## Wireless Infrastructure Solutions

Skyworks Solutions offers a broad portfolio of RF/microwave products for wireless communications infrastructure systems, including cellular telephone base stations, WiMAX access points, land-mobile radio systems, point-to-point radio links and more. Our portfolio is comprised of components and subsystems from the antenna connection to the baseband output, including low noise amplifiers, power amplifiers, general-purpose amplifiers, mixers, modulators, demodulators, phase shifters, switches, attenuators, detectors, directional couplers, hybrid couplers, power splitters/combiners, ceramic filters and resonators, as well as discrete control components such as PIN diodes, tuning varactor diodes, Schottky diodes, chip attenuators and more.

Skyworks lead (Pb)-free products are compliant to all applicable materials legislation. For additional information, refer to *Skyworks Definition of Lead (Pb)-Free*, document number SQ04-0073. Tin/lead (SnPb) packaging is not recommended for new designs.

Skyworks Green™ products are compliant to all applicable materials legislation and are halogen-free. For additional information, please refer to *Skyworks Definition of Green™*, document number SQ04-0074.

# Discrete to Highly Integrated Solutions

Discrete

MMIC

MCM

Skyworks Solutions is uniquely qualified to provide the level of integration that matches the needs of our customers' design goals. Our broad portfolio includes solutions from discrete diode and transistor devices to Microwave Monolithic Integrated Circuit (MMIC) designs. Using these discrete and MMICs, we are able to offer Multichip Module (MCM) products fully encapsulated on a laminate substrate. These MCMs contain all necessary bias and matching circuits to offer a drop-in component count for integrated solutions. MCMs are offered for many wireless infrastructure applications in amplifiers, mixers and modulation/demodulation.

## 2G, 3G Base Station Repeater Block Diagram

Skyworks' broad product portfolio includes components and subsystems from the antenna connection to the baseband output, as well as discrete control components:

### Components and Subsystems

- Low noise amplifiers
- Power amplifiers
- General-purpose amplifiers (gain blocks)
- Mixers
- Modulators
- Demodulators
- Switches
- Attenuators
- Detectors
- Directional couplers
- Hybrid couplers
- Power splitters/combiners
- Ceramic filters
- Resonators
- Phase shifters

### Discrete Control Components

- PIN diodes
- Tuning varactor diodes
- Schottky diodes
- Chip attenuators

# RF Switching

Skyworks offers both MMIC and discrete solutions for transmit/receive antenna switching applications. A transmit/receive switch directs either the received signal to the receiver or the transmit signal from the transmitter. Additionally switches are used in filter bank switching and synthesized local oscillator mixer applications. Key performance specifications include high power handling, insertion loss, isolation and linearity. Please refer to the following product listing.

# Gain Blocks and Power Amplifiers

Gain block amplifiers are used throughout the transceiver design to provide high linearity and low noise signal amplification. Skyworks gain blocks are 50 ohm matched and can be cascaded without external impedance matching networks for RF and IF applications. These amplifiers are also used as drivers for higher power amplifier stages. Please refer to our product listing that follows.

# Gain Control Attenuation

Skyworks has a large selection of digital attenuators to dynamically attenuate signals in receive and transmit signal paths. Digital attenuators are controlled by serial or parallel interfaces and offer down to 0.25 dB attenuation bit accuracy. Our listing of our attenuator products follow.

## Fixed Attenuator Pads

The ATN3590 family of fixed resistive attenuators are integrated circuits comprising thin film resistors and through-die vias that provide excellent attenuation flatness from low frequency to 40 GHz. These attenuators are available in die form from 0 to 30 dB. Please refer to the following product listing.

# Power Detectors

Skyworks' SMS series of Schottky diodes are used extensively in transceiver designs for power detection. Detectors are commonly used as level detectors in wireless and other RF and microwave signal processors. Detector designs are simple to realize using our low-cost, plastic packaged diodes. Skyworks also has a comprehensive library of application notes available to help with customers' designs. Please refer to the following product listing.

# Modulators/Demodulators

The SKY73010 is an integrated quadrature modulator for direct modulation of high-frequency Amplitude Modulated (AM), Phase Modulated (PM), or compound carriers. A SiGe Bipolar Complementary Metal Oxide Semiconductor (BiCMOS) process is used to offer excellent linearity, noise floor, and carrier suppression performance.

Skyworks offers mixers, demodulators and modulators in an integrated LGA package. Solutions for direct quadrature modulators and demodulators are available. Our product offering is contained below.

## IQ Demodulators

Part Number	RF Input Frequency Range (MHz)	IF Output Frequency Range	Voltage (V)	IIP2 (dBm)	IIP3 (dBm)	Voltage Conversion Gain (dB)	Package (mm)

# Power Dividers/Combiners

Skyworks Solutions offers a broad selection of monolithic 2-way and 4-way power divider/combiners in surface mount packages for wireless infrastructure applications. These divider/combiners are utilized to equally split signals into in-phase signals as found in balanced signal chains, local oscillator distribution networks and more. Conversely, they can also be used to combine two or four signals while providing excellent isolation between the individual signal sources. Their low insertion loss, excellent phase and amplitude balance produce outstanding system performance. Please refer to the following product listing.

## Skyworks Solutions

Skyworks Solutions, Inc. is an innovator of high performance analog semiconductors. Leveraging core technologies, Skyworks supports automotive, broadband, wireless infrastructure, energy management, GPS, industrial, medical, military, wireless networking, smartphone, and tablet applications. The Company's portfolio includes amplifiers, attenuators, circulators, demodulators, detectors, diodes, directional couplers, front-end modules, hybrids, infrastructure RF subsystems, isolators, lighting and display solutions, mixers, modulators, optocouplers, optoisolators, phase shifters, PLLs/synthesizers/VCOs, power dividers/combiners, power management devices, receivers, switches, and technical ceramics.

Headquartered in Woburn, Massachusetts, USA, Skyworks is worldwide with engineering, manufacturing, sales, and service facilities throughout Asia, Europe, and North America.

New products are continually being introduced at Skyworks. For the latest information, visit our Web site at [www.skyworksinc.com](http://www.skyworksinc.com), contact your local sales office, or email us at [sales@skyworksinc.com](mailto:sales@skyworksinc.com).

## The Skyworks Advantage

- Broad front-end module and precision analog product portfolio
- Market leadership in key product segments
- Solutions for all air interface standards, including CDMA, GSM / GPRS / EDGE, LTE, WCDMA, and WLAN
- Engagements with a diverse set of top-tier customers
- Strategic partnerships with all leading baseband suppliers
- Analog, RF, and mixed-signal design capabilities
- Access to all key process technologies: GaAs HBT, pHEMT, BiCMOS, SiGe, CMOS and RF CMOS, and Silicon
- World-class manufacturing capabilities and scale
- Unparalleled level of customer service and technical support
- Commitment to technology innovation
