Shipping Quantities

Introduction

Micron encourages its customers to place orders in standard quantities (box or tape-and-reel, depending upon the product). This measure reduces waste, improves storage metrics, reduces shipping costs, optimizes handling efficiencies, and enables Micron and its customers to become more cost efficient in their industries. All Micron® semiconductor parts are shipped either in product-specific trays or tubes or product-specific tape-and-reel packages.

For Micron memory products, use the following charts to determine the order quantity best suited to your needs. For more part number information, refer to Micron’s [Part Numbering Guides](#).

Primary Box Dimensions

Table 1 provides the dimensions of the various boxes used for packaging trays and tape-and-reel carriers populated with Micron’s semiconductor components. Box dimensions listed are nominal measurements. The actual physical dimensions of individual boxes may vary slightly.

Table 1: Primary Box Dimensions

Type	L x W x H (in)
Tray box	14.63 x 7.75 x 4.50
Tape-and-reel box	14.375 x 13.500 x 2.50
Tube box	NYA

- Notes:
1. For N25Q product, the last character of the part number represents the packing media: E = tray, F = tape-and-reel, and G = tube. For M25Px and M45PE products, if the second to last character of the part number is T, the packing media = tape-and-reel; if that space is blank, the part type determines packing media: SO = tube, MLP and BGA = tray. See also CSN-16, "Packaging Procedures."
 2. NYA = not yet available; "-" = not applicable.
 3. 13-inch reel.
 4. Tape width x pitch.
 5. Other taping options may exist; contact Flash Marketing for details.
