

High-performance  
microcontrollers  
with USB On-The-Go

## Kinetis® K2x USB MCU Family

The Kinetis K series MCU portfolio offers the broadest selection of pin-, peripheral- and software-compatible MCU families based on the ARM® Cortex®-M4 core.

### TARGET APPLICATIONS

- ▶ Barcode scanners
- ▶ Electronic point of sale (EPOS)
- ▶ Gaming accessories
- ▶ Health and wellness monitors
- ▶ Home and building automation
- ▶ Industrial/commercial sensor nodes
- ▶ IoT data concentrators
- ▶ Smart grid data concentrators
- ▶ Sports and activity wearables

### FEATURES

The Kinetis K2x MCU family based on the ARM® Cortex®-M4 core offers full and optional high-speed USB 2.0 On-The-Go (OTG), including options for crystal-less device functionality. Devices range from 32 KB to 2 MB of flash with up to 1 MB of SRAM and up to 2 USB controllers; packages include BGA, LQFP, QFN and WLCSP spanning from 32- to 210-pin options.

The Kinetis K2x MCU family is a scalable portfolio with various levels of integration and security. This portfolio offers a rich suite of analog, communication, timing and control peripherals to accommodate a wide range of requirements.

### COMPREHENSIVE ENABLEMENT SOLUTIONS

#### MCUXpresso software development kit (SDK)

- ▶ Pre-integrated, production-grade software including peripheral drivers, connectivity stacks, middleware and RTOS
- ▶ Usage examples for all drivers, stacks and middleware plus sample applications make getting started easy
- ▶ Customizable downloads based on MCU, evaluation board, and component selections

#### MCUXpresso integrated development environment (IDE)

- ▶ Feature-rich IDE based on Eclipse and GCC providing a powerful application development environment
- ▶ MCU-specific debugging views, code trace and profiling, multicore debugging, and more
- ▶ Supports Freedom, Tower® and your custom development boards with debug probes from NXP®, P&E Micro, and SEGGER
- ▶ Available in full-featured free (code size unlimited) and affordable professional editions (including professional support)

## MCUXpresso config tools

- ▶ Graphical pins tool configures the muxing, electrical properties and routing of pins; provides real-time feedback of I/O conflicts and code generation of pin muxing source and header files
- ▶ Graphical clocks tool configures the MCU clock tree system and provides guidance with system fine-tuning

## Ecosystem partner tools

- ▶ IAR Embedded Workbench®
- ▶ ARM Keil® microcontroller development kit
- ▶ ARM mbed™ IoT Device Platform
- ▶ SOMNIUM® DRT Cortex-M IDE
- ▶ Atollic® TrueSTUDIO®

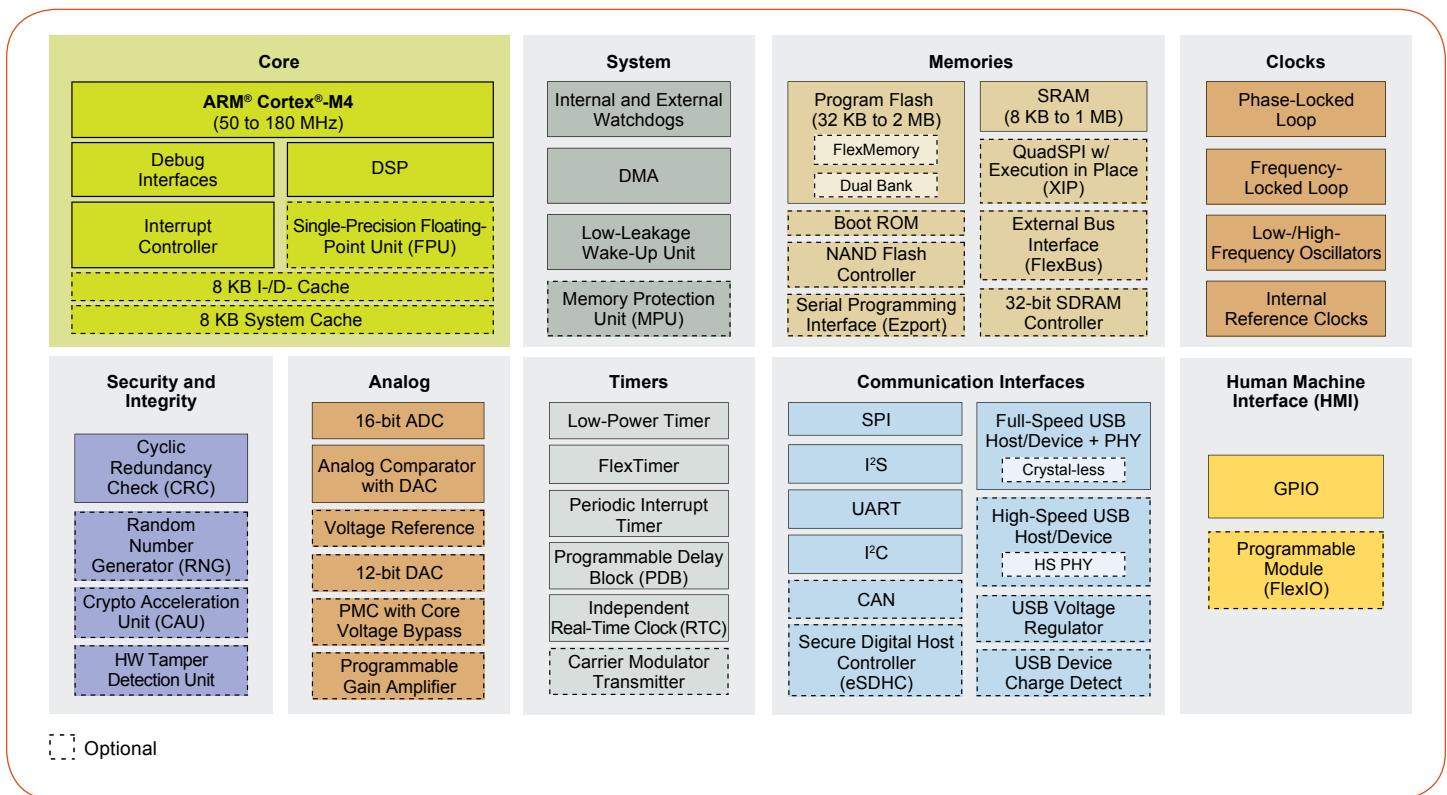

## Development hardware

- ▶ Low-cost Freedom development boards

## Kinetis Bootloader

- ▶ Common bootloader for all Kinetis MCUs
- ▶ In-system flash programming over a serial connection: erase, program, verify
- ▶ ROM or flash-based bootloader with open-source software and host-side programming utilities
