PE-68026QNL**

SURFACE MOUNT 10BASE-T INTERFACE MODULES

Fully Integrated for Adapter, Hub, and Motherboard Applications

- Available in enhanced or standard design versions
- Low profile surface mount package
- E2000 series part numbers designed for AMD, DEC, LSI, Motorola, and National transceivers
- RoHS peak reflow temperature rating 245°C

Electrical Specifications @25°C / Operating Temperature 0°C to +70°C

NOTE: Part numbers indicated with an asterisk (*) are enhanced performance parts. All transmit turns ratios are 1:1, except the E2009 which is 1: 1.414. For the PE-680XXNL part series, the receive and transmit sides meet IEEE 802.3i 1993 specifications, while transmit side is enhanced for FCC/VDE Class B system emissions requirement. Specifications reflect filter sections. Additional attenuation is due to predistortion resistors.

Mechanical

Schematic

E2009QNL, PE-68056NL

Turns Ratio for Transmit: PE-68056NL is 1:1; E2009QNL is 1:1.414.

NOTE: The PE-68056NL is designed for use with most transceivers requiring a turns ratio of 1:1 on transmit. The E2009QNL is designed for use with DEC and most other transceivers requiring a turns ratio of 1:1.414 on transmit.

Typical Applications Circuit

E2009QNL, PE-68056NL

Application Notes

Each module in this application contains low pass filters, isolation transformers, and common mode chokes. These components provide impedance matching, equipment isolation, and EMI suppression to comply with IEEE 802.3 requirements. The E2001QNL, E2003QNL, E2007QNL, PE-68025QNL and PE-68027QNL also provide the necessary data and pre-emphasis resistors recommended by most transceiver manufacturers.

User compliance with FCC/CSPR Class B requirements can be achieved by applying rigorous design guidelines to suppress noise mechanisms. Attention to high frequency signal paths, proper PCB grounding techniques, and component placement are critical. Pins 5 and 12, when grounded, provide noise return paths. For PE-68025QNL, PE-68026NL, and PE-68027QNL, one of these pins (typically pin 12) must be decoupled with a bypass capacitor. The E2001QNL, E2003QNL, E2007QNL, E2009QNL, and PE-68056NL do not require the bypass capacitor, and pins 5 and 12 may be connected directly to ground.

Recommended module orientation with respect to the RJ-45 connector is illustrated in each application circuit. Output pins 6 through 11 should be routed with short, matched traces to the connector for optimum EMI performance.

Surface mount devices manufactured by Pulse are designed to meet all published specifications after exposure to surface mount soldering temperatures. The products in this data sheet are transfer molded or open header in IC-style packaging, making them robust enough to withstand convection and infrared reflow solder temperatures up to 245°C. In addition, compliant leads provide excellent solder-joint reliability with a coplanarity of ±.002" (0,05mm).

For Tape & Reel orders, please add the suffix "T" to the end of the part number (i.e. PE-68025QNLT).
