## Characteristics

### <APPLICATION NOTES>

- Prohibition ripple charging** : A ripple (high frequency fluctuation of voltage) in the charge voltage extremely lowers the capacitor performance. Be sure to charge capacitors with a stable voltage.
- Charge voltage** : The age deterioration of the capacitor depends on the charge voltage. The age deterioration is accelerated as charge voltage goes higher.
- Usage environment** : Aging degradation of the capacitor varies depending on the usage environment (temperature and humidity). Contact us for further details.
