## 1000W Surface Mount Transient Voltage Suppressor

### RoHS 1KSMBJ Series

The 1KSMBJ range of surface mount protectors utilizes the proven glass passivated technology used in many Littelfuse product portfolios. Rated at 1000 watts (10 x 1000  $\mu$ s double exponential waveform), the 1KSMBJ bridges the gap left by traditional types rated at 600 watts and 1500 watts, suiting many applications where both power handling and size are paramount. The extremely fast turn-on time (less than one pico second), coupled with the low clamping factor and low on-state impedance, make this range ideal for the protection of today's circuits. Our specially selected range of voltages has been chosen to fulfill optimum protection for use in automotive and telecom applications.

#### FEATURES

- RoHS Compliant
- Available in breakdown voltages from 6.8v. to 160v; specially designed for automotive applications
- Response time:  $1 \times 10^{-12}$ secs (theoretical)
- Glass passivated junction
- Offers high-surge rating in compact package: bridges the gap between 600W and 1.5KW
- Forward surge rating:  
100A 8.3ms single half sine wave
- 100% tested
- Operating temperature: -55°C to +150°C

#### Mechanical Specifications:

<b>Weight:</b>	0.093 grammes (approx)
<b>Case:</b>	DO-214AA Outline moulded plastic over glass passivated junction. UL 94 V-0 rated
<b>Terminals:</b>	Solderable to MIL-STD-750 Method 2026
<b>Solderable Leads:</b>	23°C for 10 seconds
<b>Marking:</b>	Cathode band, device code logo
<b>Standard Packaging:</b>	Supplied on reels of 3000 pieces. Tape width 12mm. Follows requirements of EIA 481-1

**Agency Approvals:** Recognized under the Components Program of Underwriters Laboratories.

**Agency File Numbers:** E128662

#### ORDERING INFORMATION

Tape and reeled (3000 pcs)

#### Notes:

1. All testing is performed at  $T_{amb} = 25^\circ C$  (+/-  $3^\circ C$ )
2.  $B_V$  is measured using a pulse of 20 milliseconds or less
3.  $I_R$  is doubled for Bi-directional devices only with  $V_R$  equal or less than 10 volts
4. Peak Pulse Current is quoted @ 10/1000  $\mu sec$
5. All parameters are stated as tested on a FET Tester Model 3400
6. Devices are uni-directional.  $V_f$  is not specified.
