

# THE DATASHEET OF APT1222WAY

### FEATURES

**1. Low zero-cross voltage (max. 15 V) type added to lineup. Approximately 1/3 of previous product**  
Helps reduce device noises even further.

- 2. Two types available: Random type and zero-cross type**
- 3. Many package sizes available. (Wide terminal type with 10.16 mm pitch between I/O terminals available.)**
- 4. High dielectric strength. (Between input and output: SOP 3, 750 V; DIP 5,000 V)**
- 5. Handles both 100 and 200 V AC loads**

This relay handles both voltages in a single product it is not necessary for users that use both types to manage separate part numbers.

**6. Terminal 5 of the DIP 6-pin type is completely molded.**

### TYPICAL APPLICATIONS

- 1. For triac driver in heater controls of products such as office equipment, home appliances, and industrial machines. (For 100V/200V, 50/60 Hz lines)**
- 2. Triac driver for SSRs**
