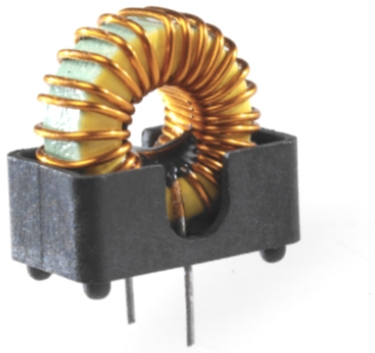
THE DATASHEET OF

FIT80-6

TRIAD MAGNETICS

Switchmode/High Frequency Toroidal Inductor

FIT80-6

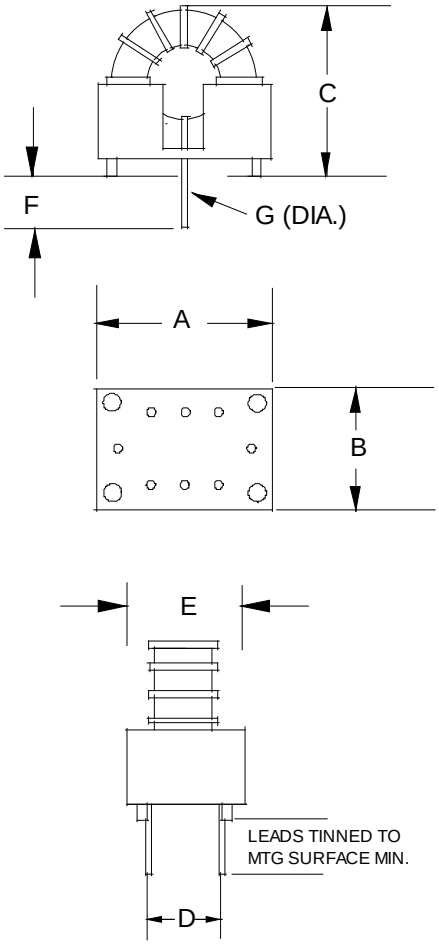


Description:
The FIT80-6 toroidal inductor is specifically designed to minimize transients. It stores energy and therefore, conditions the output signal by leveling the current waveform providing a more stable current supply. Generally used in high frequency circuits, its standard design provides an economical solution in differential mode applications or as an output inductor.

Electrical Specifications (@25C):

Min. Inductance (µH)		Rated	Max
No Bias	At Bias	DC Amps	DCR (mΩ)
38.07	18.11	9.7	17.0

Note: No Bias inductance measured at .25V, 10KHZ.



Dimensions:

A	B	C	D	E	F	G
.975	.625	1.10	.450	.624	.125	.045±.003

Units: In inches

Weight: .045 lbs.

Technical Notes:

1. Nominal inductance values are typically 10% higher than minimal rating.
2. Biased inductance measured at rated DC amps.
3. Operation at rated current yields approximately 40°C temperature rise over 20°C ambient.

RoHS Compliance: As of manufacturing date February 2005, all standard products meet the requirements of 2011/65/EU, known as the RoHS initiative.
