## 960001AF

**Category:**
**Generic Part:** 960001

**Market Group:** PC CLOCK

**Description:** PC SPECIAL PURPOSE

The ICS960001 is the single chip clock solution designed for Ricoh printers application. It provides all necessary clock signals for such a system. Spread spectrum may be enabled through I2C programming. Spread spectrum typically reduces system EMI by 8dB to 10dB. This simplifies EMI qualification without resorting to board design iterations or costly shielding. The ICS960001 employs a proprietary closed loop design, which tightly controls the percentage of spreading over process and temperature variations. Serial programming I2C interface allows changing functions, stop clock programming and frequency selection. The SD\_SEL latched input allows the SDRAM frequency to follow the CPUCLK frequency(SD\_SEL=1) or other clock frequencies (SD\_SEL=0)
