HRF-AT4520

31.0 dB, DC – 4 GHz, 5 Bit Parallel Digital Attenuator

The Honeywell HRF-AT4520 is a 5-bit digital attenuator ideal for use in broadband communication system applications that require accuracy, speed and low power consumption. The HRF-AT4520 is manufactured with Honeywell's patented Silicon On Insulator (SOI) CMOS manufacturing technology, which provides the performance of GaAs with the economy and integration capabilities of conventional CMOS. These attenuators are DC coupled to improve lower operating frequency, frequency response and reduce the number of DC bias points required.

LEAD FREE QFN SURFACE MOUNT APPLICATION

Please see Application Note AN310a for assembly process recommendations. The maximum soldering temperature of the -FL is 260°C. Application Notes can be found at our website: www.honeywell.com/microwave

CIRCUIT APPLICATION INFORMATION

These attenuators require a DC reference to ground. They may not operate properly when AC coupled on both the RF input and output without a DC ground reference provided as part of the circuit. See Application Note AN311.
