MP725 Surface Mount Power Film Resistors

D-Pak Style Surface Mount Power Package including Metal Tab - 0.020 ohm to 1.00 Kohm

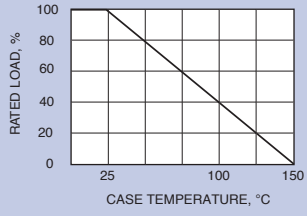
Use your thermal design experience with power semiconductors in D-Pak style power packages. This experience will help you get the most out of this unique family of surface mount power resistors. The thermal design issues are the same where power handling capability is based on the case temperature which is maintained in your design.

MP725 Surface Mount Power Film Resistors introduce our proven Micronox® resistance film system in the widely accepted D-Pak style surface mount power package. The non-inductive design makes this resistor ideal in high frequency communications, power switching circuits, and snubbers.

The special performance features of our patented MP725 Surface Mount Power Film Resistors include:

- **D-Pak style power package for surface mount applications.**
- **Metal tab assists in post surface mount soldering inspection.**
- **Resistance values to 0.020 ohm for current sense applications.**
- **Non-Inductive Design.**
- **Up to 25 Watt power rating at +25°C case temperature.**
- **Resistor element is electrically isolated from the metal heat sink tab.**

Model No.	Power Rating	Dielect. Strength V_{RMS}AC	Max. Voltage	Resistance		Terminal
				Min.	Max.	
MP725	25 Watts *	1,500	200	0.020 Ω	1.00K	Solderable



* **The case temperature is to be used for purposes of establishing the maximum applied power. See Derating Curve.** The case temperature measurement is made on the metal mounting tab against the molded body. Derate appropriately for the ambient temperature range, the thermal resistance of the mounting surface, and the temperature limitations of the adjacent materials (such as glass epoxy).

Derating (thermal resistance) is 0.200 W/°C (5.0°C/W).

Power dissipation is 2.5 watts, at an ambient temperature of 25°C, when mounted on a double sided copper board (2 ounce, G-10 or FR-4) 1 inch x 1 inch x .063 inch (thick).

Standard Resistance Values:

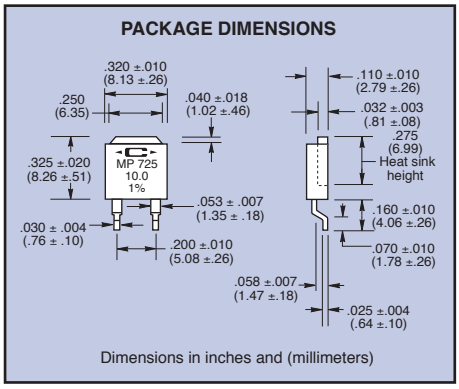
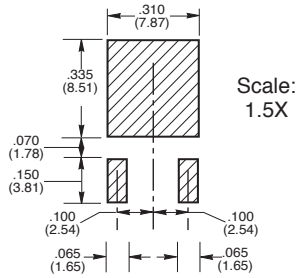
Measurement Note:
For the specifications, resistance measurement shall be made at the foot of surface mount formed terminal.



FOOTPRINT FOR SOLDERABLE CONTACT AREA



Soldering Note: During surface mount soldering the soldering temperature profile must not cause the metal tab of this device to exceed 220°C.
