

THE DATASHEET OF NC2EBD-P-DC24V

4 Form C Flat type

2 Form C Flat type

4 Form C Slim type
(PC board)

2 Form C Slim type
(PC board)

FEATURES

1. Compact, slim design

Use of high-performance flat electromagnetic design achieves 10.9 mm .429 inch profile, flat type thin package. Slim type, with width of 11.2 mm .441 inch, enables high-density mounting on PC boards.

2. High reliability

Provides stable contact pressure needed for card lift-off contact driver method. The use of Ac clad twin contacts provides stable contact resistance and ensures high contact reliability.

3. Compatible with all major safety standards

UL and CSA certified, and complies with Japanese Electrical Appliance and Material Control Law.

TYPICAL APPLICATIONS

1. Information processing and telecom equipment such as computers and terminal devices.

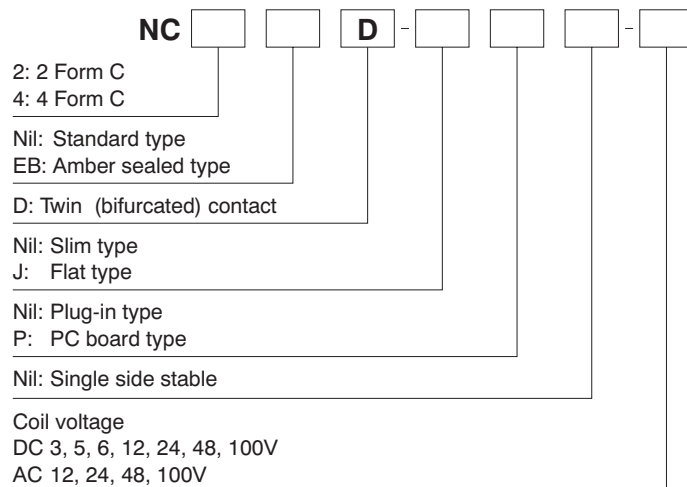

2. Gas hot air heating equipment and air conditioners.

3. Timer, temperature controller and other equipment that requires form factor reduction.

4. Transmission and measuring devices such as facsimile machines and electronic counting devices.

5. Control panels for industrial equipment such as machine tools, factory automation devices, and NC machines.

ORDERING INFORMATION

- Notes: 1. UL/CSA approved type is standard.
2. Amber sealed types are sealed and filled with inert gas (nitrogen gas).
Sealed construction with terminals, case and base sealed shut with sealing resin.

TYPES

<Standard type>

1. Flat type (PC board terminal)

| Contact arrangement | Nominal coil voltage | Single side stable |
|---------------------|----------------------|--------------------|
| | | Part No. |
| 2 Form C | 12V AC | NC2D-JP-AC12V |
| | 24V AC | NC2D-JP-AC24V |
| | 48V AC | NC2D-JP-AC48V |
| | 100V AC | NC2D-JP-AC100V |
| | 3V DC | NC2D-JP-DC3V |
| | 5V DC | NC2D-JP-DC5V |
| | 6V DC | NC2D-JP-DC6V |
| | 12V DC | NC2D-JP-DC12V |
| | 24V DC | NC2D-JP-DC24V |
| | 48V DC | NC2D-JP-DC48V |
| 100V DC | NC2D-JP-DC100V | |
| 4 Form C | 12V AC | NC4D-JP-AC12V |
| | 24V AC | NC4D-JP-AC24V |
| | 48V AC | NC4D-JP-AC48V |
| | 100V AC | NC4D-JP-AC100V |
| | 3V DC | NC4D-JP-DC3V |
| | 5V DC | NC4D-JP-DC5V |
| | 6V DC | NC4D-JP-DC6V |
| | 12V DC | NC4D-JP-DC12V |
| | 24V DC | NC4D-JP-DC24V |
| | 48V DC | NC4D-JP-DC48V |
| 100V DC | NC4D-JP-DC100V | |

Standard packing: Carton: 20 pcs.; Case: 200 pcs.

2. Slim type

1) Plug-in type

| Contact arrangement | Nominal coil voltage | Single side stable |
|---------------------|----------------------|--------------------|
| | | Part No. |
| 2 Form C | 12V AC | NC2D-AC12V |
| | 24V AC | NC2D-AC24V |
| | 48V AC | NC2D-AC48V |
| | 100V AC | NC2D-AC100V |
| | 3V DC | NC2D-DC3V |
| | 5V DC | NC2D-DC5V |
| | 6V DC | NC2D-DC6V |
| | 12V DC | NC2D-DC12V |
| | 24V DC | NC2D-DC24V |
| | 48V DC | NC2D-DC48V |
| 100V DC | NC2D-DC100V | |
| 4 Form C | 12V AC | NC4D-AC12V |
| | 24V AC | NC4D-AC24V |
| | 48V AC | NC4D-AC48V |
| | 100V AC | NC4D-AC100V |
| | 3V DC | NC4D-DC3V |
| | 5V DC | NC4D-DC5V |
| | 6V DC | NC4D-DC6V |
| | 12V DC | NC4D-DC12V |
| | 24V DC | NC4D-DC24V |
| | 48V DC | NC4D-DC48V |
| 100V DC | NC4D-DC100V | |

Standard packing: Carton: 20 pcs.; Case: 200 pcs.

2) PC board type

| | Electrical (resistive load) | Standard: Min. 10 ⁵ (5A 250V AC), Min. 5×10 ⁵ (5A 30V DC) Amber: Min. 10 ⁵ (3A 250V AC), Min. 5×10 ⁵ (5A 30V DC) | | Standard: Min. 10 ⁵ (4A 250V AC), Min. 5×10 ⁵ (5A 30V DC) Amber: Min. 10 ⁵ (2A 250V AC), Min. 5×10 ⁵ (5A 30V DC) | |
| Conditions | Conditions for operation, transport and storage*4 (Not freezing and condensing at low temperature) | -40°C to +70°C -40°F to +158°F (Max.48V DC), -40°C to +55°C -40°F to +131°F (100V DC) | -40°C to +60°C -40°F to +140°F*5 | -40°C to +55°C -40°F to +131°F | -40°C to +40°C -40°F to +104°F |
| | | Max. Operating speed | 50 cps | | 50 cps |
| | Unit weight | 16 g .56 oz | | 18 g .63 oz | |

Notes: *

*1 This value can change due to the switching frequency, environmental conditions, and desired reliability level, therefore it is recommended to check this with the actual load.

*2. 100V DC: 740mW

*3. For the AC type, the operate and release time differs depending on the phase of the input and cutoff times.

*4. Refer to "6. Usage, Storage and Transport Conditions" in [AMBIENT ENVIRONMENT section in Relay Technical Information](#).

*5. 100V DC: -40°C to +40°C -40°F to +104°F

NOTES

1. Because the NC relay is polarized, the positive “+” and negative “-” connections to the coil should be done as indicated on the wiring diagram. If connected incorrectly, it may malfunction or fail to operate.
2. As a 2 coil latching series 4 Form C are for intermittent operation only. Power should be applied to coils continuously for no more than two minutes. See page 30 for general cautions to be observed regarding latching relays.
3. To maintain insulation between coils of 2 coil latching series, terminals ⑤ and ⑥ for flat series, and terminals ③ and ④ for vertical series should be connected to provide common return.

Figure 1 shows wiring that complies with Japanese Electrical Appliance and Material Control Law stipulations for power supply circuits. At the copper traces on PC boards, between terminals ③ and ④, as shown in Figure 2, apply epoxy resin (to thickness of more than 3 mm) or similarly adhesive to provide insulation.

4. 2 coil latching series 4 Form C are for intermittent operation only. Power should be applied to coils continuously for no more than two minutes. See page 30 for general cautions to be observed regarding latching relays.
5. While NC relays can be used with any transmission-wave current to their operation, due to slight weakening of the force of magnetic attraction, decreased resistance to vibration and shock should be taken into account.
6. The current that energizes the coil in an NC relay is AC type. Because the AC sine waveform is distorted, when testing, it is essential to use a measuring device that can properly characterize the distorted waveform. The operating power of the coil in the 100 V AC 4 Form C type is relatively higher than other NC types of AC relay and consequently, the total current applied through all the contacts should be kept below 10 A.
7. The AC type NC relay has a special magnetic design. As a result, once the a-side contacts have switched, the b-side contacts may once again go into a temporary ON state depending on the coil inrush phase. To ensure that this phenomenon does not occur, it is necessary to carry out sufficient practical testing with relays installed in actual devices.

8. When designing top and bottom view schematic diagrams, note that:
 - 1) “Top view” wiring diagram is indicated for the flat series because terminals can be seen from above.
 - 2) “Bottom view” schematic diagram is indicated for the vertical series because terminals cannot be seen from above.

9. Cautions for close proximity mounting
When using slim series in close proximity, mount all relays facing the same direction. Different mounting directions may cause change in the relay characteristics because NC relays are polarized.

For Cautions for Use, see [Relay Technical Information](#).

ACCESSORIES

NC RELAYS

(sockets and terminal sockets)

FEATURES

• **Socket**

1) The vertical (slim) type with solder terminals has a retainer, which enables snap-in fixing on chassis, panels, and similar locations. Because the sockets for both solder terminals and PC boards firmly fix the relay at the time of insertion, once snapped in, spring clips are unnecessary.

2) For the flat type, pull up the hinged clasps in the direction of the arrows shown in the drawing after inserting the relay. Spring clips are unnecessary.

NC2 Flat type socket

NC4 Flat type socket

NC2 Slim type socket

NC4 Slim type socket

SPECIFICATIONS (common)

| Item | Specifications |
|-------------------------------|---|
| Max. continuous current | Slim type: 5A 250V AC, Flat type: 5A 250V AC |
| Initial breakdown voltage | 2,000 V AC (Except for coil to coil of L2 type: 1,500 V AC) |
| Initial insulation resistance | Min. 100MΩ (at 500V DC megger) |
| Heat resistance | 150°C 302°F for 1 hour |

Note: Do not insert or remove relays while in the energized condition.

DIMENSIONS (Unit: mm inch)

**Flat type socket
for PC board**
NC2-JPS
NC2-JPL2S

External dimensions

Terminal portion

PC board pattern

Note: Terminals 3 and 6 excluded for NC2-JPS.

**Flat type socket
for PC board**
NC4-JPS
NC4-JPL2S

External dimensions

Terminal portion

PC board pattern

Note: Terminals 3 and 6 excluded for NC4-JPS.

**Slim type
DIN terminal socket**
NC2-SFD

External dimensions

Mounting hole diagram

Schematic

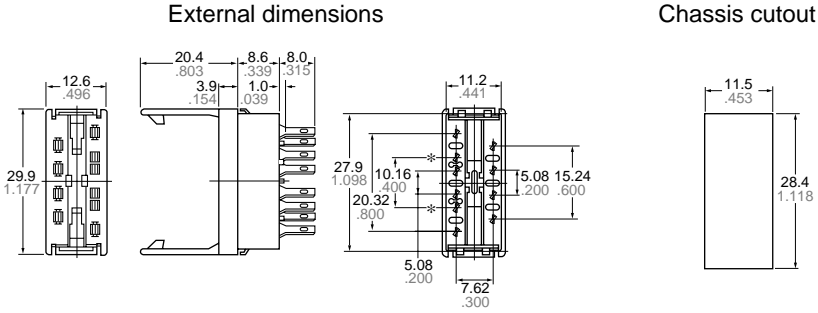

(Retaining springs are included with the DIN terminal socket.)

*To prevent damage or distortion, when tightening fixing screws, the optimum torque range should be 0.49 to 0.69 N·m, (5 to 7 kgf·cm).

NC

Slim type socket for solder terminal

NC2-SS
NC2-L2S

- Notes: 1. Suitable chassis thickness is 1.0 to 2.0 mm .039 to .079 inch.
2. Once the socket is inserted from above into the mounting holes, the relay will snap in to clips rising from either side at (A) and (B) by pushing.

Note: NC2-SS is as shown in the diagram above except that terminals marked with "*" are not present.

Slim type socket for solder terminal

NC4-SS
NC4-L2S

- Notes: 1. Suitable chassis thickness is 1.0 to 2.0 mm .039 to .079 inch.
2. Once the socket is inserted from above into the mounting holes, the relay will snap in to clips rising from either side at (A) and (B) by pushing.

Note: NC4-SS is as shown in the diagram above except that terminals marked with "*" are not present.

Slim type socket for PC board

NC2-PS
NC2-L2P

Note: NC2-PS is as shown in the diagram at left except that terminals marked with "*" are not present.

Slim type socket for PC board

NC4-PS
NC4-L2P

Note: NC4-PS is as shown in the diagram at left except that terminals marked with "*" are not present.

Vertical (Slim) type wrapping socket

NC2-WS
NC2-L2WS

External dimensions

Terminal cross section

Chassis cutout

Note: NC2-WS is as shown in the diagram above except that terminals marked with " * " are not present.

Vertical (Slim) type wrapping socket

NC4-WS
NC4-L2WS

External dimensions

Chassis cutout

Note: NC4-WS is as shown in the diagram above except that terminals marked with " * " are not present.

NOTES

1. Soldering should be done quickly to avoid damaging the thermoplastic body.
2. For solder terminal types, connect terminals as shown in the diagram at
