality system certification for its worldwide headquarters, design and wafer fabrication facilities in Chandler and Tempe, Arizona in July 1999. The Company's quality system processes and procedures are QS-9000 compliant for its PICmicro® 8-bit MCUs, KEELoQ® code hopping devices, Serial EEPROMs and microperipheral products. In addition, Microchip's quality system for the design and manufacture of development systems is ISO 9001 certified.
