

**THE DATASHEET OF
LMV715IDBVRG4**

FEATURES

- 2.7-V and 5-V Performance
- Low Offset Voltage . . . 0.4 mV Typ, 3 mV Max
- Input Common-Mode Range . . . 200 mV Beyond the Rails
- Rail-to-Rail Swing Into 600 Ω
- Gain Bandwidth . . . 5 MHz Typ
- Slew Rate . . . 5 V/ μ s Typ
- Turn-On Time From Shutdown . . . <10 μ s
- Shutdown Current . . . 0.2 μ A Typ
- Space-Saving Packages
 - SOT-23-5/6
 - SC-70

APPLICATIONS

- Wireless Phones, Mobile Phones, PDAs
- GSM/TDMA/CDMA Power Amp Control
- AGC, RF Power Detectors
- Temperature Compensation
- Wireless LANs
- Bluetooth
- HomeRF

DESCRIPTION/ORDERING INFORMATION

The LMV710, LMV711, and LMV715 are single BiCMOS operational amplifiers designed to meet the demands of low power, low cost, and small size required by battery-powered portable electronics. These devices have an input common-mode voltage range that exceeds the rails, rail-to-rail output, and high output-current drive. The devices offer a bandwidth of 5 MHz and a slew rate of 5 V/ μ s.

On the LMV711 and LMV715, a separate shutdown pin can be used to disable the device and reduce the supply current to 0.2 μ A typical. The device features a turn-on time of less than 10 μ s. It is an ideal solution for power-sensitive applications, such as cellular phones, pagers, palm computers, etc.

The LMV710I, LMV711I, and LMV715I are characterized for operation from -40°C to 85°C .

ORDERING INFORMATION

T _A	PACKAGE ⁽¹⁾		ORDERABLE PART NUMBER	TOP-SIDE MARKING ⁽²⁾
-40°C to 85°C	SOT-23-5 – DBV	Reel of 3000	LMV710IDBVR	RB4_
	SC-70 – DCK	Reel of 3000	LMV710IDCKR	RE_
	SOT-23-6 – DBV	Reel of 3000	LMV711IDBVR	RB5_
	SC-70 – DCK	Reel of 3000	LMV711IDCKR	RF_
	SOT-23-6 – DBV	Reel of 3000	LMV715IDBVR	4B9_
	SC-70 – DCK	Reel of 3000	LMV715IDCKR	RL_

(1) Package drawings, standard packing quantities, thermal data, symbolization, and PCB design guidelines are available at www.ti.com/sc/package.

(2) DBV/DCK: The actual top-side marking has one additional character that designates the assembly/test site.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

LMV710, LMV711, LMV715
SINGLE LOW-POWER RRIO OPERATIONAL AMPLIFIERS
WITH HIGH OUTPUT CURRENT DRIVE AND SHUTDOWN

SLOS463A—APRIL 2005—REVISED JULY 2005

SYMBOL (EACH AMPLIFIER)

SIMPLIFIED SCHEMATIC

Absolute Maximum Ratings⁽¹⁾

over operating free-air temperature range (unless otherwise noted)

		MIN	MAX	UNIT	
$V_{CC+} - V_{CC-}$	Supply voltage ⁽²⁾		6	V	
V_{ID}	Differential input voltage ⁽³⁾		±Supply voltage	V	
V_I	Input voltage (either input)	$V_{CC-} - 0.4$	$V_{CC+} + 0.4$	V	
V_O	Output voltage	$V_{CC-} - 0.4$	$V_{CC+} + 0.4$	V	
I_I	Input current ⁽⁴⁾		±10	mA	
θ_{JA}	Package thermal impedance ⁽⁵⁾⁽⁶⁾	DBV package	5 pin	206	°C/W
			6 pin	165	
		DCK package	5 pin	252	
			6 pin	259	
T_J	Operating virtual junction temperature		150	°C	
T_{stg}	Storage temperature range	-65	150	°C	

- (1) Stresses beyond those listed under “absolute maximum ratings” may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under “recommended operating conditions” is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
- (2) All voltage values (except differential voltages and V_{CC} specified for the measurement of I_{OS}) are with respect to the network GND.
- (3) Differential voltages are at IN+ with respect to IN-.
- (4) Excessive input current will flow if a differential input voltage in excess of approximately 0.6 V is applied between the inputs unless some limiting resistance is used.
- (5) Maximum power dissipation is a function of $T_J(\text{max})$, θ_{JA} , and T_A . The maximum allowable power dissipation at any allowable ambient temperature is $P_D = (T_J(\text{max}) - T_A)/\theta_{JA}$. Operating at the absolute maximum T_J of 150°C can affect reliability.
- (6) The package thermal impedance is calculated in accordance with JESD 51-7.

SINGLE LOW-POWER RRIO OPERATIONAL AMPLIFIERS

WITH HIGH OUTPUT CURRENT DRIVE AND SHUTDOWN

SLOS463A–APRIL 2005–REVISED JULY 2005

Electrical Characteristics

 $V_{CC+} = 2.7\text{ V}$, $V_{CC-} = \text{GND}$, $V_{IC} = 1.35\text{ V}$, and $R_L > 1\text{ M}\Omega$ (unless otherwise noted)

PARAMETER		TEST CONDITIONS		T_A	MIN	TYP	MAX	UNIT	
V_{IO}	Input offset voltage	$V_{IC} = 0.85\text{ V}$ and 1.85 V		25°C		0.4	3	mV	
				–40°C to 85°C			3.2		
I_{IB}	Input bias current			25°C		4		pA	
CMRR	Common-mode rejection ratio	$0 \leq V_{IC} \leq 2.7\text{ V}$		25°C	50	75		dB	
				–40°C to 85°C	45				
k_{SVR}	Supply-voltage rejection ratio	$2.7\text{ V} \leq V_{CC+} \leq 5\text{ V}$, $V_{IC} = 0.85\text{ V}$		25°C	70	110		dB	
				–40°C to 85°C	68				
		$2.7\text{ V} \leq V_{CC+} \leq 5\text{ V}$, $V_{IC} = 1.85\text{ V}$		25°C	70	95			
				–40°C to 85°C	68				
V_{ICR}	Common-mode input voltage range	CMRR $\geq 50\text{ dB}$		25°C	–0.2 to 2.9	–0.3 to 3		V	
I_{OS}	Output short circuit current ⁽¹⁾	Sourcing $V_O = 0$		25°C	15	28		mA	
				–40°C to 85°C	12				
		Sinking $V_O = 5\text{ V}$		25°C	25	40			
				–40°C to 85°C	22				
V_O	Output voltage	$R_L = 10\text{ k}\Omega$ to 1.35 V		V_{OH}	25°C	2.62	2.68	V	
					–40°C to 85°C	2.6			
				V_{OL}	25°C		0.01		0.12
					–40°C to 85°C				0.15
		$R_L = 600\ \Omega$ to 1.35 V		V_{OH}	25°C	2.52	2.55		
					–40°C to 85°C	2.5			
				V_{OL}	25°C		0.05		0.23
					–40°C to 85°C				0.3
$V_{O(SD)}$	Output voltage level in shutdown mode	LMV711 only		25°C		50	200	mV	
$I_{O(SD)}$	Output leakage current in shutdown mode	LMV715 only		25°C		1		pA	
$C_{O(SD)}$	Output capacitance in shutdown mode	LMV715 only		25°C		32		pF	
I_{CC}	Supply current	ON mode		25°C		1.22	1.7	mA	
		–40°C to 85°C					1.9		
A_V	Large-signal voltage gain	Sourcing $R_L = 10\text{ k}\Omega$, $V_O = 1.35\text{ V}$ to 2.3 V		25°C	80	115		dB	
				–40°C to 85°C	76				
		Sinking $R_L = 10\text{ k}\Omega$, $V_O = 0.4\text{ V}$ to 1.35 V		25°C	80	113			
				–40°C to 85°C	76				
		Sourcing $R_L = 600\ \Omega$, $V_O = 1.35\text{ V}$ to 2.2 V		25°C	80	110			
				–40°C to 85°C	76				
		Sinking $R_L = 600\ \Omega$, $V_O = 0.5\text{ V}$ to 1.35 V		25°C	80	100			
				–40°C to 85°C	76				
SR ⁽²⁾	Slew rate			25°C		5		V/ μs	
GBWP	Gain bandwidth product			25°C		5		MHz	
Φ_m	Phase margin			25°C		60		deg	
$T_{(on)}$	Amplifier turn-on time			25°C		<10		μs	

(1) Shorting the output to either supply rails will adversely affect reliability.

(2) Number specified is the slower of the positive and negative slew rates.

Electrical Characteristics (continued)
 $V_{CC+} = 2.7\text{ V}$, $V_{CC-} = \text{GND}$, $V_{IC} = 1.35\text{ V}$, and $R_L > 1\text{ M}\Omega$ (unless otherwise noted)

PARAMETER	TEST CONDITIONS	T_A	MIN	TYP	MAX	UNIT
$\overline{\text{SHDN}}$ Shutdown pin voltage range	$V_{(\text{ON})}$	25°C	2.4 to 2.7	1.5 to 2.7		V

(1) The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSOLETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

(5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

(6) Lead/Ball Finish - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead/Ball Finish values may wrap to two lines if the finish value exceeds the maximum column width.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have **not** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
