LUXEON M

Brightest, most uniform and highest efficacy multi-die emitter

LUXEON M is an illumination grade multi-die LED designed to enable outdoor and industrial applications targeting either high efficiency or low cost. With *Freedom from Binning* and leading performance, LUXEON M falls within a single 3- or 5-step MacAdam ellipse centered in ANSI to ensure color consistency from LED to LED, delivering high efficacy and high flux density from a uniform source with tight correlated color temperature control. The superior quality of light, volume of lumens, and real world efficacy enable leading performance and efficient solution development in a wide variety of lighting segments.

FEATURES AND BENEFITS

- Uniform image enables tight beam control in MR16 and spotlight applications
- High flux density from a 3mm^2 area enables reduced emitter count and compact fixture designs
- 11.2V and 5.6V package options puts high performance within reach with high efficiency and low cost drivers
- Leading thermal resistance allows flexible system design to optimize for lm/$ and lm/W
- Exceeds ENERGY STAR® lumen maintenance requirements

PRIMARY APPLICATIONS

- Architectural
- High Bay & Low Bay
- Lamps
- Outdoor
- Specialty Lighting
- Spotlights

General Product Information

Product Test Conditions

LUXEON M LEDs are tested and binned with a DC drive current of 700mA for LUXEON M 12V and 1400mA for LUXEON M 6V at a junction temperature, T_j, of 85ºC.

Part Number Nomenclature

Part numbers for LUXEON M follow the convention below:

L X R **A – B C D D – E E E E**

Where:

- **A** – designates minimum CRI (7=70, 8=80, 9=90, 0=Royal Blue)
- **B** – designates voltage (S=12V, R=6V)
- **C** – designates color (W=White, R=Royal Blue)
- **D D** – designates CCT (27=2700K, 30=3000K, 35=3500K, 40=4000K, 50=5000K, 57=5700K, 65=6500K, 00=Royal Blue)
- **E E E E** – designates minimum luminous flux (optional) (example: 1040=1,040 lumens, 0000=full distribution)

Therefore, the following part number is used for a white LUXEON M 12V, 3000K 80CRI, full distribution LED:

L X R **8 – S W 3 0 – 0 0 0 0**

Lumen Maintenance

Please contact your local Sales Representative or Lumileds Technical Solutions Manager for more information about the long-term performance of this product.

Environmental Compliance

Lumileds LLC is committed to providing environmentally friendly products to the solid-state lighting market. LUXEON M is compliant to the European Union directives on the restriction of hazardous substances in electronic equipment, namely the RoHS Directive 2011/65/EU and REACH Regulation (EC) 1907/2006. Lumileds LLC will not intentionally add the following restricted materials to its products: lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE).

Notes for Table 4:
1. See Figure 1 for more details on the maximum permissible operating conditions for LUXEON M White.
2. Residual periodic variations due to power conversion from alternating current (AC) to direct current (DC), also called "ripple", are acceptable if the following conditions are met:
   – The frequency of the ripple current is 100Hz or higher
   – The average current for each cycle does not exceed the maximum allowable DC forward current at this junction temperature
   – The maximum amplitude of the ripple does not exceed 15% of the maximum allowable DC forward current at this junction temperature
3. At 10% duty cycle with pulse width of 10ms.

Product Bin and Labeling Definitions

Decoding Product Bin Labeling

In the manufacturing of semiconductor products, there are variations in performance around the average values given in the technical datasheet. For this reason, Lumileds bins LED components for luminous flux or radiometric power, color point, peak or dominant wavelength and forward voltage.

Reels with LUXEON M White LEDs are labeled using a 4-digit alphanumeric CAT code following the format below:

A B C D

Where:

- **A** – designates luminous flux bin (example: M=630 to 680 lumens, T=970 to 1040 lumens)
- **B** – designates color bin (example: 1=6500K, 2=5700K, 3=5000K, 5=4000K, 6=3500K, 7=3000K, 8=2700K)
- **C** – designates color space (example: 5=5-step MacAdam Ellipse, 3=3-step MacAdam Ellipse)
- **D** – designates forward voltage bin (example: F=10.50 to 11.00V, G=11.00 to 11.50V, H=11.50 to 11.70V for 12V parts)

Therefore, a white LUXEON M LED with a lumen range of 630 to 680 lumens, 3000K color bin, 5-step MacAdam ellipse and a forward voltage range of 10.50V to 11.00V for 12 volt parts has the following CAT code:

M 7 5 F

Reels of LUXEON M Royal Blue LEDs are labeled using a 3-digit alphanumeric CAT code following the format below:

A B C

Where:

- **A** – designates radiometric power bin (example: B=4200 to 4400mW, D=4600 to 4800mW)
- **B** – designates dominant wavelength bin (example: 5=450 to 455nm, 6=455 to 460nm)
- **C** – designates forward voltage bin (example: F=10.50 to 11.00V, G=11.00 to 11.50V, H=11.50 to 11.70V for 12V parts)

Therefore, a Royal Blue LUXEON M LED with a radiometric power range of 4200 to 4400mW, dominant wavelength of 450 to 455nm and a forward voltage range of 11.50 to 11.70V for 12 volt parts has the following CAT code:

B 5 H

Luminous Flux Bins

Table 5 lists the standard photometric luminous flux bins for LUXEON M emitters. Although several bins are outlined, product availability in a particular bin varies by production run and by product performance. Not all bins are available in all CCTs.

About Lumileds

Companies developing automotive, mobile, IoT and illumination lighting applications need a partner who can collaborate with them to push the boundaries of light. With over 100 years of inventions and industry firsts, Lumileds is a global lighting solutions company that helps customers around the world deliver differentiated solutions to gain and maintain a competitive edge. As the inventor of Xenon technology, a pioneer in halogen lighting and the leader in high performance LEDs, Lumileds builds innovation, quality and reliability into its technology, products and every customer engagement. Together with its customers, Lumileds is making the world better, safer, more beautiful—with light.
