#### DESCRIPTION

The *ISSI* IS63LV1024/IS63LV1024L is a very high-speed, low power, 131,072-word by 8-bit CMOS static RAM in revolutionary pinout. The IS63LV1024/IS63LV1024L is fabricated using *ISSI*'s high-performance CMOS technology. This highly reliable process coupled with innovative circuit design techniques, yields higher performance and low power consumption devices.

When  $\overline{CE}$  is HIGH (deselected), the device assumes a standby mode at which the power dissipation can be reduced down to 250  $\mu$ W (typical) with CMOS input levels.

The IS63LV1024/IS63LV1024L operates from a single 3.3V power supply and all inputs are TTL-compatible.
