Amazing Things Happen

When Great Things Connect

More than a Century of Connections

ITT Cannon is a leading global manufacturer of interconnect solutions serving international customers in the aerospace and defense, industrial, transportation and medical end markets. Whether delivering critical specs to aircraft pilots, streaming data through communications satellites, or enabling ultrasound equipment to give expectant parents a first look at their unborn child, ITT Cannon connects the world's most important information with those who need it. Since 1915, Cannon products have been used in a history of "firsts." From the first "talking" movie to the first man on the moon, Cannon has set the standard for reliable, harsh environment interconnect solutions. Today we proudly continue our legacy of innovation with a goal to connect the world and inspire the successes of the next century—because amazing things happen when great things connect.

The ITT Cannon Difference

- World-class design, engineering & manufacturing capabilities
- A commitment to quality at every touch point
- Global product reach with local customer service & support
- Unrivaled customization experience
- An innovative & trusted business partner

About ITT

ITT is a diversified leading manufacturer of highly engineered critical components and customized technology solutions for the energy, transportation and industrial markets. Building on its heritage of innovation, ITT partners with its customers to deliver enduring solutions to the key industries that underpin our modern way of life. ITT is headquartered in White Plains, N.Y., with employees in more than 35 countries and sales in approximately 125 countries. For more information, visit ITT.com

Industrial

ITT Cannon's portfolio of high performance interconnects is one of the most extensive in the industry, offering a wide range of custom and off-the-shelf connectors and cable assemblies for applications in the Commercial Aerospace, Military & Defense, Transportation, Industrial and Medical end markets. For more details, visit ITTCannon.com.

Microminiature Interconnect Solutions

Ultra lightweight, space-saving connectors and cable assemblies for unmatched performance & reliability in the harshest environments

ITT Cannon is your one-stop source for the design and manufacture of Microminiature solutions for the high performance connector market.

Offering one of the broadest selections of standard and custom Microminiature products available, our versatile portfolio includes a wide range of shell styles and configurations including rectangular, circular, quick disconnect, filter, hermetic, mixed signal packages and strip-style.

Each one features our Cannon-engineered Micro Twist Pin Contact System for maximum performance, as well as unique mechanical engagement and locking mechanisms to ensure reliability in the harshest environments.

Ideally suited for markets and applications that require extremely small, lightweight and reliable interconnects, our Microminiature Connectors feature higher density contact configurations than traditional rectangular solutions—without sacrificing quality or performance.

Key Benefits

- Ultra small, lightweight & high performance form factor
- Available in 8 shell sizes that accommodate from 9 to 100 contacts, plus special power and coaxial contact arrangements
- Exceptional bandwidth performance
- Durability to withstand high shock and vibration
- Unique mechanical engagement & locking mechanisms
- Custom & turnkey cable assemblies
- RoHS compliant part numbers & plating options

Key Features

- Micro Twist Pin Contact System recessed into plug insulators
- Positions: 9, 15, 21, 25, 31, 37, 51, 100
- Wire size: AWG 24 thru AWG 32
- Micro socket: Free standing used in receptacle side
- Current rating: 3A
- Durability: 500 mating cycles
- Contacts: Copper alloy; gold plated
- Low profile configurations available
- Designed to MIL-DTL-83513 specifications
- Operating temperatures:
 - MDM Standard: -55°C to +150°C
 - High Temp MDM (F222): -55°C to +200°C
 - Ultra-High Temp MDM (F300): -55°C to +230°C

Markets & Applications

From automated space vehicles roving the surface of Mars, to oil & gas exploration in remote locations the world over, ITT Cannon's versatile, high performance Microminiature Connectors transmit data, power and signal when it matters most.

Twist Pin Technology

At the heart of our Microminiature Connector Series is the Twist Pin Contact System, which Cannon engineers first developed and licensed in the 1960s. Highly reliable Twist Pin Technology allows continuity in very dense areas and under severe shock and vibration, requiring low engagement and separation forces. It is superior technology that outperforms traditional machined or stamped electrical contact systems.

Cable Assemblies

Our extensive expertise in designing and manufacturing Microminiature Connectors translates into our ability to design and deliver both Turnkey and Custom Cable Assemblies.

Microminiature Product Line

- MDM Micro-D (MIL-DTL-83513)
- MDM PCB (MIL-DTL-83513)
- MDLM Micro-D Metal Shell, Low Profile, Standard & F222

Cannon Twist Pin Contact System

At the heart of our Microminiature Connector Solutions is Cannon's proven Twist Pin Contact System, which features superior electrical and mechanical technology that outperforms traditional machined or stamped electrical contact systems. Highly reliable twist pin technology allows continuity in very dense areas and under severe shock and vibration, requiring low engagement and separation forces. Termination can consist of uninsulated pigtails or insulated wire all pre-harnessed at our factory to customer specifications. Cannon engineers developed and introduced Twist Pin Contact Technology in the 1960s, and have used it in the Cannon MDM Series Microminiature Connectors for decades. ITT Cannon Cannon's Twist Pin System consists of the Micro Socket and the Micro Pin or Twist Pin.

Advantages of Cannon's Twist Pin Contact System

- Seven points of electrical contact (Micro 0.050 inch interconnect)
- Contact and crimp sleeve materials carefully optimized for extremely reliable crimps; no design tradeoffs
- Seamless crimp sleeves
- Multiple 4-indent wire crimps standard & smaller bore micro socket contacts
- Standard integral tail & thru bundle MicroPin contacts (high density packaging)
- High mating cycles
- High current handling capabilities
- System qualification in numerous aerospace, defense, electronic & high temperature geophysical applications
- Wide array of wire terminations

How It Works: POS-A-Line Contact Alignment*

The flexible Twist Pin is recessed into the insulator and the rigid socket is exposed, reversing the traditional positions of pin and socket. During mating, the socket is guided into the pin insulator by the lead-in chamfer. The pin is kept from flexing beyond the socket capture radius by the walls of the cavity. The hemispherical weld of controlled radius at the tip of the pin combines with the lead-in chamfers of the socket contact and the pin insulator to cam the pin into alignment. By controlling the welding process and the dimensions of the socket contact and the insulators, it is impossible for the recessed pin to escape the socket capture radius.

*Figure 1 - The Twist Pin Contact System consists of several stranded cores making up the wire bundle. The strands are subsequently heat treated and a weld is performed on the tip of each contact. Crimp sleeves are then inserted over the contact and crimp areas are defined to produce a seamless crimp system. The Twist Pin Contact System is referred by ITT Cannon as a Pos-A-Line contact alignment system. Our reference to this system identifies that the flexible Twist Pin is recessed into the insulator and the rigid socket is exposed thus reversing the traditional positions of the pin and socket. During the mating sequence, the socket is guided into the pin insulator by the lead-in chamfer. The pin is kept from flexing beyond the socket capture radius by the walls of the cavity. The hemispherical weld of controlled radius at the tip of the pin combines with the lead-in chamfer of the socket contact and the pin insulator to cam the pin in alignment. ITT Cannon has developed a very robust Six Sigma manufacturing process that controls the welding process as well as the dimensions of the socket contact and insulator material. The net result is a contact system that makes it impossible for the recessed pin to escape the socket capture radius.

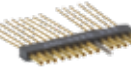

Figure 2 - Illustrates the Twist Pin features, as well as mating & severe misalignment conditions.

Micro-D Metal Shell - .050" Contact Spacing

MDM

Cannon MDM Series Microminiature Connectors are used in applications requiring highly reliable, extremely small and lightweight solutions with higher density contact configurations. They are available in eight shell sizes that accommodate from 9 to 100 contacts, as well as special arrangements with power and coaxial contacts. Cannon MDM Series Microminiature Connectors employ size 24 Micro-Pin / Micro-Socket Contacts on .050 (1.27) centers in a contact density identical to the standard Micro-D connector series, but with Aluminum shells to increase strength, prevent chipping, cracking or breaking and provide electromagnetic (EMI and RFI) shielding. They also feature a silicone elastomer compression interfacial seal to provide a moisture and humidity seal between each contact and between the contacts and shell.

Specifications

| Standard Materials and Finishes | |
|---------------------------------|---|
| Shell | - 6061-T6 Aluminum alloy per QQ-A-200/8, yellow chromate/cadmium, Type II, Class 3 over electroless nickel per SAE AMS-C-26074, Class 4. |
| Insulator | - Liquid Crystal Polymer per MIL-M-24519, Type GLCP-30F (9-100) - Glass filled diallyl phthalate per MIL-M-14, Type SDGF (7*2 and 24*4) - Polyphenylene sulfide per MIL-M-24519, Type GST-40F (16*5) - Polyester per MIL-M-24519, Type GPT-30F (10*10) |
| Contacts | - Copper alloy, gold plate |
| Mounting Hardware | - 300 Series stainless steel, passivate |
| Kit, Jackpost (3) items | - 300 Series stainless steel, passivate |
| Washer | - 400 Series stainless steel, passivate |
| Standard Epoxy | - Hysol EE4215/HD3561, color black - Hysol EE4198/HD3561, color green - Hysol MG40FS molding compound |

| Mechanical Features | |
|-------------------------|---|
| Coupling | - Friction/jackscrews |
| Polarization | - Keystone-shaped shells |
| Contact Spacing Centers | - .050 (1.27) |
| Shell Styles | - Plug and receptacle |
| No. of Contacts | 9 thru 100 signal; 5 signal/2 coaxial; 5 signal/2 power; 11 signal/5 coaxial; 11 signal/5 power; 0 signal/10 coaxial; 0 signal/10 power; 20 signal/4 coaxial; 20 signal/4 power |
| Coaxial Cable | - RG - 178/U |
| Wire Size | - #24 thru #32 AWG |
| Contact Termination | - Multiple indent crimp |

Performance Data

| Test | Method | Criteria of Acceptance |
|----------------------------------|---|---|
| Dielectric Withstanding Voltage | Method 3001: 600 VAC at sea level 150 VAC at 70,00' altitude | No breakdown No breakdown |
| Insulation Resistance | Method 3003 | 5,000 megohms minimum |
| Thermal Shock | Method 1003. Condition A: - 55°C to +125°C | No physical damage |
| Physical Shock | Method 2004, Condition E: 50 G's, 3 axes, 6 millisecond duration sawtooth pulse | No physical damage No loss of continuity > 1 μsec |
| Vibration | Method 2005, Condition IV: 20 G's, 10-20,000 Hz. 12 hrs | No physical damage No loss of continuity > 1 μsec |
| Durability | 500 cycles of mating and unmating, 500 CPH max. | No mechanical or electrical defects |
| Moisture Resistance | Method 1002, Type II, omit steps 7a & 7b | Insulation resistance > 100 megohms |
| Salt Spray | Method 1001, Condition B: 48 hours | Shall be capable of mating and unmating, and meet contact resistance requirements |
| Contact Resistance (MIL-STD-202) | Method 1001, Condition B: At 3 amps At 1 milliamp | 8 milliohms maximum 10 milliohms maximum |
| Contact Retention | Per MIL-DTL-83513 | 5 lb. minimum axial load |

Micro-D Metal Shell - .050" Contact Spacing

MDM

How to Order

Series

- MDM - Micro Liquid Crystal Polymer (LCP)
- RMDM - RoHS Compliant

Contact Arrangements

- 9, 15, 21, 25, 31, 37, 51, 100 (standard)
- 16C5, 10C10, 7C2, 24C4 (coaxial) } Consult Factory for Coax
- 16P5, 10P10, 7P2, 24P4 (power) } or Power Combo Layouts

Contact Type

- P - Pin
- S - Socket

Termination Type

- H - Harness-insulated wire.
- L - Solid-uninsulated wire.
- S - Solder pot to accept #26 AWG MAX. harness wire. (Not available with power contact arrangements.)

Termination code*

- (H) 001 - 18", 7/34 strand, #26 AWG, MIL-W-16878/4, Type E Teflon, yellow.
- (H) 003 - 18", 7/34 strand, #26 AWG, MIL-W-16878/4, Type E Teflon, color coded to MIL-STD-681 System I.
- (L) 1 - 1/2" uninsulated solid #25 AWG gold plated copper.
- (L) 2 - 1" uninsulated solid #25 AWG gold plated copper.

* For additional termination codes, please see pages 83-85.

Hardware Options

- M - Military specification hardware, see page 17 or military hardware codes.
- P - Jackpost
- K - Jackscrew-standard profile
- L - Jackscrew-low profile
- F - Float mount
- B - No hardware standard. 091 (2.31) dia. hole for sizes 9-51; .120 (3.05) dia. hole for size 100.
- A - .125 (3.18) dia. mounting holes for sizes 9-51; 166 (4.22) dia. hole for size 100.
- B1 - .1475 (3.75) dia. hole for size 100 (Per MIL-DTL-83513)

Shell Finish Modification Codes

- No Number - (Standard cadmium/yellow chromate over nickel)
- A174 - Electroless nickel (RoHS Standard)
- A172 - Gold over nickel (RoHS Compliant)
- A141 - Irridite/alodine
- A30 - Black anodize

Modification Codes

- F222 - High Temp (200°C)
- F234 - 24 AWG Wire
- K139 - F222 High (200°C) and F234 (24 AWG Wire)

MDM

Connector Saver

Save wear and tear on your equipment and system connectors with Cannon's MDM Connector Saver. Eliminate multiple mating and de-mating during testing and final checkout by simply mating the "Connector Saver" to your unit and using the opposite side for your testing interface. This result is less wear, less tear and less chance of damage. Our MDM Connector Saver is available in all eight standard MDM layouts. Mating hardware is also available and can be included with the original order, or it may be ordered separately.

Shell Size 100

Figure 1
Front Mounting

Figure 2
Rear Mounting

Figure 3
Edgeboard Mounting

For 9-51 Shell Sizes

NOTES:

1. Front panel mounting is the preferred mounting method. Front panel mounting dimensions (figure 1) will accommodate either #2-56 screws or jackpost hardware.
2. Rear panel mount dimensions (figure 2) will accommodate #2-56 screw hardware only. When mounting the connector with rear panel mount jackpost see the panel cut-out dimensions.
3. Edgeboard mounting bracket (figure 3) uses #2- 56 screws. Dimension .450 +/- .002 (11.43 +/- 0.05) locates the MDM receptacle flush with the end of the board.

For 100 Shell Size

NOTES:

1. Front mounting is the preferred mounting method. Front panel mounting dimensions (figure 1) will accommodate either #4-40 screws or jackpost hardware.
2. Rear panel mount dimensions (figure 2) will accommodate #4-40 screw hardware only see the panel cut-out dimensions.
3. Edgeboard mounting bracket (figure 3) uses #4-40 screws. Dimension .450 +/- .002 (11.43 +/- 0.05) locates the MDM receptacle flush with the end of the board.

Micro-D Coaxial/Power Combo - .050" Contact Spacing MDM

Cannon offers three options of the MDM Coaxial/Power Microminiature Connector:

MDM Coaxial: The MDM Metal Shell Connectors have been tooled in several coaxial layouts, offering the versatility of combining coaxial & signal lines in the same connector.

MDM Power: The same insulator used with coaxial contacts is available with power contacts, offering the versatility of combining power and signal lines in the same connector.

MDM Coaxial/Power: Power and coaxial contacts can be interchanged as desired.

MDM-PCB

Our MDM-PCB Microminiature Connectors are designed for use with flex circuitry, flat cable and printed circuit boards or multi-layer boards. These interconnects use a standard MDM metal shell and provide high density and high reliability in board-to-board, board-to-cable and cable-to-cable applications. MDM PCB micro connectors are available in 8 shell sizes with 9 to 100 contacts. Terminations may be straight (BS) or at 90° right angle (BR, CBR) board thickness. Jackpost mounting for use with locking hardware is also available.

200°C High-Temp Micro-D, Wired Low Profile 0.50" Spacing

MDLM-F222

Our Micro-D Metal Shell Low Profile Connectors offer the flexibility and small profile that today's electronics systems demand. Using the dielectric footprint of Cannon's MD Series Connector and an aluminum shell designed to be a thinner, lower profile package, ITT Cannon engineers have developed a connector family that meets all of the performance criteria of the Cannon MDM and MIL-DTL-83513 Connectors. The Micro-D Metal Shell Low Profile Series is available in standard cable plugs and receptacles in contact sizes 9 through 51 positions. This family of connectors, like the original MDM series, features Cannon Twist Pin Contact Technology on 0.050 inch spacing.

Specifications

| | |
|--------------------------------|--|
| Material | 6061-T6 Aluminum Alloy per QQ-A-200/8 |
| Finishes (-A174) | Electroless nickel plate per SAE-AMS-C-26074, Class 4m .001-.0015 inch thick |
| Insulators (9-51) | Liquid Crystalline Polymer per MIL-M-24519, Type GLCP-30F |
| Contacts | Gold Plate per MIL-DTL-45204 .000050 inch thick min over Copper Alloy per SAE-AMS-2418 .000010 inch thick min. |
| Hardware | 300 Series stainless steel, passivated |
| Float Mount Washer | 400 Series stainless steel, passivated |
| Standard Epoxy | Hysol EE4215/HD3561, color: black |
| MECHANICAL FEATURES | |
| Coupling | Friction/Jackscrews |
| Polarization | Keystone-shaped shells |
| Contact Spacing Centers | .050 (1.27) |
| No. of Contacts | 9 thru 51 signal |
| Wire Size (Standard) | #25 Solid Wire, #26 Standard Wire |
| Contact Termination | Multiple indent crimp |

| Test | Method | Criteria of Acceptance |
|---------------------------------|--|---|
| Dielectric Withstanding Voltage | Method 3001: 600 VAC at sea level 150 VAC at 70,000 altitude | No breakdown No breakdown |
| Insulation Resistance | Method 3003 | 5,000 megaohms minimum |
| Thermal Shock | Method 1003, condition A: -55° C to +125° C | No physical damage |
| Physical Shock | Method 2004, Condition E: 50 G's, 3 axes, 6 milliseconds duration sawtooth pulse | No physical damage no loss of continuity > 1 μsec |
| Vibration | Method 2005, Condition IV: 20 G's, 10-2,000 Hz. 12 hrs. | No physical damage no loss of continuity > 1 μsec |
| Durability | 500 cycles of mating and unmating, 500 CPH max | No mechanical or electrical defects |
| Moisture Resistance | Method 1002, Type II, omit steps 7a and 7b | Insulation resistance > 100 megaohms |
| Salt Spray | Method 1001, Condition B: 48 Hours | Shall be capable of mating and unmating, and meet contact resistance requirements |
| Contact Resistance MIL-STD-202 | Method 1001, Condition B: at 3 amps at 1 milliamp | 8 milliohms maximum 10 milliohms maximum |
| Contact Retention | Per MIL-DTL-85313 | 5 lb. minimum axial load |

200°C High Temp Micro-D

MDM-F222

With the increasing demand for more ruggedized interconnect solutions that can withstand extreme temperatures and operating conditions, our High Temp Micro-MDM F222 leads the industry with exceptional versatility and performance. This highly engineered, highly reliable microminiature interconnect features Cannon Micro Twist Pin Technology and is qualification tested to withstand 200°C continuous operating temperature for 500 hours.

Specifications & Options for 200°C High Temp Micro-MDM F222

Configurations

- Terminations
 - Stranded wire
 - Solid wire
 - Solder pots
 - PCB
- Straight
- Right angle
- Condensed right angle
- Signal contacts:
 - 9, 15, 21,25, 31, 37, 51, 100

Electrical Wire Size

- Stranded wire:
 - 24 AWG thru 32 AWG
- Solid wire:
 - 25 AWG
- Solder pots:
 - 26 AWG or smaller
- PC tails:
 - 24 AWG

Material and Finishes

- Shell material
 - Aluminum alloy
- Shell plating
 - Electroless nickel
 - Yellow chromate /cadmium over nickel
- Insulator
 - Liquid crystal polymer per MIL-M-24519, type GLCP-30F
- At temperatures above 175°C, yellow chromate over cadmium can cause shell discoloration and deterioration of the chromate conversion coating.

Hardware Configurations

| Commercial | | Per MIL-DTL-83513 | |
|------------|---|-------------------|---|
| Code | Description | Code | Description |
| A | No hardware (.125 dia. hole for sizes 9-51 & .166 dia. hole for size 100") | | Size 9-51 |
| B | No hardware (standard) (.091 dia. hole for size 9-51 & .120 dia. hole for size 100) | M2 | Jackscrew-low profile (allen head) |

230°C Ultra-High Temp Micro MDM F300

MDM-F300

How to Order | Part Number Configurator

The Ultra-High Temp Micro-MDM series is qualification tested to withstand 230°C continuous operating temperature for 500 hours and meets the harsh requirements of the Oil and Gas exploration industries. Cannon's Ultra-High Temp Micro-MDM F300 connector is designated by an F300 modification code and uses high performance Micro Twist Pin Contacts, special insulating materials and high temperature wire.

Microminiature Connectors

MDMH Hermetic

Our MDMH Hermetic Microminiature Connectors are ideal for applications that require more robust sealing than can be achieved with epoxy resins. The MDMH uses size 24 AWG contacts that are compression glass sealed through a steel shell and into a diallyl pthalate front-end insulator. When mated, an interfacial seal provides environmental protection. We recommend MDMH Hermetic receptacles be soldered to the chassis or container for a completely leak-proof joint. MDMH Hermetic receptacles mate with standard MDM plugs.

Specifications

STANDARD MATERIALS & FINISHES

| | |
|---------------|---|
| Shell | Mild steel, tin-lead plated |
| Insulator | Glass filled diallyl pthalate per MIL-M-14. Type SDGF |
| Contacts | Copper alloy, gold plated sockets on mild steel gold plated pins. Solder pots - mild steel gold plated |
| Hermetic seal | Compression glass |
| Leak rate | 1 micron cubic ft/hr max (1.04 x 10 ⁻⁵ cc/sec at 1 ATM pressure differential) |

ELECTRICAL DATA

| | |
|---------------------------------|---------------------|
| No. of contacts | 9 to 100 |
| Dielectric withstanding voltage | 150 VAC |
| Insulation resistance | 5000 Mohm minimum |
| Wire size | #26 through #30 AWG |
| Contact termination | Solder pot |

MECHANICAL FEATURES

| | |
|-----------------|--------------------------|
| Size or length | 8 sizes |
| Service class | Hermetically sealed |
| Coupling | Friction/jacks |
| Polarization | Keystone shaped shells |
| Contact spacing | .050 (1.27) centers |
| Shell style | Receptacle, solder mount |

Microminiature Connectors

TMDM Filter

Our TMDM Filtered Microminiature Connectors feature transverse monolith filters for noise reduction and EMI, RFI and EMP shielding. These high performance connectors feature a ruggedized, one-piece aluminum shell and are ideally suited for commercial aerospace, military avionics and military equipment applications. The TMDM Filtered Micro is designed with Cannon's own TwistPin Contact System and is environmentally sealed. The TMDM receptacle accommodates from 8 to 37 sizes, 24 AWG socket contacts on 1.27 (.050) centers and mates with standard MDM Microminiature Connector plugs.

Specifications

STANDARD MATERIALS & FINISHES

| | |
|------------------|---|
| Shell | Aluminum alloy per QQ-A-200/8 with electroless nickel finish per QQ-N-290 |
| Insulator | Glass filled diallyl phthalate per MIL-M-14. Type SDGF |
| Contact, socket | Copper alloy, 50 microinch gold per MIL-G-45204, Type II, Class I |
| Interfacial seal | Silicone base rubber |

ELECTRICAL DATA

| | |
|---------------------------------|---------------------------------|
| No. of contacts | 9 to 37 |
| Dielectric withstanding voltage | 300 VAC |
| Insulation resistance | 5000 Mohm at 100 VDC |
| Voltage rating (working) | 100 VDC |
| Current rating | 3 amps max. |
| Maximum capacitance | 250, 500, 1000, 2000 picofarads |

Filter type

C

MECHANICAL FEATURES

| | |
|-----------------|-------------------------|
| Size or length | 6 sizes |
| Coupling | Friction/jackscrews |
| Polarization | Keystone shaped shell |
| Contact spacing | .050 (1.27) centers |
| Shell style | Single piece receptacle |

Microminiature Connectors

TMDM Filter

Typical Filter Performance

Micro-D Plastic Shell - .050" Contact Spacing

MD**

Cannon MD** Microminiature Solutions are used in applications requiring highly reliable, extremely small and lightweight interconnects. They are available in two insulator materials, two mounting variations, seven shell sizes accommodating from 9 to 51 contacts and a special arrangement of five micro contacts and two coaxials. The insulator materials give the Cannon MD** connector wide versatility in most applications. They can also terminate a wide variety of stranded or solid wire directly to Micro-D contacts, which is often desirable in high density arrangements. MD** Connectors can also be custom harnessed to meet any customer requirement.

* For Standard Wire Termination codes refer to the wire pp. 83-85.

Micro-D Plastic Shell - .050" Contact Spacing

MD*D-PCB

Cannon's MD*D-PCB Microminiature Connectors are designed with standard, all-plastic shells for use with flex circuitry, printed circuit and multi-layer boards. They are easily mounted and soldered, and offer high density and high reliability in board-to-board and board-to-cable applications. MD*D-PCB connectors are extremely small, lightweight and ruggedized for exceptional performance in the harshest environments. They are available in seven shell sizes, with 9 to 51 contacts in the popular 90° narrow profile PCB termination and a variety of tail lengths for varying board thickness. Jackpost mounting is also available for use with locking hardware.

| MD*1 for 51 Shell Size | 015-9516-000 | .122 (3.10) | .257 (6.53) |

NOTES: Screw lock assembly (322-9500-000) can be used for front mounting. Jackpost kit (320-9505-000) consists of 2 assemblies, shipped unassembled.

This hardware is factory installed.

Shown here is a cutaway view of the float mount for the MD connector. The basic shell dimensions are the same for the float mount and the screw mounting hole configurations. View shown is for standard float mount front panel mounting. Reverse mounting is available on request.

* NOTE: Torque values are as follows:
Low Profile Jackscrew (L)-2.5 in/lbs
Standard Jackscrew (K)-2.5 in/lbs

- NOTE:
1. A panel thickness of 1/8" (3.17mm) maximum is recommended for ease of tab bending when a panel mounting key & clip assembly or edgeboard mounting brackets are used.
 2. Front mounting is preferred. However, when rear mounting is necessary, use figure 3 for dimensions.
 3. Figure 4 is for edge board mounting bracket or edgeboard clip assembly. The .184 + .002 (2.67 + .05) dimension locates the MD socket insulator flush with the end of the board.
 4. Screw brackets (015-9100-000) will accommodate #2-56 screws.
 5. Front mounting (Figure 1) and rear mounting (Figure 3) accommodate #2-56 screws.

Micro Center Jackscrew

MJS

Cannon's MJS Micro Center Jackscrew Series provides a reliable interconnect for board-to-board, board-to-cable and inline cable-to-cable applications. Layouts accommodating up to 76 MicroPin/Micro-Socket contacts are available with a wide range of options.

How to Order

Microminiature Circular - .050" Contact Spacing

MIK

Cannon's MIK Microminiature Circular Series Connectors are ruggedized, lightweight and meet the applicable requirements of MIL-DTL- 83513. Key markets and applications include biomedical, instrumentation and miniature black boxes. Our MIK Connector is designed to accommodate up to 55 contacts on .050 (1.27) centers (equivalent to 420 contacts per square inch). Five keyway polarization prevents cross plugging. Standard MIK Connectors are available in two shell sizes accommodating two contact arrangements pre-wired to your specific requirements. The threaded coupling nuts support connector strength and reliability. MIK receptacles can either be front or back panel mounted.

Microminiature Circular - .050" Contact Spacing

MIKM

Cannon's MIKM Microminiature Circular Connector is designed with a steel shell and receptacle for improved ruggedness and RFI resistance. It accommodates up to 55 contacts on .050 (1.27) centers (equivalent to 420 contacts per square inch) and features five keyway polarization to prevent cross plugging. The threaded coupling nuts offer strong, reliable coupling. MIKM receptacles can be either front or back panel mounted; in back mounting applications, panel thickness of up to 3/32" can be used on the larger sizes. Maximum temperature range - 55°C to + 125°C.

Microstrips .050" Contact Spacing

MT

Cannon Microstrips are available in three termination styles: solder cup, pigtail harness and printed circuit leads. The MicroPin Contact System assures maximum performance in a minimum design package. Available with latches or guide pins, our Microstrips provide an extremely dense and reliable interconnection and offer greater application flexibility

Product Features

- High Performance MicroPin Contact System
- High-density .050" contact spacing
- Pre-wired for ease of installation
- Fully potted wire terminations
- Guide pins for alignment and polarizing
- Quick-disconnect latches
- 3 Amp current rating
- Precision crimp terminations
- Solder cup, pigtail or printed circuit terminations
- Surface mount leads

MicroPin Contact System

The Cannon MicroPin Contact System offers uncompromised performance in downsized interconnects. The beryllium copper pin contact is fully recessed in the insulator, assuring positive contact alignment and robust performance. The socket contact is precision machined from high strength copper alloy and features a smooth lead-in chamfer.

The MicroPin features seven points of electrical contact. This contact system assures high normal force, excellent wipe and superior shock and vibration performance.

Specifications

| | |
|---------------------------------|---|
| Current Rating | 3 Amps max |
| Dielectric Withstanding Voltage | 600 VAC @ sea level; 300 VAC @ 70,000 feet altitude |
| Insulation Resistance | 5000 megohms min. |
| Contact Resistance | 8 milliohms max. |
| Operating Temperature | MTV polyester -56°C to +125°C; MTB diallyl phthalate -55°C to +150°C |
| Durability | 500 cycles min. |
| Shock/Vibration | 20 G's |
| Connector Mating Force | (8 oz.) x (# of contacts) |
| Latch Retention | 5 lbs. min. |
| Wire Size | #26 AWG insulated wire, #25 AWG uninsulated solid wire. MT strips will also accommodate #24 AWG through #32 AWG. For other wiring options contact the factory for ordering information. General Performance requirements in accordance with MIL-DTL-83513 |

Materials and Finishes

| | |
|--------------------------------------|---|
| Insulator | MTV: Glass-filled polyester per MIL-M-24519; MTB: Glass-filled diallyl phthalate per MIL-M-14 |
| Contact | Copper Alloy per MIL-DTL-83513 |
| Contact Finish | 50 Microinches Min. Gold Plated per MIL-G-45204 |
| Insulated Wire | #26 AWG. 19/38 Stranded, silver-plated copper, TFE Teflon insulation per MIL-W-16878/4 |
| Uninsulated Solid Wire | #25 AWG gold-plated copper per QQ-W-343 |
| Potting Material/Contact Encapsulant | Epoxy |
| Latch | 300 series stainless steel, passivated |

Microminiature Strip - .100/.050" Contact Spacing

MT

Polarization

Modification code "-01" in the Microminiature Strip part number refers to guide posts, which are located on both ends of the socket side of the 50-MIL STRIP connector and feature empty cavities on the pin side to accept the guide posts. Although in many cases it is not necessary to polarize 50-MIL STRIP connectors, there are several ways to prevent cross plugging. One method is the use of guide posts that can be located in specified cavities to ensure the contacts will align when these posts are positioned before mating.

Micro Edgeboard - .050" Contact Spacing

MEB

Cannon's Micro Edgeboard (MEB) Connector Series incorporates the proven Micro-Pin / Micro-Socket contact, which features an outstanding record of reliability and performance. Our MEB features machined aluminum shells for ruggedness, diallyl phthalate insulator for top electrical performance and a 36-position polarization key system to prevent cross plugging. Contacts are on .050 (1.27) center spacing. Termination types include 90° or right angle pigtailed for multi-layered PC boards and "coke bottle" termination for double-sided PC boards. Harnessing capability is available for both pin and socket sides. The MEB, including the SBR 90° or right angle variation available for multi-layer boards, can be mounted on the female (daughter) side of double or single-sided PC boards. The mating male (mother) board side can have the terminations formed to meet the application demands. Conforms to MIL-C-55302/120 thru 123 (not qualified).

Specifications

| Material and Finishes | |
|--------------------------|---|
| Shell | 6061-T6 Aluminum Alloy per QQ-A-200/8 or QQ-A-225/8, electroless nickel per SAE AMS-C-26074, Class 4, except .0010 to .0015 (0.03 to 0.04) thick or conversion coating per MIL-C-5541, Class 3, color gold. |
| Contact, Pin and Socket: | Copper Alloy, 50 microinch gold per ASTM B488, Type II, Code C, Class 1.25 |
| Jackscrew/Jackpost: | 303 stainless steel, passivated per QQ-P-35. |
| Insulator: | Glass-filled diallyl phthalate per MIL-M-14, Type SDG-F, color green Polyester per MIL-M-24519, Type GPT-30F, color black available for MEB-128 upon request. |

| Termination Types |
|---|
| Consult factory for stranded wire lead modifications codes. |

| Mechanical Features | |
|--------------------------|--|
| Size or Length: | 2 sizes |
| Coupling: | Friction/Jackscrew |
| Polarization: | Shells, polarizing keys (36 positions) |
| Contact Spacing Centers: | .050 (1.27) |

Cable Assemblies

Turnkey & Custom Cable Solutions for Cannon Microminiature Connectors

We provide complete turnkey and custom cable assemblies across our expansive portfolio of Microminiature Connectors. Our proven, harsh environment interconnects and cable assemblies are used in the most demanding applications and environments including Aerospace, Defense Electronics, Geophysical Exploration, Oil & Gas, High-Speed Computer Networking, Industrial Automation, Medical Electronics, Satellite and Space Communications and Telecommunications.

Our cable assembly expertise and innovative Six Sigma-driven manufacturing processes enable the design and manufacturing of tight pitch cable assemblies in 0.100, 0.075, 0.050 and 0.025 contact spacing, among many others.

For more details, contact your Cannon Account Representative.

Microminiature Cabling Solutions

- Dynamic Custom Cable Assemblies for Harsh Environments
- Custom Micro-D and MIL-DTL-83513 Interconnect Cable Assemblies
- Space Grade Micro Interconnect Cable Assemblies
- High Temperature Harsh Environment Interconnect Assemblies
- Medical Electronics Cable Assemblies

Flex Circuit Cable Assembly

Terminating to Flexible Circuits

For a low profile finish, it is best to terminate flexible circuits in line with the contacts. Since most Microminiature Connectors have contacts set into two or three rows, termination is generally an easy process.

- The diagrams below provide guidance for pad arrangements to suit MDM Microminiature Connectors, ensuring the circuits are inserted into the potting correctly and accurately.
- The length of the pad is optional but it is important to provide enough cover-lay, especially at the edges of the circuit, to avoid delamination. We suggest at least 0,51 mm (.020 inches). Our standard potting shrouds provide support to the circuit with a dimension of 7,00 mm (.275 inches) from the rear of the flange.

Please consult Customer Service for specific flex circuit assembly design considerations and requirements.

Diagram 1 shows details of the pad spacing and the suggested amount of material to be left between the end of the pad A and the edge of the flex B.

Diagram 2 illustrates how the connector is prepared with short pigtailed and a special first pot which just captures the contacts. The final back potting for strength is controlled by our standard 7,00 (.275) potting fixtures.

Custom Backshells for Microminiature Connectors

ITT Cannon offers a wide range of backshell solutions for Microminiature Connectors used in harsh environment applications. Although we do not offer a standard backshell portfolio, Cannon engineers can design and manufacture a range of back fittings for our MDM Series Microminiature Connectors, depending on customer requirements. We offer custom designs using proven banded systems in which the braid is captivated over a chimney-style outlet. These types of backshell systems are available in different

material finishes and sizes and can be provided with special process termination methods. In addition, ITT Cannon engineers have developed a method of riveting the back fitting to the shell within the jacking area. This option guarantees 360-degree shielding effectiveness even when jackscrews or jacking posts are not being used. When a conduit system is preferred, such as for test box environments in field locations, back fittings and a fully screened weatherproof convoluted trunking can be used. Our

engineering team can also provide special back potting style termination systems for environmental protection and strain relief. These backshell style systems are typically filled with epoxy or other encapsulating materials to provide a robust and effective solution.

Sealing Gaskets

We have received requests for gasket materials to seal the MDM connectors into various enclosures. We recommend that you consider wider flanged connectors together with a low cost conductive gasket to provide an adequate surface area. This combination will give you IP-66 sealing with good EMC compliance. The following dimensions for gaskets and flange dimensions are regarded as the minimum that you should consider.

Conductive elastomers generally offer a superior shielding performance when compared with alternatives as in table below.

| Gasket Type | Neoprene (wire impregnated) | Silicone (wire impregnated) | Silicone (oriented wire) | Neoprene (fabric wrap) | Metallic finger stock | Metallic fibres | Conductive silicone rubber |
|-----------------------|-----------------------------|-----------------------------|--------------------------|------------------------|-----------------------|-----------------|----------------------------|
| Shielding performance | S | S | G | G | G | G | G |
| Temperature range | S | G | G | S | G | G | G |
| IP sealing | P | P | S | S | P | P | G |
| Compression force | G | G | G | G | G | S | S |
| Compression range | S | S | S | G | G | P | S |
| Surface texture | P | P | G | P | G | P | S |
| Compression set | S | S | S | S | G | P | G |
| Re-usability | S | S | S | S | G | P | G |

*Neoprene is a trademark of Dupont P = Poor S = Satisfactory G = Good

Conductive rubber gaskets can be loaded with many different metallic fillers but the choice of material is dependent upon a number of factors such as level of conductivity, shielding effectiveness, galvanic compatibility and cost.

Galvanic Corrosion can occur when two dissimilar metals are in contact with one another in the presence of an electrolyte. The type of gasket material has to be assessed because of the use of metallic fillers. Many applications are dry indoor environments where corrosion is not a major concern. However, for external use, particularly marine, it is recommended that consideration be given to compatibility. The table on the next page is a summary.

| Enclosure Material | Silver/Nickel | Silver/Copper | Silver/aluminum | Inert aluminum | Silver/Glass | Silver | Nickel/Graphit | Nickel |
|--------------------------|---------------|---------------|-----------------|----------------|--------------|--------|----------------|--------|
| Aluminum alloys | X | X | 1 | ▲ | X | X | 1 | 1 |

About ITT Cannon

ITT is a diversified leading manufacturer of highly engineered critical components and customized technology solutions for the energy, transportation and industrial markets. Building on its heritage of innovation, ITT partners with its customers to deliver enduring solutions to the key industries that underpin our modern way of life. Founded in 1920, ITT is headquartered in White Plains, N.Y., with employees in more than 35 countries and sales in a total of approximately 125 countries. For more information visit itt.com

ITT's Cannon brand offers a product portfolio that remains one of the most extensive in the industry. Continuous investment in technology, research and investment have enabled us to provide new, innovative solutions to markets including:

- Commercial Aerospace
- Military & Defense
- Industrial
- Transportation
- Medical

When you specify an ITT Cannon interconnect solution, you can rely on products designed, developed and manufactured to the highest quality and reliability standards. This tradition of excellence is based on ITT Cannon's corporate culture of operating its businesses under the principles of Six Sigma. At ITT, Six Sigma is not just a quality philosophy but a complete corporate culture that drives the entire business. Our Value Based Management and Value-Based Product Development systems are two cornerstones that allow for the development of both leadership and product engineering principles.

Six Sigma Manufacturing

ITT Cannon operates manufacturing facilities in the United States, Germany, Italy, Mexico, China and Japan, all of which have particular product area strengths that allow ITT Cannon to offer a truly global presence to our customers. Our facilities are world class and accommodate full vertical integration, utilizing the latest manufacturing technologies including automated and robotic machining centers, Super Market manufacturing cells, Kanban pull systems, and automated electrical, mechanical, and optical test and inspection equipment. The combination of our manufacturing strength and our advanced manufacturing facilities allows ITT Cannon to offer products at market driven prices. Our capabilities, especially in robotics, computerized precision tooling, Kaizen Project Management, Six Sigma tools and testing give ITT the most optimized global manufacturing footprint in the interconnect industry.

The Custom Difference

As an industry leader in harsh environment interconnect applications, ITT Cannon's world class engineering teams work directly with our customers to design and develop cost-effective solutions for their applications. In many cases we may modify one of our standard designs to ensure a highly reliable solution where timing is critical. When custom connectors are required, we collaborate with clients and partners with a goal to design the most reliable, cost-effective solution possible. Our engineering and product management teams provide a thorough analysis of proposed solutions, ensuring our customers receive the right solution for their program and application needs.

RoHS Compliance Information

ITT Cannon has implemented a strict parts control plan for all ITT Cannon electronics plants worldwide that allows the Cannon product portfolio to meet the requirements of the European Union Directive 2002/95/EC better known as the Reduction of Hazardous Substances initiative. As appropriate, specific Cannon products may be ordered with an R prefix number which insures our customers will receive RoHS compliant parts for their commercial electronics applications and equipment. Since most RoHS hazardous substances center around specific metal plating and lead solder coatings, ITT Cannon's products for RoHS compliance are available in the following plating finishes: electroless nickel, stainless steel, anodize over aluminum and gold plating. It should be noted that gold plating would be recommended as the replacement for tin-lead solder when ordering board mount connectors.

Product Safety Information

This note must be read in conjunction with the product data sheet/catalog. Failure to observe the advice in this information sheet and the operating conditions specified in the product data sheet/ catalog could result in hazardous situations.

1. MATERIAL CONTENT AND PHYSICAL FORM

(a) Electrical connectors do not usually contain hazardous materials. They contain conducting and non-conducting materials and can be divided into two groups: Printed circuit types and low cost audio types which employ all plastic insulators and casings.

(b) Rugged, Fire Barrier and High Reliability types with metal casings and either natural rubber, synthetic rubber, plastic or glass insulating materials. Contact materials vary with type of connector and also application and are usually manufactured from either: Copper, copper alloys, nickel, alumel, chromel or steel. In special applications, other alloys may be specified.

2. FIRE CHARACTERISTICS AND ELECTRIC SHOCK HAZARD

There is no fire hazard when the connector is correctly wired and used within the specified parameters. Incorrect wiring or assembly of the connector or careless use of metal tools or conductive fluids, or transit damage to any of the component parts may cause electric shock or burns. Live circuits must not be broken by separating mated connectors as this may cause arcing, ionization and burning. Heat dissipation is greater at maximum resistance in a circuit. Hot spots may occur when resistance is raised locally by damage, e.g. cracked or deformed contacts, broken strands of wire. Local over-heating may also result from the use of the incorrect application tools or from poor quality soldering or slack screw terminals. Overheating may occur if the ratings in the product Data Sheet/Catalog are exceeded and can cause breakdown of insulation and hence electric shock. If heating is allowed to continue it intensifies by further increasing the local resistance through loss of temper of spring contacts, formation of oxide film on contacts and wires and leakage currents through carbonization of insulation and tracking paths. Fire can then result in the presence of combustible materials and this may release noxious fumes. Overheating may not be visually apparent. Burns may result from touching overheated components.

3. HANDLING

Care must be taken to avoid damage to any component parts of electrical connectors during installation and use. Although there are normally no sharp edges, care must be taken when handling certain components to avoid injury to fingers. Electrical connectors may be damaged in transit to the customers, and damage may result in creation of hazards. Products should therefore be examined prior to installation/use and rejected if found to be damaged.

4. DISPOSAL

Incineration of certain materials may release noxious or even toxic fumes.

5. APPLICATION

Connectors with exposed contacts should not be selected for use on the current supply side of an electrical circuit, because an electric shock could result from touching exposed contacts on an unmated connector. Voltages in excess of 30 V ac or 42.5 V dc are potentially hazardous and care should be taken to ensure that such voltages cannot be transmitted in any way to exposed metal parts of the connector body. The connector and wiring should be checked, before making live, to have no damage to metal parts or insulators, no solder blobs, loose strands, conducting lubricants, swarf or any other undesired conducting particles. Circuit resistance and continuity check should be made to make certain that there are no high resistance joints or spurious conducting paths. Always use the correct application tools as specified in the Data Sheet/Catalog. Do not permit untrained personnel to wire, assemble or tamper with connectors. For operation voltage please see appropriate national regulations.

IMPORTANT GENERAL INFORMATION

(i) Air and creepage paths/operating voltage. The admissible operating voltages depend on the individual applications and the valid national and other applicable safety regulations.

For this reason the air and creepage path data are only reference values. Observe reduction of air and creepage paths due to PC board and/or harnessing.

(ii) Temperature. All information given are temperature limits. The operation temperature depends on the individual application.

(iii) Other important information. Cannon continuously endeavors to improve their products. Therefore, Cannon products may deviate from the description, technical data and shape as shown in this catalog and data sheets.

ITT Cannon is a business unit of ITT Cannon Inc., which manufactures the highest quality products available in the marketplace; however these products are intended to be used in accordance with the specifications in this publication. Any use or application that deviates from the stated operating specifications is not recommended and may be unsafe. No information and data contained in this publication shall be construed to create any liability on the part of Cannon. Any new issue of this publication shall automatically invalidate and supersede any and all previous issues

All data subject to change without notice.

We connect when it matters most

Meet some of Cannon's most popular, reliable and proven interconnect solutions

KPT Series I Miniature Circular Connector

Cannon's KPT Series I Mini-Circular is a robust, general-purpose interconnect used for a wide range of markets and applications including Ground Vehicles, Industrial Equipment, IFE/C and Military Aviation. It has a positive three-point bayonet coupling, five-key way polarization and high insert arrangement contact density. These rugged connectors are also available in a variety of plating options.

D-Subminiature Connectors

Originally designed for aircraft radio systems, Cannon's D-Subminiature Connector became the first multi-purpose interconnect solution of its kind, ideal for multiple markets and applications. From rocket launchers and satellite systems, to rugged military transports and commercial avionics, the D-Subminiature's versatility has made this Cannon invention the most widely used connector in the world.

Quadrax

Our family of innovative Quadrax contacts is based on the ARINC 600 physical interface, with a highly engineered design to facilitate deployment of Ethernet LAN's in Land, Sea or Air installations using ARINC 600, ARINC 404 or 38999-style connectors. The Quadrax contact enables high-speed data transfer rates up to 2.5 Gbs and features rear release crimp pin and socket Quadrax Contacts, as well as front release PC pin Quadrax contacts. It is available in a variety of 38999-style layout arrangement in the following shell styles: wall mount receptacle, box mount receptacle and jam nut receptacle and straight plug.

Connect with the experts

ITT's Cannon brand is a world leader in the design and manufacture of highly engineered connector solutions for multiple end markets.

Why ITT

ITT is a focused multi-industrial company that designs and manufactures highly engineered critical components and customized technology solutions. ITT's Cannon brand is a leading global manufacturer of connector products serving international customers in aerospace, defense, medical, industrial and transportation end markets. ITT's Connector business, which also includes the Veam and BIW Connector Systems brand, manufactures and supplies a variety of connectors and interconnects that make it possible to transfer data, signal and power in an increasingly connected world.
