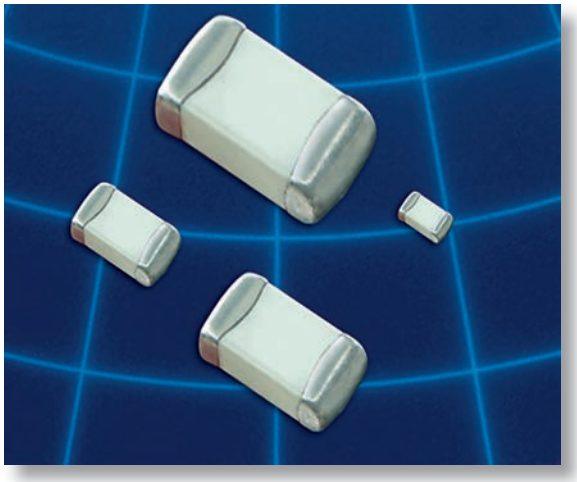
Multi-Layer High-Q Capacitors



These lines of multilayer capacitors have been developed for High-Q and microwave applications.

• The S-Series (R07S, R14S, R15S) capacitors give an ultra-high Q performance, and exhibit NP0 temperature characteristics.

• The L-Series (R05L) capacitors give mid-high Q performance, and exhibit NP0 temperature characteristics.

• The E-Series (S42E, S48E, S58E) capacitors give excellent high-Q performance from HF to Microwave frequencies.
Typical uses are high voltage, high current applications. They are offered in chip (Ni barrier or Non-Magnetic Pt.-Ag) or in Non-Magnetic leaded form.

• RoHS compliance is standard for all unleaded parts (see termination options box).

• Automotive versions (AEC-Q200) of R05L, R07S, R14S, R15S, and S42E series are available on request
