

**THE DATASHEET OF  
PIC32MX350F128L-I/PT**

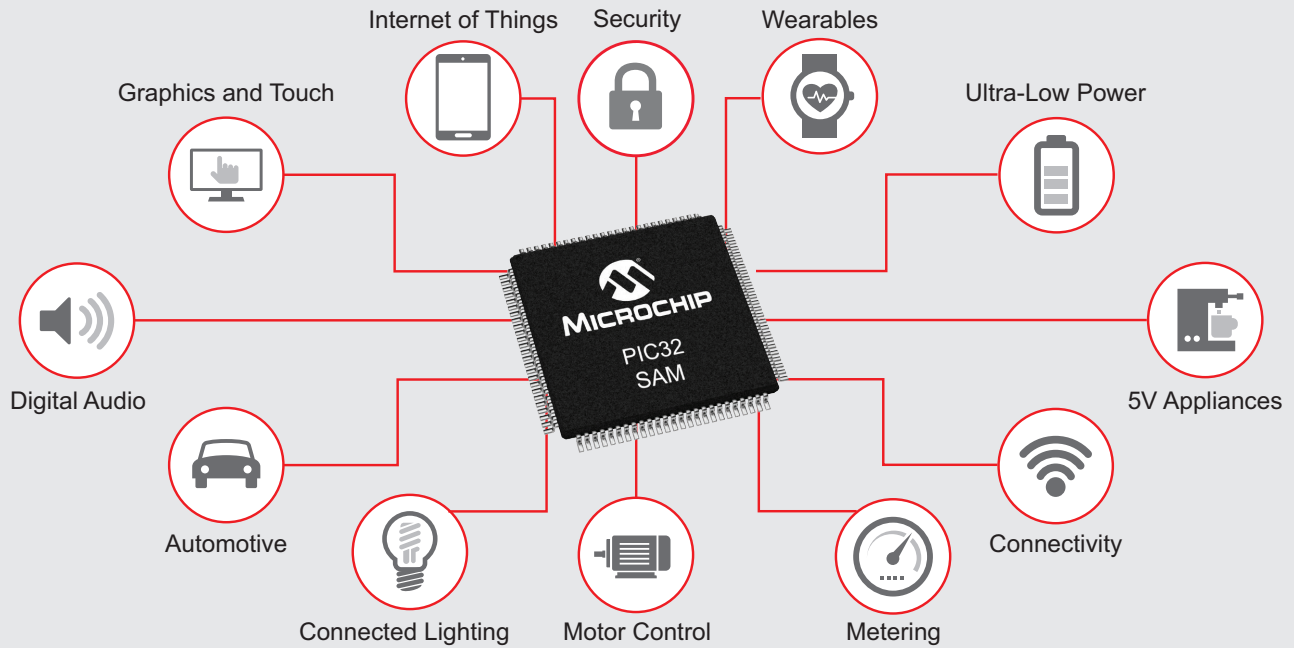

## 32-bit Microcontroller Families

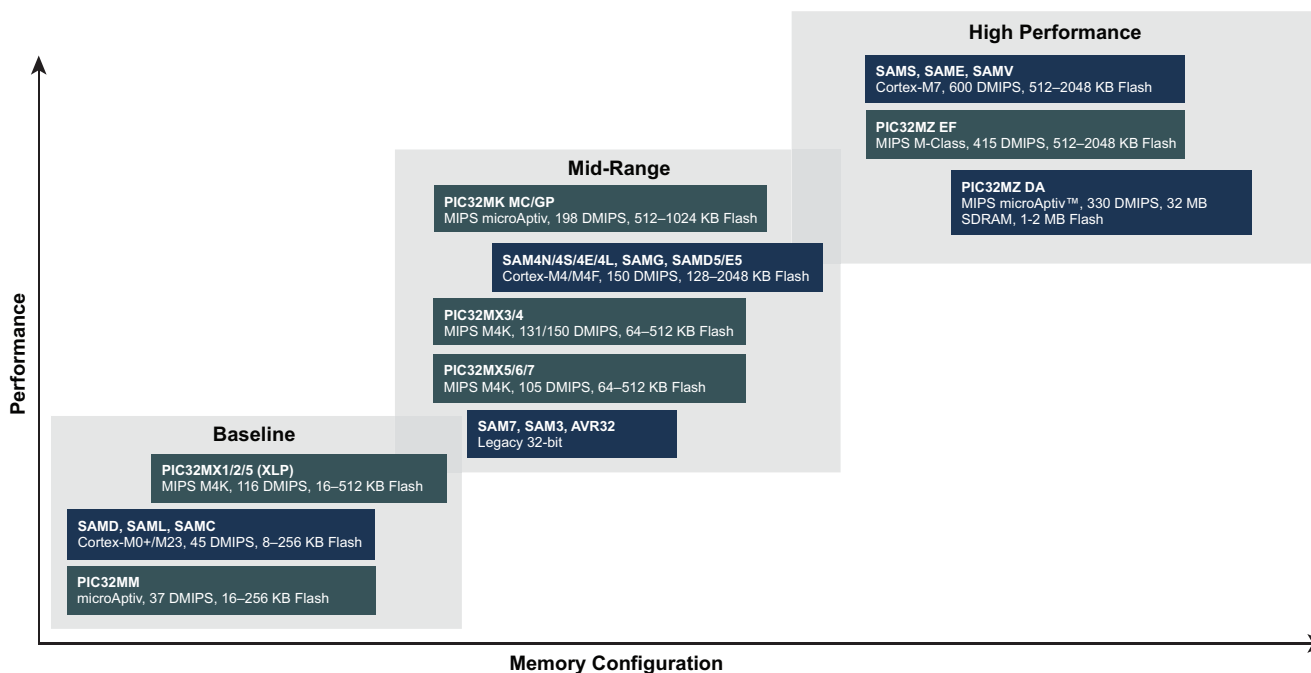

Industry's Broadest and Most Innovative 32-bit MCU Portfolio

Building on the heritage of Microchip Technology's world-leading 8- and 16-bit microcontrollers, the 32-bit family offers a wide range of products from the industry's lowest-power to highest-performance MCUs coupled with novel and easy-to-use software solutions. With a rich ecosystem of development tools, integrated development environments and third-party partners, Microchip's families of 32-bit microcontrollers accelerate a vast array of embedded designs ranging from secured Internet of Things (IoT) applications to general-purpose embedded control.

## Broad Portfolio with Smart Peripheral Mix and Multiple Performance Options

# World-Class 32-bit Microcontrollers

## Most Comprehensive 32-bit MCU Solutions for a Wide Range of Applications

## Breakthrough Innovative Features and Solutions

- Ultra-low power: < 25 µA/MHz in Active Mode and 100 nA in Sleep Mode
- High Performance: up to 600 DMIPs performance with double-precision Hardware Floating Point and up to 2 MB dual-panel Flash and 512 KB SRAM
- Enhanced Peripheral Touch Controller (PTC): dedicated hardware peripheral for robust capacitive touch solutions facilitating parallel acquisition, superior water tolerance and noise immunity
- Chip-level security and Arm TrustZone® Technology
- SleepWalking: ability of the peripherals to perform a desired task while the CPU is asleep
- Event system: enables inter-peripheral communication and efficiently offloads the CPU
- 2D Graphics Processing Unit (GPU) and 3-layer Graphics Controller with up to 24-bit color
- picoPower Technology and eXtreme Low Power (XLP)
- Low-Cost Controllerless Graphics (LCCG) solutions
- Integrated AES and Public Key Cryptography Controller (PUKCC)
- Motor Control PWM and Motor Encoder Interface
- Compact packaging options: chip scale packages down to 1.9 × 2.4 mm
- Advanced analog and connectivity peripherals
- microMIPS™ Instruction Set Architecture (ISA) for improved code density
- Dual-panel Flash options for live updates
- 18 MSPS, 12-bit high-speed ADC with 48 channels

### Series Descriptions

- **SAMD10/11:** Smaller member of SAMD family with serial interfaces, timers, analog comparators and PTC. SAMD11 adds FS USB.
- **SAMD20/21:** Offers large memory options with rich set of peripherals including PTC, and provides flexibility and ease-of-use with low power consumption. SAMD21 adds FS USB, DMA and timer counter for control.
- **SAMDA1:** Automotive-qualified microcontrollers, featuring embedded PTC enabling efficient button/slider/wheel solutions for automotive HMI and LIN applications.
- **SAML21/22:** Ultra-low power family with 12-bit ADC, analog comparators, PTC, security functions, TC for control and CCL. SAML21 runs at 48 MHz, consumes under 35 µA/MHz in active mode and 200 nA in sleep mode and features op amps, FS USB Host and Device and 12-bit DAC. SAML22 runs at 32 MHz and comes with an integrated SLCD controller, FS USB Device and 100-pin options.
- **SAMC20/21:** 5V MCU family for appliance and industrial applications. This family features 12-bit ADCs, hardware Divide and Square Root (DIVAS), PTC and high-end timers/counters. SAMC21 adds 16-bit Delta-Sigma ADC, CAN FD and CAN 2.0A/B.
- **SAML10/11:** Ultra-low power family with 12-bit ADC, op amps, enhanced PTC. They run at 32 MHz with Arm Cortex M23 core and consume under 25 µA/MHz in active and 100 nA in sleep. SAML11 adds chip-level security, secure boot, secure key storage and Arm TrustZone.

### Series Descriptions

- **PIC32MX1:** 32-bit family optimized for cost and performance with additional features such as DMA and PMP and more serial interfaces, comparators and ADC channels compared to the PIC32MM family. Targeted for general-purpose embedded control and graphics. *Select variants feature eXtreme Low Power (XLP) options.*
- **PIC32MX2:** Feature upgrade from PIC32MX1 with the addition of Full-Speed USB targeting cost-sensitive digital audio, graphics and USB applications. *Select variants feature eXtreme Low Power (XLP) options.*
- **PIC32MX5:** Feature upgrade from PIC32MX2 with the addition of CAN 2.0B targeting industrial, automotive (cabin/infotainment), digital audio, graphics, USB and CAN applications.
- **PIC32MM:** The PIC32MM family is the lowest-power and smallest member of the PIC32 family, offering sleep modes down to 500 nA and packages as small as 4 × 4 mm which makes them suitable for low-power and space-constrained applications. They are compatible with the PIC32MX1/MX2 families.

## SAMD5/E5, SAM4 and SAMG Series

| Mid-Range SAM Family Features         | SAM4N                   | SAM4S                              | SAM4E                         | SAM4L                  | SAMG                         | SAMD5/E5                    |

### Series Descriptions

- **SAM4N:** Ideal for a wide range of applications in industrial automation, consumer and appliance and energy metering markets. Pin compatible with SAM3S, SAM3N and SAM7S.
- **SAM4S:** Features a multi-layer bus matrix, multi-channel Direct Memory Access (DMA) and distributed memory to support high data-rate communication.
- **SAM4E:** Offers a rich set of connectivity peripherals including 10/100 Mbps Ethernet MAC supporting IEEE 1588 and dual CAN 2.0B as well as single-precision FPU.
- **SAM4L:** Ideal for power-sensitive designs delivering down to 90 µA/MHz in Active Mode as well as Sleep Mode with full RAM retention of 1.5 µA and wake-up time of 1.5 µs.
- **SAMG:** Optimized for ultra-low power and high performance. Small form factor bundled with FPU, DMA and good SRAM-to-Flash ratio in a very tiny 2.8 × 2.8 mm WLCSP.
- **SAMD5/E5:** Ideal for connectivity and security applications. Runs at 120 MHz and consumes under 65 µA/MHz in active mode, features PTC, Parallel Capture Control (PCC) for image sensing, Public Key Cryptography Controller (PUKCC) and Integrity Check Module (ICM) based on Secure Hash Algorithm.

# Mid-Range: PIC32MK, PIC32MX3/4 and PIC32MX5/6/7 Series

### Series Descriptions

- **PIC32MX3:** General-purpose 32-bit family with up to 120 MHz performance for complex embedded applications requiring larger code and data size.
- **PIC32MX4:** Feature upgrade from the PIC32MX3 family with the addition of Full-Speed USB targeting Bluetooth®, high-end digital audio, graphics and USB applications.
- **PIC32MX5:** Mid-range embedded connectivity family with large RAM, FS USB and CAN 2.0B targeting industrial, automotive (cabin/infotainment), USB and graphics applications.
- **PIC32MX6:** Mid-range embedded connectivity family with large RAM, FS USB and 10/100 Ethernet MAC targeting IoT, gateways, industrial, USB and graphics applications.
- **PIC32MX7:** Upgrade from the PIC32MX5 and PIC32MX6 families with a rich set of connectivity peripherals including dual CAN 2.0B, Full-Speed USB and 10/100 Ethernet MAC targeting a broad range of embedded connectivity applications.
- **PIC32MK:** Motor control and general purpose family with up to 1 MB dual panel Flash with live update, features Motor Control PWM, Quadrature Encoder Interface (QEI), four CAN modules and advanced analog.

### High Performance

- ARM® Cortex®-M7: 300 MHz, 1500 CoreMark™
- Single- and double-precision hardware Floating Point Unit (FPU)
- 16 kB+ 16 kB of I&D cache with ECC
- Execution in place from on-chip Flash NVM connected to QSPI and EBI
- Multi-port SRAM minimizing latency
- User-configurable SRAM and TCM size

### Advanced Analog Front-End (AFE)

- Dual S&H, 12-bit ADC and 16-bit hardware averaging
- Differential input, programmable gain
- Automatic gain and offset error correction
- DMA support, hardware and software trigger

### Features

- Hi-Speed USB host/device with integrated PHY
- Memory integrity check monitor
- CMOS camera interface
- Ethernet and dual CAN on SAME70 and SAMV71
- Sleepwalking on UART and I<sup>2</sup>C
- Event system

### Temperature Options

- –40 to 105°C
- AEC-Q100, –40 to 105°C (Grade 2)

# High Performance: PIC32MZ Series

## PIC32MZ Series

| Parameter                         | PIC32MZ EF                                     | PIC32MZ DA                  |
|-----------------------------------|--|-----------------------------|
| Speed                             | 252 MHz  | 200 MHz                     |
| Floating Point Unit (FPU)         | Yes  | –                           |
| 2D Graphics Processing Unit (GPU) | –  | Yes                         |
| 3-Layer Graphics Controller       | –  | Yes                         |
| DDR2 SDRAM                        | –  | 32 MB                       |
| Flash                             | 512 KB/1 MB/2 MB                               | 1/2 MB                      |
| SRAM                              | 128/256/512 KB                                 | 256/640 KB                  |
| Boot Flash                        | 160 KB   |                             |
| DMA                               | 26 ch.   |                             |
| Ethernet                          | 10/100 Ethernet MAC                            |                             |
| USB                               | Hi-Speed Device, Host and OTG                  |                             |
| CAN                               | Dual CAN 2.0B                                  |                             |
| ADC                               | 12-bit, 18 MSPS, 48 channel                    | 12-bit, 18 MSPS, 45 channel |
| Analog Compare                    | Two AC with 32 programmable voltage references |                             |
| TRNG                              | Yes  |                             |
| Crypto Engine                     | AES 256, DES/TDES, SHA1/256, MD-5, AES GCM     |                             |
| Timers/Compare/Capture            | 9/9/9  |                             |
| AEC-Q100                          | Grade1   | Grade 2                     |
| RTCC                              | Yes  |                             |
| PMP                               | Yes  |                             |
| SQI                               | Yes  |                             |
| SD/SDIO/eMMC bus interface        | –  | Yes                         |
| DDR2 SDRAM I/F                    | –  | Yes                         |
| EBI                               | Yes  |                             |
| SPI/I <sup>2</sup> S              | 6  |                             |
| I <sup>2</sup> C                  | 5  |                             |
| UART                              | 6  |                             |
| Pin Count                         | 64, 100, 124, 144                              | 169, 176, 288               |
| Packages                          | QFN, TQFP, VTLA, LQFP, TFBGA                   | LFBGA, LQFP                 |

### High Performance

- MIPS M-Class Core: 252 MHz, 415 DMIPs
- MIPS microAptiv Core: 200 MHz, 330 DMIPs
- Seven-stage FPU for 32-bit and 64-bit floating point math
- microMIPS mode for up to 35% smaller code size
- 32 KB I-Cache, 32 KB D-Cache
- DSP - enhanced core

### High-Performance Graphics Features

- 3-Layer graphics controller with up to 24-bit color support
- High-performance 2D Graphics Processing Unit (GPU)

### Advanced Analog

- 12-bit ADC
  - 18 Msps, 6 S&H, 48 channel
  - Six digital comparators and filters
  - Sleep and Idle Mode operation
- Two analog comparators with 32 programmable voltage references
- Temperature sensor with  $\pm 2^{\circ}\text{C}$  accuracy

### Features

- Dual-panel Flash for live updates
- Memory management unit for optimum embedded OS execution
- Hi-Speed USB Device/Host/OTG with PHY
- 10/100 Ethernet MAC with MII and RMII interface
- Dual CAN 2.0B with DeviceNet addressing support
- SPI/I<sup>2</sup>S for audio
- Crypto engine with TRNG
- Peripheral Pin Select (PPS) for function remap

### Temperature Options

- $-40$  to  $85^{\circ}\text{C}$ ,  $-40$  to  $105^{\circ}\text{C}$ ,  $-40$  to  $125^{\circ}\text{C}$
- AEC-Q100 (Grade 1  $-40$  to  $125^{\circ}\text{C}$ )
- AEC-Q100 (Grade 2  $-40$  to  $105^{\circ}\text{C}$ )

## AVR32 Series

### UC3L

Offers up to 256 KB Flash, 16 KB SRAM, 50 MHz performance and available in 48- and 64-pin options with PicoPower® peripherals, CAT module, Full-Speed USB and FlashVault code protection.

### UC3C

Offers up to 512 KB Flash, 68 KB SRAM, 66 MHz performance and available in 64-, 100- and 144-pin options with automotive qualification, FPU, Ethernet, USB, dual CAN, dual LIN and FlashVault code protection.

### UC3D

Offers up to 128 KB Flash, 16 KB SRAM, 48 MHz performance and available in 48- 64-pin options with hardware QTouch® technology, Full-Speed USB and CAT module.

### UC3A3/A4

Offers up to 256 KB Flash, 128 KB SRAM, 84 MHz performance and available in 100- and 144-pin options with Hi-Speed USB, NAND Flash and SDRAM interface, SD/SDIO, AES and crypto module.

### UC3A0/A1

Offers up to 512 KB Flash, 64 KB SRAM, 66 MHz performance and available in 100- and 144-pin options with Ethernet MAC, USB and SDRAM interfaces.

### UC3B

Offers up to 512 KB Flash, 96 KB SRAM, 60 MHz performance and available in 48- and 64-pin options with USB and I<sup>2</sup>S.

## SAM7 Series

### SAM7S

Offers up to 512 KB of dual-bank Flash, 64 KB SRAM, 55 MHz performance and available in 48- and 64-pin options with Full-Speed USB, SPI, USART, I<sup>2</sup>C and 10-bit ADC.

### SAM7SE

Offers up to 512 KB of dual-bank Flash and 32 KB SRAM, 55 MHz performance and available in 128- and 144-pin options with EBI (supports static memory, NAND, CompactFlash® and SDRAM), Full-Speed USB, USART, SPI, I<sup>2</sup>C and 10-bit ADC.

### SAM7X

Offers up to 512 KB dual-bank Flash, 128 KB SRAM, 55 MHz performance and available in 100-pin options with Full-Speed USB, Ethernet MAC, CAN 2.0A and 2.0B, USART, SPI, I<sup>2</sup>C and 10-bit ADC.

### SAM7XC

Offers up to 512 KB dual-bank Flash, 128 KB SRAM, 55 MHz performance and available in 100-pin options with two crypto blocks, Full-Speed USB, Ethernet MAC, CAN 2.0A and 2.0B, USARTs, SPI, I<sup>2</sup>C and 10-bit ADC.

## SAM3 Series

### SAM3N

Offers up to 64 KB Flash, 8 KB SRAM, 48 MHz performance and available in 48-, 64- and 100-pin options with touch support, USART, SPI, I<sup>2</sup>C, 10-bit ADC and 10-bit DAC.

### SAM3S

Offers up to 512 KB dual-bank Flash, 64 KB SRAM, 64 MHz performance and available in 48-, 64- and 100-pin options with SDIO/SD/MMC interface, touch support, I<sup>2</sup>S, SPI, I<sup>2</sup>C, UARTs, 12-bit ADC and 12-bit DAC.

### SAM3U

Offers up to 256 KB dual-bank Flash, 48 KB SRAM, 96 MHz performance and comes in 100- and 144-pin options with static memory controller, SDIO/SD/MMC interface, touch, HS USB, SPI, I<sup>2</sup>C, I<sup>2</sup>S, UARTs and 10-/12-bit ADCs.

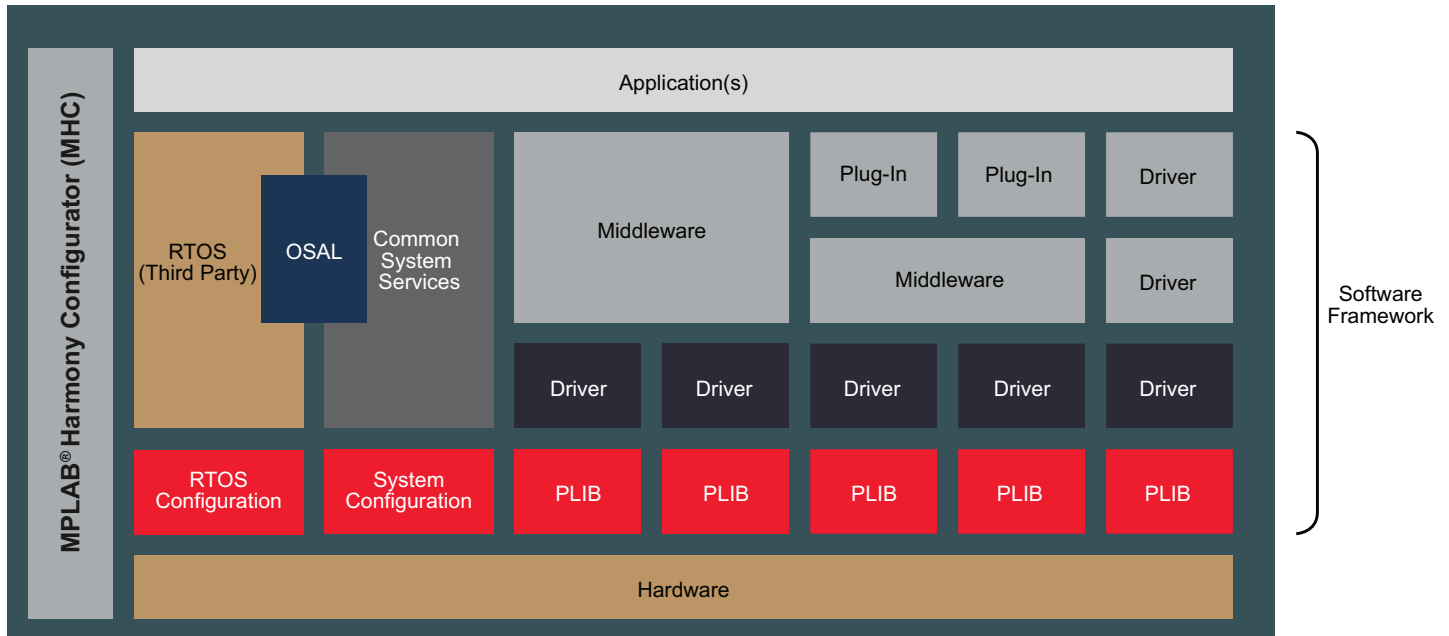

### SAM3X/A

Offers up to 512 KB dual-bank Flash with safety and security features, 96 KB SRAM, 84 MHz performance and comes in 100- and 144-pin options with NAND Flash controller, touch, dual CAN, Ethernet MAC, HS USB, SDIO/SD/MMC interface, SPI, I<sup>2</sup>C, I<sup>2</sup>S, UARTs, 12-bit ADC and 12-bit DAC.

## MPLAB® Harmony Software Framework

MPLAB Harmony is a flexible, abstracted, fully integrated firmware development environment. It enables robust framework development of interoperable RTOS-friendly libraries with quick and extensive Microchip support for third-party software integration. MPLAB Harmony includes a set of peripheral libraries, drivers and system services that are readily accessible for application development. It features the MPLAB Harmony Configurator (MHC) plug-in that provides a graphical way to select and configure all MPLAB Harmony components, including middleware, system services and peripherals, with ease.

### MPLAB Harmony Block Diagram

#### Application Layer

- Implements desired overall behavior with abstracted hardware access

#### Common System Services

- Provides common functionality to avoid duplication and conflicts

#### Peripheral Libraries (PLIB) Layer

- Provides functional interface

#### Middleware Layer

- Implements complex libraries and protocols (USB, TCP/IP, file systems, graphics)
- Provides a highly abstracted application program interface
- Supports third-party library integration

#### Device Driver Layer

- Provides highly abstracted interface to peripherals
- Controls access to the peripherals
- Supports blocking or non-blocking code

#### Key Features and Benefits

- Faster time to market
- Improved code interoperability
- Simplified support
- MPLAB Harmony Configurator (MHC) for enhanced user experience
- Improved 32-bit scalability
- MPLAB Harmony Graphics Composer
- Enhanced third-party software integration

### MPLAB Code Configurator

MPLAB Code Configurator (MCC) is a free, graphical programming environment that generates seamless, easy-to-understand C code to be inserted into your project. Using an intuitive interface, it enables and configures a rich set of peripherals and functions specific to your application.

MPLAB Code Configurator supports 8-bit, 16-bit and 32-bit microcontrollers and is incorporated into both the downloadable MPLAB X Integrated Development Environment (IDE) and the cloud-based MPLAB Xpress IDE.

#### Key Features

- Free graphical programming environment
- Intuitive interface for quick-start development
- Automated configuration of peripherals and functions
  - Minimized reliance upon product datasheet
  - Reduces overall design effort and time
- Accelerates generation of production-ready code

## Atmel Software Framework (ASF)

The Atmel Software Framework provides software drivers and libraries to build applications and help develop and glue together the different components of a software design. It can easily integrate into an operating system or run as a standalone product. It features Atmel START, which allows you to select the MCU, and configure software components, drivers, middleware and example projects to tailor your embedded application in a usable and optimized manner.

### Applications

- Provides application examples that are based on services, components and driver-modules

### Services

- Provides more application-oriented software such as USB classes, FAT file system, architecture-optimized DSP library, graphical library, etc.

### Components

- Provides software drivers to access external hardware components such as memory (for example SDRAM, SRAM, and NAND Flash), displays, sensors, wireless, etc.

### Drivers

- Each driver is composed of a driver.c and driver.h file that provides low-level register interface functions to access a peripheral or device-specific feature

### Boards

- Contains the various board definitions for the given architecture; the board code abstracts the modules above the board from the lower level details

### Utilities

- Provides several linker script files, common files for the build system and C/C++ files with general usage defines, macros and functions

ASF is organized in layers for each supported family of devices.

### Key Features and Benefits

- Simplifies the usage of microcontrollers, providing an abstraction to the hardware and high-value middleware
- Designed to be used for evaluation, prototyping, design and production phases
- Integrated in the Atmel Studio IDE with a graphical user interface or available standalone for GCC, IAR compilers
- Atmel START to easily select and configure software
- Data visualizer to profile applications run-time behavior and live power measurements
- QTouch composer allows you to seamlessly develop capacitive touch functionality to your application
- Atmel START TrustZone Manager to simplify configuration of Arm TrustZone

## Software Solutions Support

|                                |  |
|--------------------------------|--|
| <b>Touch</b>                   | QTouch® software library with QTouch composer and analyzer   |

## Comprehensive Suite of Development Tools

Microchip offers MPLAB X IDE and Atmel Studio IDE to support the broad range of 32-bit MCUs. They both are free and easy to use.

## Developing with PIC32 Microcontrollers

### PIC32 Starter Kits

Getting started is easy with any of the fully integrated PIC32 Starter Kits. They are supported by various application demos, software libraries and Board Support Packages (BSP) for faster development.

### Explorer 16/32 Development Board (DM240001-2)

The Explorer 16/32 Development Board is a flexible and convenient development platform for 16-bit PIC24 MCUs, dsPIC® DSCs and 32-bit MCUs. The board is driven by the processor Plug-in Modules (PIMs) and facilitates hardware expansion through the use of PICtail™ Plus daughter cards and mikro-BUS™ accessory boards. The PIMs are supported by various application demos, software libraries and BSPs for faster development.

## Choose a Platform: Starter Kit or Plug-In Module Platform

### Starter Kit Platform

| Product Family | Starter Kit  | Part Number   |
|----------------|--|---------------|
| PIC32MX1/2/5   | PIC32MX1/2/5 Starter Kit   | DM320100      |
|                | PIC32 Bluetooth® Starter Kit   | DM320018      |
|                | Microstick II  | DM330013-2    |
|                | PIC32MX274 XLP Starter Kit   | DM320105      |
| PIC32MM        | PIC32MM USB Curiosity Development Board                                | DM320107      |
|                | PIC32MM Curiosity Development Board                                    | DM320101      |
| PIC32MX3/4     | PIC32 USB Starter Kit III  | DM320003-3    |
|                | PIC32 Starter Kit  | DM320001      |
|                | Curiosity PIC32MX Board  | DM320103      |
| PIC32MX5/6/7   | PIC32 USB Starter Kit II   | DM320003-2    |
|                | Wi-Fi® G Demo Board  | DV102412      |

| PIC32MK        | Motor Control Plug-In Module: PIC32MK1024 PIM* | MA320024    |

\*Works with MCHV-2 (DM330023-2) and MCLV-2 (DM330021-2) Motor Control Development Boards.

## PICtail Plus Daughter Boards for Both Starter Kit\* and Explorer 16/32 Platforms

| Application | PICtail™ Plus Daughter Board                              | Part Number |
|-------------|---|-------------|
| CAN         | CAN/LIN Pictail (Plus) Daughter Card                      | AC164130-2  |
| USB         | USB PICtail Plus Daughter Card                            | AC164131    |
| Ethernet    | Ethernet PICtail Plus Daughter Card                       | AC164123    |
|             | Fast 100 Mbps Ethernet PICtail Plus Daughter Card         | AC164132    |
| M2M         | Machine-to-Machine (M2M) PICtail Daughter Board           | AC320011    |
| Wi-Fi®      | MRF24WN0MA module   | AC164153    |
|             | MRF24WG0MA module   | AC164149    |
| 802.15.4    | MRF24J40ME PICtail/PICtail Plus Daughter Board            | AC164143-1  |
|             | MRF24J40MA PICtail/PICtail Plus Daughter Board            | AC164134-1  |
| Graphics    | Low Cost Controllerless (LCC) PICtail Plus Daughter Board | AC164144    |
|             | Graphics Controller PICtail Plus Epson S1D13517 Board     | AC164127-7  |
|             | PIC32 VGA Camera Sensor PICtail Plus Daughter Board       | AC164150    |
| Storage     | PICtail Daughter Board for SD and MCC Cards               | AC164122    |

\*Note: Starter Kits require I/O Expansion Board (DM320002) to connect PICtail Plus Daughter Cards.

## Expansion Boards and Development Kits

| Expansion Board  | Part Number |
|--|-------------|
| I/O Expansion Board                                      | DM320002    |
| Multimedia Expansion Board II (MEB II)                   | DM320005-2  |
| Multimedia Expansion Board (MEB)                         | DM320005    |
| 5" WVGA PCAP Display for MEB II                          | AC320005    |
| PIC32 Audio Codec Daughter Card                          | AC320100    |
| PIC32 Audio DAC Daughter Card                            | AC320032-2  |
| High-Performance 4.3" WQVGA Display Module with maXTouch | AC320005-4  |
| PIC32 GUI Development Board with PCAP Touch              | DM320015    |
| High-Performance WVGA LCD Display Module with maXTouch   | AC320005-5  |

| Development Kit                        | Part Number |
|--|-------------|
| PIC32 Bluetooth® Audio Development Kit | DV320032    |

| PIMs for PIC32 Bluetooth® Audio Development Kit | Part Number |
|---|-------------|
| PIC32MZ EF Bluetooth Audio PIM                  | MA320018*   |
| PIC32MX270F256D Bluetooth Audio PIM             | MA320013*   |
| PIC32MX270F512L Bluetooth Audio PIM             | MA320017*   |

\*Note: Does not work with Explorer 16/32 Development Board.

## Emulators and Debuggers

| Emulator/Debugger                   | Part Number |
|-------------------------------------|-------------|
| PICKit™ 3 In-Circuit Debugger       | PG164130    |
| MPLAB® ICD 3 In-Circuit Debugger    | DV164035    |
| MPLAB REAL ICE™ In-Circuit Emulator | DV244005    |
| MPLAB PICKit 4 In-Circuit Debugger  | PG164140    |

## Developing with SAM and AVR32 Microcontrollers

### SAM and AVR32 Xplained Platforms

Xplained is a fast prototyping and evaluation platform for SAM and AVR32 MCUs. These low-cost, easy-to-use evaluation kits are ideal for demonstrating the features and capabilities of your selected device, and can be customized with a wide range of extension boards. Development is easy with a rich selection of example projects and code drivers.

Choose from four types of Xplained platforms:

- **Xplained Pro** – A professional evaluation board featuring auto-identification, with an on-board debugger and standardized extension connectors
- **Xplained Mini** – An ultra-low-cost platform for evaluating low pin-count parts. It features an on-board debugger, access to all device pins, and auto-identification
- **Xplained Ultra** – An evaluation platform for high-end microcontrollers with access to high-speed data and external memory interfaces
- **Xplained** – A fast prototyping and evaluation platform for 32-bit AVR® and SAM microcontrollers

#### Xplained Pro Platform

| Product Family  | Board                          | Part Number       |
|-----------------|--------------------------------|-------------------|
| <b>SAMC</b>     | SAMC21 Xplained Pro            | ATSAMC21-XPRO     |
|                 | SAMC21N Xplained Pro           | ATSAMC21N-XPRO    |
| <b>SAMD</b>     | SAMDA1 Xplained Pro            | ATSAMDA1-XPRO     |
|                 | SAMD11 Xplained Pro            | ATSAMD11-XPRO     |
|                 | SAMD20 Xplained Pro            | ATSAMD20-XPRO     |
|                 | SAM HA1G16A Xplained Pro       | ATSAMHA1G16A-XPRO |
|                 | SAMD21 Xplained Pro            | ATSAMD21-XPRO     |
| <b>SAML</b>     | SAML10 Xplained Pro            | DM320204          |
|                 | SAML11 Xplained Pro            | DM320205          |
|                 | SAML21 Xplained Pro            | ATSAML21-XPRO-B   |
|                 | SAML22 Xplained Pro            | ATSAML22-XPRO-B   |
| <b>SAMG</b>     | SAMG53 Xplained Pro            | ATSAMG53-XPRO     |
|                 | SAMG55 Xplained Pro            | ATSAMG55-XPRO     |
| <b>SAM4</b>     | SAM4E Xplained Pro             | ATSAM4E-XPRO      |
|                 | SAM4L Xplained Pro             | ATSAM4L-XPRO      |
|                 | SAM4L Xplained Pro Starter Kit | ATSAM4L-XSTK      |
|                 | SAM4L8 Xplained Pro            | ATSAM4L8-XPRO     |
|                 | SAM4N Xplained Pro             | ATSAM4N-XPRO      |
|                 | SAM4S Xplained Pro             | ATSAM4S-XPRO      |
|                 | SAM4S Xplained Pro Starter Kit | ATSAM4S-XSTK      |
|                 |                                |                   |
| <b>SAMD5/E5</b> | SAME54 Xplained Pro            | ATSAME54-XPRO     |

#### Xplained Mini Platform

| Product Family | Board                | Part Number    |
|----------------|----------------------|----------------|
| <b>SAMD</b>    | SAMD10 Xplained Mini | ATSAMD10-XMINI |

#### Xplained Ultra Platform

| Product Family | Board                 | Part Number   |
|----------------|-----------------------|---------------|
| <b>SAMV</b>    | SAMV71 Xplained Ultra | ATSAMV71-XULT |

#### Xplained Platform

| Product Family | Board           | Part Number   |
|----------------|-----------------|---------------|
| <b>SAM4</b>    | SAM4S Xplained  | ATSAM4S-XPLD  |
| <b>SAME</b>    | SAME70 Xplained | ATSAME70-XPLD |

#### Legacy Xplained Platform

| Product Family | Board           | Part Number    |
|----------------|-----------------|----------------|
| <b>AVR32</b>   | UC3-A3 Xplained | AT32UC3A3-XPLD |
|                | UC3-L0 Xplained | AT32UC3L0-XPLD |

## Extension Boards

The following Extension Boards are add-on boards for Xplained Pro Kits for expanded functionality.

| Application        | Extension Board                      | Part Number         |
|--------------------|--------------------------------------|---------------------|
| Connectivity       | WINC1500 Xplained Pro (Wi-Fi®)       | ATWINC1500-XPRO     |
|                    | BTLC1000 Xplained Pro (BLE)          | ATBTLC1000-XPRO     |
|                    | Ethernet1 Xplained Pro               | ATETHERNET1-XPRO    |
|                    | Sigfox Extension Board (EU 868 MHz)  | ATA8520-EK6-E       |
|                    | Sigfox Extension Board (US 902 MHz)  | ATA8520-EK3-E       |
|                    | ATWILC1000-SD Evaluation Kit         | ATWILC1000-SD       |
| Touch and Graphics | QT1 Xplained Pro                     | ATQT1-XPRO          |
|                    | QT2 Xplained Pro                     | ATQT2-XPRO          |
|                    | QT3 Xplained Pro                     | ATQT3-XPRO          |
|                    | QT4 Xplained Pro                     | ATQT4-XPRO          |
|                    | QT6 Xplained Pro                     | ATQT6-XPRO          |
|                    | maxTouch® Xplained Pro               | ATMXT-XPRO          |
|                    | QT7 Xplained Pro                     | ATQT7-XPRO          |
|                    | mXT143E Xplained                     | ATmXT143E-XPLD      |
|                    | SLCD1 Xplained Pro                   | ATSLCD1-XPRO        |
| General Purpose    | OLED1 Xplained Pro                   | ATOLED1-XPRO        |
|                    | PROTO1 Xplained Pro                  | ATPROTO1-XPRO       |
|                    | I/O1 Xplained Pro                    | ATIO1-XPRO          |
| Sensors            | BNO055 Xplained Pro                  | ATBNO055-XPRO       |
|                    | Inertial One Sensor Board            | ATAVRBIN1           |
|                    | Pressure One Sensor Board            | ATAVRBPR1           |
|                    | Inertial Two Sensor Board            | ATAVRBIN2           |
|                    | Light and Proximity One Sensor Board | ATAVRBLP1           |
| Security           | CryptoAuth Xplained Pro              | ATCRYPTOAUTH-XPRO-B |

## Programming and Debugging

| Programmer/Debugger | Part Number |
|---------------------|-------------|
| Atmel-ICE           | ATATMEL-ICE |
| SAM-ICE             | AT91SAM-ICE |

## Motor Control PIM

| Product Family | Motor Control Plug-in Module (PIM)           | Part Number |
|----------------|--|-------------|
| SAME70         | ATSAME70 Motor Control Plug In Module (PIM)* | MA320203    |

\*Works with MCHV-2 (DM330023-2) and MCLV-2 (DM330021-2) Motor Control Development Boards

## Reference Designs and Demo Kits

| Product Family | Demo/Reference Design                           | Part Number  |
|----------------|---|--|
| <b>SAMC20</b>  | SAMC20 QTR Demo                                 | ATSAMC20-QTRDEMO   |
| <b>SAMC21</b>  | SAMC21 MCU Card for BLDC 24V Motor Control Kit  | ATSAMC21MOTOR  |
|                | SAMC21 Industrial CAN Touch Demo                | ATSAMC21-XPRO (2x), ATQT1-XPRO (2x)  |
| <b>SAMD20</b>  | SAMD20 QTouch® Robustness Evaluation Kit        | ATSAMD20-QTRDEMO   |
| <b>SAMD21</b>  | BLDC 24V Motor Control Kit                      | ATSAMD21BLDC24V-STK  |
|                | SAMD21E16L Motor Control Card                   | ATSAMD21E16LMOTOR  |
|                | Multifunction Compact Keyboard Reference Design | N/A  |
|                | SAMD21 Blood Pressure Beacon                    | ATSAMD21-XPRO, ATBTLC1000-XPRO   |
|                | SAMD21 - BNO005 (BMF055 9-Axis Sensor)          | ATSAMD21-XPRO, ATBNO055-XPRO   |
|                | Smart Plug Reference Design                     | ATSMARTPLUG-US   |
| <b>SAMG55</b>  | Zero Touch Provisioning kit for AWS IoT         | AT88CKECC-AWS-XSTK-B   |
| <b>SAML10</b>  | Low-power weather station                       | DM320204, ATMBUSADAPTER-XPRO, MIKROE-1978, MIKROE-1630, 1.54 inch e-Paper Module |
|                | Low-power SleepWalking                          | DM320204, ATIO1-Xpro   |
|                | Water-tolerant touch                            | DM320204, ATQT7-Xpro   |
|                | Keypad touch                                    | DM320204, ATQT3-Xpro   |
| <b>SAML11</b>  | Trusted Execution Environment                   | DM320205, ATIO1-Xpro   |
|                | Secure LoRa® IoT node                           | N/A  |
|                | AWS enrollment with Trustonic Kinibi-M          | N/A  |
|                | Water tolerant touch                            | DM320205, ATQT7-Xpro   |
|                | Keypad touch                                    | DM320205, ATQT3-Xpro   |
| <b>SAML21</b>  | Ultra-Low Power Demo with SAML21 and BTLC1000   | ATULPC-DEMO  |
|                | SAML21 Low-Power QTouch Demo                    | ATSAML21-XPRO-B, ATQT3-XPRO, ATPOWERDEBUGGER                                     |
| <b>SAML22</b>  | SAML22 Thermostat IoT Node                      | N/A  |
|                | Connected Wearable Electrocardiogram (ECG) Demo | WearableECG  |
| <b>SAMV71</b>  | Ethernet AVB Demo                               | ATSAMV71-XULT (2x)   |
|                | Wi-Fi® Camera                                   | N/A  |

Note: For availability and/or getting started information, please contact your local Microchip sales office.

# Package Options

| Package    | Size (mm)   | Pin Count |
|------------|-------------|-----------|
| WLCSP      | 1.9 × 2.4   | 20        |
|            | 2.8 × 2.6   | 35        |
|            | 2.7 × 2.7   | 45        |
|            | 2.79 × 2.79 | 32        |
