THE DATASHEET OF

TAS5614PHD2EVM

User's Guide
SLOU285–December 2009

TAS5612/14PHD2EVM

This user's guide describes the operation of the evaluation module for the TAS5614PHD or TAS5612PHD Digital Amplifier Power Output Stages using TAS5518 Digital Audio PWM Processor from Texas Instruments. The user's guide also provides measurement data and design information like schematic, BOM, and PCB layout.

1 Introduction

The TAS5612/14PHD2EVM PurePath™ Premier Pro customer evaluation module demonstrates the integrated circuits TAS5614PHD or TAS5612PHD and TAS5518PAG from Texas Instruments (TI).

The TAS5614PHD and TAS5612PHD is high-performance, integrated Stereo Feedback Digital Amplifier Power Stages designed to drive 4-Ω speakers at up to 150W per channel for TAS5614PHD and 125W per channel for TAS5612PHD . The devices incorporates the TI Equibit™ technology and is designed to be used with TI's Equibit™ modulators. This system only requires a passive demodulation filter to deliver a efficiency, quality audio amplification.

TAS5518PAG is a high performance 32 bit (24 bit input) multi channel PurePath™ Digital Pulse Width Modulator (PWM) based on Equibit™ technology with fully symmetrical AD modulation scheme. The device also has Digital Audio Processing (DAP) that provides 48 bit signal processing, advanced performance and a high level of system integration. The device has interfaces for headphone output and Power Supply Volume Control (PSVC).

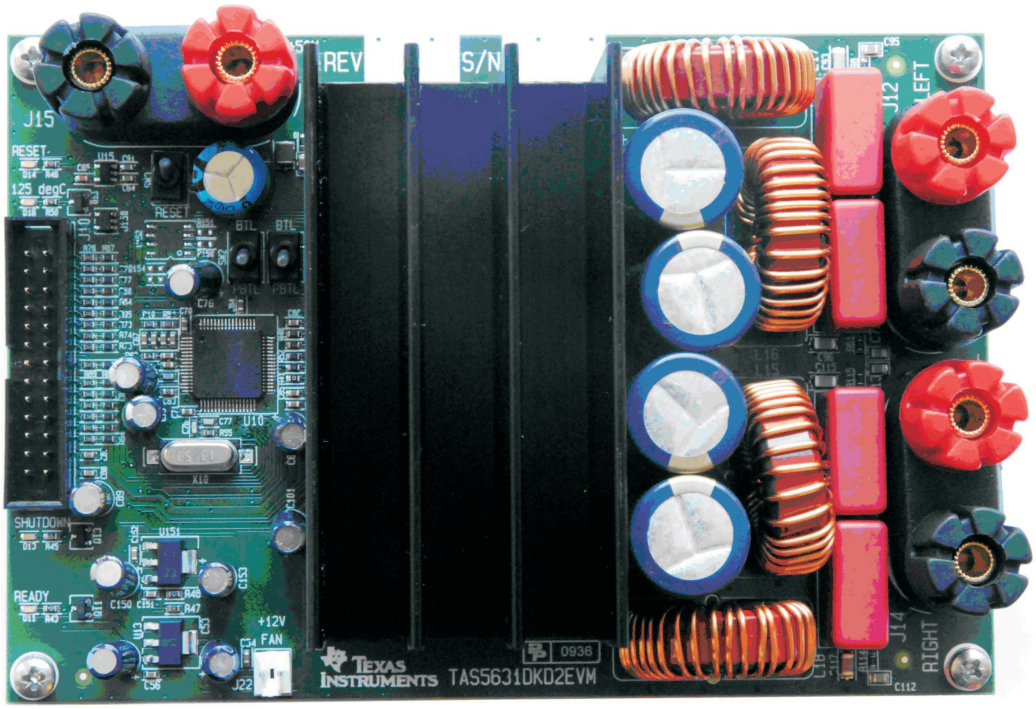
This EVM is configurable to 2 BTL channels for stereo evaluation or 1 PBTL (parallel BTL) channel for subwoofer evaluation.

This EVM, together with a TI input-USB board 2, is a complete stereo digital audio amplifier system which includes digital input (S/PDIF), analog inputs, interface to PC and DAP features like digital volume control, input and output mixers, automute, tone controls, loudness, EQ filters and dynamic range compression (DRC). There are configuration options for power stage failure protection.

Table 1. TAS5612/14PHD2EVM Specification

Key Parameters	Values
TAS5614 Output Stage Supply Voltage	18V - 36V
TAS5612 Output Stage Supply Voltage	16V - 32.5V
Number of Channels	2 x BTL or 1 x PBTL
Load Impedance BTL	4-8 Ohm
Load Impedance PBTL	2-3 Ohm
TAS5614 Output power BTL	150W / 4Ohm / 10%THD+N
TAS5614 Output power PBTL	300 W / 2Ohm / 10%THD+N
TAS5612 Output power BTL	125W / 4Ohm / 10%THD+N
TAS5612 Output power PBTL	250W / 2Ohm / 10%THD+N
Dynamic Range (DNR)	>105 dB
PWM Processor	TAS5518PAG
Output Stage	TAS5614PHD or TAS5612PHD

This document covers EVM specifications, audio performance and power efficiency measurements graphs, and design documentation that includes schematics, parts list, layout, and mechanical design.



Gerber (layout) files are available at: www.ti.com.

The EVM is delivered with cables and Input-USB board 2 to connect to an input source, and be controlled from a PC.

1.1 TAS5612/14PHD2EVM Features

- Stereo PurePath Digital™ evaluation module.
- Self-contained protection system (short circuit and thermal).
- Standard I^2S and I^2C™ / Control connector for TI input board
- Double-sided plated-through PCB layout.

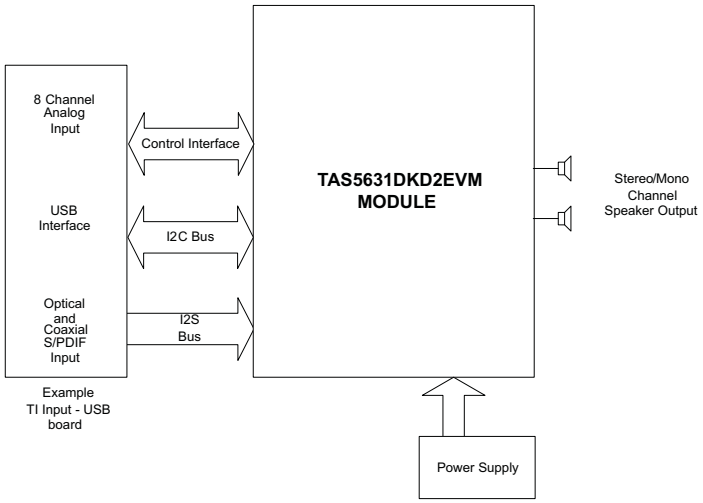


Figure 1. Integrated PurePath Digital™ Amplifier System

1.2 PCB Key Map

Physical structure for the TAS5612/14PHD2EVM is illustrated in Figure 2.

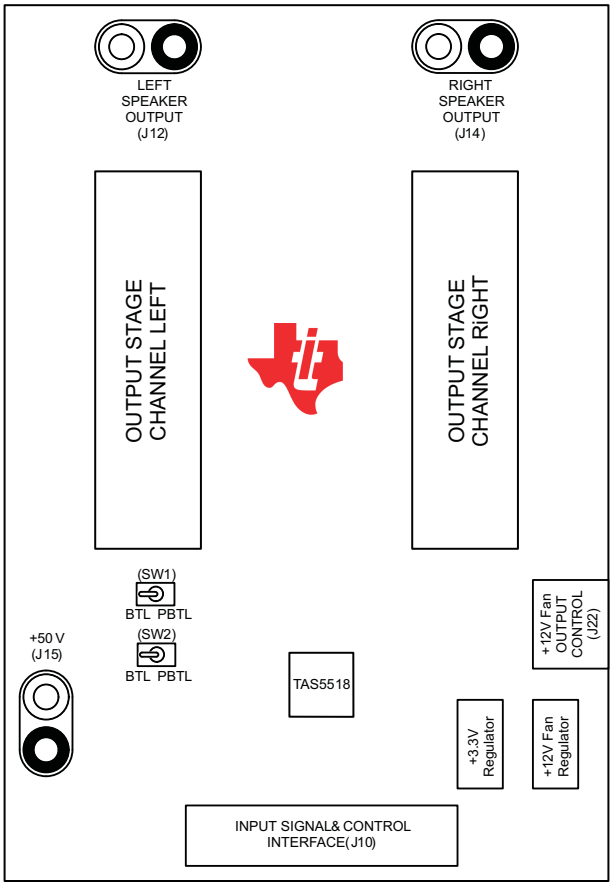

Figure 2. Physical Structure for the TAS5612/14PHD2EVM (Approximate Layout)

2 Quick Setup Guide

This section describes the TAS5612/14PHD2EVM board in regards to power supplies and system interfaces. The section provides information regarding handling and unpacking, absolute operating conditions, and a description of the factory default switch and jumper configuration.

This section also provides a step-by-step guide to configuring the TAS5612/14PHD2EVM for device evaluation.

2.1 Electrostatic Discharge Warning

Many of the components on the TAS5612/14PHD2EVM are susceptible to damage by electrostatic discharge (ESD). Customers are advised to observe proper ESD handling precautions when unpacking and handling the EVM, including the use of a grounded wrist strap at an approved ESD workstation.

CAUTION

Failure to observe ESD handling procedures can result in damage to EVM components.

2.2 Unpacking the EVM

Upon opening the TAS5612/14PHD2EVM package, check to make sure that the following items are included:

- 1 pc. TAS5612/14PHD2EVM board using one TAS5518PAG and one TAS5614PHD or TAS5612PHD.
- 1 pc. TI Input-USB board 2 for interfacing TAS5612/14PHD2EVM with SPDIF/analog sources and PC for control.
- 1 pc. Signal and Control Interface IDC cable for connection to an I^2S front-end like the attached TI Input-USB board 2.
- 1 pc. Cable for connecting Input-USB board 2 to a USB port on a PC for TAS5518 control by software.
- 1 pc. AC to DC External 15 V Power supply (System supply).
- 4 pcs. AC Input Clips for External 15 V Power Supply (US, Europe, UK and Australia).

If any of these items are missing, contact the nearest Texas Instruments Product Information Center to inquire about a replacement.

Connect the Input-micro board 2 to the TAS5612/14PHD2EVM using the delivered IDC cable.

2.3 Power Supply Setup

To power up the EVM, two power supplies are needed. One for system power, logic and gate-drive, and one for output stage supply. H-bridge Power supply is connected to the EVM using banana cables. System Power Supply is supplied from the enclosed External 15 V wall plug adapter.

Table 2. Recommended Supply Voltages

Description	Voltage Range	Current Requirements	Cable
TAS5614 Output stage power supply	18V – 36V	16 A	J15 (marked PVDD)
TAS5612 Output stage power supply	16V - 32.5V	16 A	J15 (marked PVDD)

CAUTION

Applying voltages above the specifications given in Table 2 can cause permanent damage to the hardware.

NOTE: The length of power supply cable must be minimized. Increasing length of PSU cable is equal to increasing the distortion for the amplifier at high output levels and low frequencies.

2.4 Speaker Connection

CAUTION

Both positive and negative speaker outputs are floating and cannot be connected to ground (e.g. through an oscilloscope).

2.5 Output Configuration BTL and PBTL

When changing mode e.g. from BTL to PBTL, make sure that RESET switch SW3 is activated before changing the state of mode switches SW1 and SW2. Switch SW1 and SW2 has to be synchronized in state BTL or PBTL.

In PBTL mode the load has to be connected according to Figure 3:

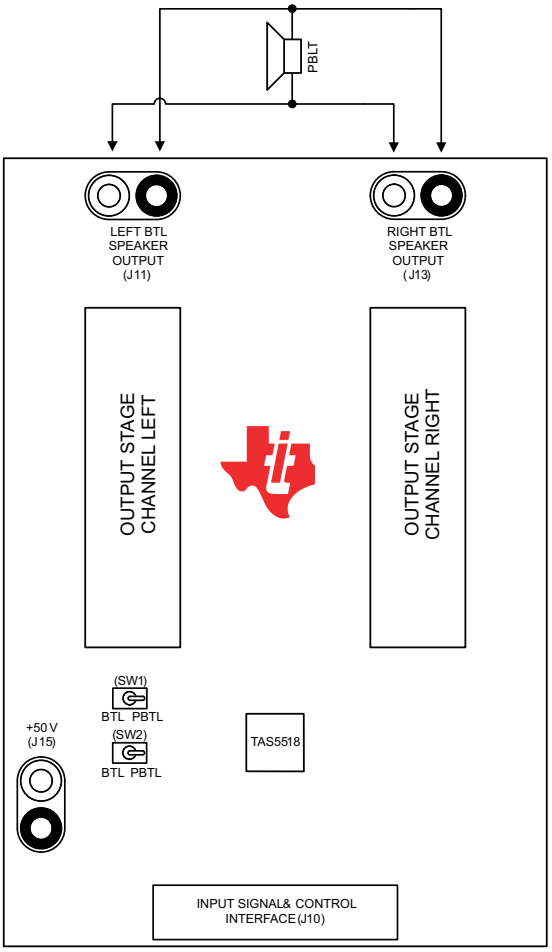

Figure 3. PBTL Mode Configuration

2.6 GUI Software Installation

The TAS5518 GUI provides control of all registers in the TAS5518. To install the GUI, download the GUI setup file and the configuration file "TAS5612/14PHD2EVM Configuration (1.00).cfg" from the TAS5612/14PHD2EVM folder on www.ti.com.

After installation turn on power supplies and connect the USB cable to the Input-USB board 2.

Start the GUI program from windows menu. Start up of the GUI will take a few seconds.

Figure 4. TAS5518 GUI Window

From the files menu load the configuration file:

- TAS5612/14PHD2EVM Configuration (1.00).cfg

The file is located in the EVM folder on the TI website. This file contains all settings for a default setup of the EVM.

For easy access to the file, it is recommended that the user copy the files into the directory where the GUI is installed. The default is C:\Program Files\Texas Instruments Inc\TAS5518\

For more advanced use of the GUI, see the GUI User's Guide and data manual for TAS5518.

3 Protection

This section describes the short-circuit protection and fault reporting circuitry of the TAS5614 and TAS5612 devices.

3.1 Short Circuit Protection and Fault Reporting Circuitry

The TAS5612 and TAS5614 is self-protecting devices that provides fault reporting (including high-temperature protection and short circuit protection). TAS5612 and TAS5614 is configured in back-end auto-recovery mode, and resets automatically after all errors (M1, M2 and M3 is set low), see the data sheets (TAS5612 (SLAS682) or TAS5614 (SLAS680)) for further explanation. The device will re-start itself after an error occasion, and report through the $\overline{SD}$ error signal.

3.2 Fault Reporting

The $\overline{OTW}$ and $\overline{SD}$ outputs from TAS5612/14 indicate fault conditions. see the TAS5612/14 data sheet for a description of these pins.

Table 3. TAS5612/14 Warning/Error Signal Decoding

$\overline{SD}$	$\overline{OTW1}$	$\overline{OTW2}$	Device Condition
0	0	0	High temperature error and/or high current error
0	0	1	Under voltage lockout or high current error. 100°C temperature warning
0	1	1	Under voltage lockout or high current error
1	0	0	125°C temperature warning
1	0	1	100°C temperature warning
1	1	1	Normal operation, no errors/warnings

The shutdown signals together with the temperature warning signal, give the chip state information as described in Table 3. Device fault reporting outputs are open-drain outputs.

4 Related Documentation from Texas Instruments

The following table contains a list of data manuals that have detailed descriptions of the integrated circuits used in the design of the TAS5612/14PHD2EVM. The data manuals can be obtained at the URL http://www.ti.com.

Table 4. Related Documentation from Texas Instruments

Appendix A Design Documents

This appendix comprises design documents pertaining to the TAS5612/14PHD2EVM evaluation module. The documents are presented in the following order.

- Schematic (5 pages)
- Parts List (2 pages)
- PCB Specification (1 page)
- PCB Layers (8 pages)
- Heat sink drawing (1 page)
- Inductor (1 page)

Evaluation Board/Kit Important Notice

Texas Instruments (TI) provides the enclosed product(s) under the following conditions:

This evaluation board/kit is intended for use for **ENGINEERING DEVELOPMENT, DEMONSTRATION, OR EVALUATION PURPOSES ONLY** and is not considered by TI to be a finished end-product fit for general consumer use. Persons handling the product(s) must have electronics training and observe good engineering practice standards. As such, the goods being provided are not intended to be complete in terms of required design-, marketing-, and/or manufacturing-related protective considerations, including product safety and environmental measures typically found in end products that incorporate such semiconductor components or circuit boards. This evaluation board/kit does not fall within the scope of the European Union directives regarding electromagnetic compatibility, restricted substances (RoHS), recycling (WEEE), FCC, CE or UL, and therefore may not meet the technical requirements of these directives or other related directives.

Should this evaluation board/kit not meet the specifications indicated in the User's Guide, the board/kit may be returned within 30 days from the date of delivery for a full refund. THE FOREGOING WARRANTY IS THE EXCLUSIVE WARRANTY MADE BY SELLER TO BUYER AND IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED, IMPLIED, OR STATUTORY, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE.

The user assumes all responsibility and liability for proper and safe handling of the goods. Further, the user indemnifies TI from all claims arising from the handling or use of the goods. Due to the open construction of the product, it is the user's responsibility to take any and all appropriate precautions with regard to electrostatic discharge.

EXCEPT TO THE EXTENT OF THE INDEMNITY SET FORTH ABOVE, NEITHER PARTY SHALL BE LIABLE TO THE OTHER FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES.

TI currently deals with a variety of customers for products, and therefore our arrangement with the user **is not exclusive.**

TI assumes **no liability for applications assistance, customer product design, software performance, or infringement of patents or services described herein.**

Please read the User's Guide and, specifically, the Warnings and Restrictions notice in the User's Guide prior to handling the product. This notice contains important safety information about temperatures and voltages. For additional information on TI's environmental and/or safety programs, please contact the TI application engineer or visit www.ti.com/esh.

No license is granted under any patent right or other intellectual property right of TI covering or relating to any machine, process, or combination in which such TI products or services might be or are used.

FCC Warning

This evaluation board/kit is intended for use for **ENGINEERING DEVELOPMENT, DEMONSTRATION, OR EVALUATION PURPOSES ONLY** and is not considered by TI to be a finished end-product fit for general consumer use. It generates, uses, and can radiate radio frequency energy and has not been tested for compliance with the limits of computing devices pursuant to part 15 of FCC rules, which are designed to provide reasonable protection against radio frequency interference. Operation of this equipment in other environments may cause interference with radio communications, in which case the user at his own expense will be required to take whatever measures may be required to correct this interference.

EVM Warnings and Restrictions

It is important to operate this EVM within the input voltage range of 0 V to 32.5 V for the TAS5612; 0 V to 36 V for the TAS5614. and the output voltage range of 0 V to 32.5 V for the TAS5612; 0 V to 36 V for the TAS5614.

Exceeding the specified input range may cause unexpected operation and/or irreversible damage to the EVM. If there are questions concerning the input range, please contact a TI field representative prior to connecting the input power.

Applying loads outside of the specified output range may result in unintended operation and/or possible permanent damage to the EVM. Please consult the EVM User's Guide prior to connecting any load to the EVM output. If there is uncertainty as to the load specification, please contact a TI field representative.

During normal operation, some circuit components may have case temperatures greater than 90°C. The EVM is designed to operate properly with certain components above 125°C as long as the input and output ranges are maintained. These components include but are not limited to linear regulators, switching transistors, pass transistors, and current sense resistors. These types of devices can be identified using the EVM schematic located in the EVM User's Guide. When placing measurement probes near these devices during operation, please be aware that these devices may be very warm to the touch.

TAS5614PHD2EVM
PCB SPECIFICATION
Version 1.00

BOARD IDENTIFICATION:	A859-PCB-001(1.00)
BOARD TYPE:	DOUBLE-SIDED PLATED-THROUGH BOARD
LAMINATE TYPE:	FR4
LAMINATE THICKNESS:	1.6mm
TOP LAYER COPPER THICKNESS:	70µm (INCL. PLATING EXTERIOR LAYER)
BOTTOM LAYER COPPER THICKNESS:	70µm (INCL. PLATING EXTERIOR LAYER)
COPPER PLATING OF HOLES:	>25µm
MINIMUM HOLE DIAMETER	0.3 mm
SILKSCREEN COMPONENT SIDE:	WHITE - REMOVE SILKSCREEN FROM SOLDER AREA & PRE-TINNED AREAS
SILKSCREEN SOLDER SIDE:	None
SOLDER MASK COMPONENT SIDE:	GREEN
SOLDER MASK SOLDER SIDE:	GREEN
PROTECTIVE COATING:	SOLDER COATING AND CHEMICAL SILVER ON FREE COPPER
ELECTRICAL TEST:	PCB MUST BE ELECTRICAL TESTED
MANUFACTURED TO:	PERFAG 2E (www.perfag.dk)
APERTURE TABLE:	PERFAG 10A (www.perfag.dk)
BOARD SIZE:	95 x 142 mm
Aprox. Number of holes	468
COMMENTS:	SEE DRILL INFORMATION FILE (A859-PCB-001(1.00).pdf)

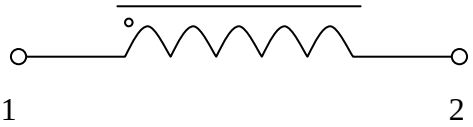
Company Confidential
Inductor Specification

DWG no.: TIC-INDC-020(1.00)

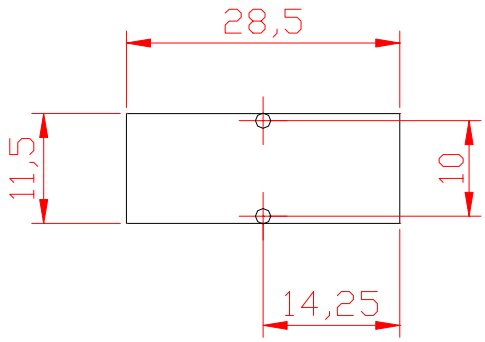
Text: 10µH / 5A / 30mΩ

Diagram:

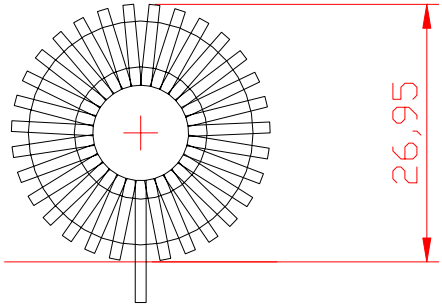


Material: Core: Micrometals T94-2
Wire: ø1.00mm Cu, one layer lacquer, 155°C

Foot-print top view



Mechanical:



Lead length: 8mm-12mm, stripped and pre-tinned.

Production: Step 1: N1, 35 turns ø1.00mm cu 2L, start 1, end 2
Step 2: bend and strip/pre-tin leads.

Test: Inductance: pin 1 –2 9 – 11 µH @ 0.1Vrms/10kHz

Release date: 2005-04-12, Jonas Svendsen / Kim Madsen

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
