Introduction to Knowles Precision Devices

Knowles Precision Devices is a premier global source for Capacitors, RF Filters, EMI Filters, Resonators, non-magnetic components and advanced dielectric materials.

An umbrella for the brands of Compex, DLI, Johanson MFG, Novacap, Syfer and Voltronics, Knowles Precision Devices serves a variety of markets including: military, aerospace/avionics, medical equipment, implantable devices, EMI and connector filtering, oil exploration, instrumentation, industrial electronics, automotive, telecoms and data networks.

Recommended Tuning Tools

Ceramic Tipped: TT-400

Ceramic Tipped: TT-900

The Thin-Trim® 9401 Series capacitors are an advanced development in miniaturized trimmers for applications in circuits where size and performance are critical. These one-half turn ceramic capacitors feature high Q performance up to 2GHz and beyond.

The 9401 Series construction incorporates a butterfly electrode pattern which provides a series parallel capacitor with extremely low ESR and ESL. Johanson's square drive tuning mechanism insures captive, non-slip, tamper-proof adjustments eliminating backlash problems.

Characteristics

Rated voltage: 250 VDC (test voltage 500 VDC)

- Insulation resistance: $>10^4$ M Ω
- Operating temperature range: -55°C to +125°C
- Torque: 0.05 to 0.5 oz. in.
- Vibration: 15g, 10-2000 Hz
- Shock: 100g, 6 milliseconds
- Setting drift: $<1\%$
- Moisture resistance: MIL-STD-202, Method 106
- Resistant to soldering heat: MIL-STD-202, Method 210, Test C
- Solderability: MIL-STD-202, Method 208
- Resistant to cleaning solvents: MIL-STD-202, Method 215

JMC Square Drive Tuning Tool 4192

Applications

- RF amplifier
- LC Filters and Networks
- Broadband Wireless LAN
- Medical Devices
- Cordless and Cellular phones
- DR/Crystal Oscillator
- Microstrip line filters

Packaging

Tape and reel available for SL products
Add suffix to JMC P/N for reel packaging
R1 = 1500 pieces, R4 = 6000 pieces

Series	Housing Size	Capacitance	Tuning Resolution	Min. Q @ 100 MHz	Color Code	Drawing Figure

Thin-Trim® 9402 & 9410 Series capacitors are an advanced development in miniaturized trimmer capacitors for applications in circuits where size and performance are critical.

The Thin-Trim® capacitor embodies a radical reduction in size and weight over standard ceramic capacitors, with a proportional improvement in electrical characteristics. The capacitor consists of a metallic rotor suspended under spring pressure between two metalized dielectric disks. In addition to physically securing the assembly, the springs serve as both the internal electrical connection and the external terminals, simplifying the construction and further reducing size. The incorporation of the Johanson square drive tuning mechanism insures captive, non-slip, tamper-proof adjustments which are not subject to backlash problems associated with screwdriver type adjustments.

Characteristics

Rated voltage: 250 VDC (test voltage 500 VDC)

- Insulation resistance: $>10^4$ M Ω
- Operating temperature range: -55°C to +125°C
- Torque: 0.05 to 1.0 oz. in.
0.2 to 2.0 oz. in. for 9410
- Vibration: 15g, 10-2000 Hz
- Shock: 100g, 6 milliseconds
- Setting drift: <1%
- Moisture resistance: MIL-STD-202, Method 106
- Resistant to soldering heat: MIL-STD-202, Method 210, Test C
- Solderability: MIL-STD-202, Method 208
- Resistant to cleaning solvents: MIL-STD-202, Method 215

Cera-Trim® is a high performance surface mount trimmer capacitor designed specifically to withstand harsh environments. These capacitors deliver exceptional performance through microwave frequencies at operating temperatures of -55°C to +125°C. The square drive tuning mechanism provides and assures complete compatibility with automated tuning devices for positive non-slip tamper-proof adjustments.

The Cera-Trim® design makes it possible to utilize tape and reel. The alumina housing provides mechanical strength with outstanding electrical and heat resistant properties. The rugged construction renders it resistant to penetration of solder fluxes and cleaning solvents. Recommended handling instructions outlining soldering procedures are available in Johanson specification R-360.

Characteristics

Rated voltage: 250 VDC (test voltage 500 VDC)

- Insulation resistance: $>10^4$ MΩ
- Operating temperature range: -55°C to +125°C
- Vibration: 15g, 10-2000 Hz, MIL-STD-202, Method 204, Condition B
- Shock: 100g, 6 milliseconds, MIL-STD-202, Method 213, Condition I
- Moisture resistance: MIL-STD-202, Method 106
- Resistant to soldering heat and flux: 260°C for 10 seconds
- Solderability: MIL-STD-202, Method 208
- Withstands up to 5 minutes total immersion in typical cleaning solvents at room temperature
- Conforms with specification MIL-C-81
- RoHS compliant Series

JMC Square Drive Tuning Tool 4192 for 2320 & 2322 Series

Packaging

Add suffix to JMC P/N for reel packaging
R1 = 500 pieces, R2 = 2,500 pieces

Applications

- RF amplifier
- LC Filters and Networks
- Broadband Wireless LAN
- Medical Devices
- Cordless and Cellular phones
- DR/Crystal Oscillator
- Microstrip line filters

The Seal-Trim® is a high performance Thin-Trim® trimmer ceramic capacitor encapsulated in a polymer housing. This design resists intrusion of dirt, dust, solder flux and cleaning agents during assembly and atmospheric contamination during use. These capacitors offer low drift rates and high Q, making them ideal for higher frequency applications beyond the limits of ordinary ceramic trimmer capacitors. The incorporation of the Johanson square drive tuning mechanism insures captive non-slip, tamper-proof adjustments which are not subject to backlash problems associated with screwdriver type adjustment slots.

Characteristics

Rated voltages:

250 VDC (test voltage 500 VDC) for 9610, 9620, 9810 & 9820
 400 VDC (test voltage 800 VDC) for 9694

- Insulation resistance: $>10^4$ MΩ
- Operating temperature range: -55°C to +125°C
- Torque: 0.2 to 2.0 for 9610, 9694
0.05 to 1.0 for 9620
- Vibration: 15g, 10-2000 Hz, MIL-STD-202, Method 204
- Shock: 100g, 6 milliseconds, MIL-STD-202, Method 21
- Setting drift: <1%; <2% for 9616, 9694
- Moisture resistance: MIL-STD-202, Method 106
- Resistant to soldering heat: MIL-STD-202, Method 210, Test C
- Solderability: MIL-STD-202, Method 208

- Resistant to cleaning solvents: MIL-STD-202, Method 215
- RoHS compliant Series

JMC Drive Tuning Tool 4193 for 9610, 9620, 9810 & 9820 Series

Insert "I" in Part Number, i.e. AIT10L

The only internally sealed Air Trimmer

Voltronics' concentric ring Air Trimmer capacitors are designed for use at frequencies up to 1.5 GHz. They are ideal for applications such as mobile radios, aerospace communication, crystal oscillators and filters, radar, cable TV and innumerable other commercial and military programs. The unique internal O-ring seal make wave soldering and vapor degreasing possible without the need to attach a separate cap.

"A" Series - Solder sealed and qualified to MIL-C-14409.

Other features include:

- Ten full linear turns
- Internal stops
- Extreme stability under shock and vibration
- Screw head does not move in and out
- Extended shaft option of metal or plastic
- Long life with no dynamic tuning noise

Note:

All parts shown here can be ordered as non-magnetic: Add "NM" to Part Number, i.e., NMAP10

General Specifications	A_5	A_10	A_14

Recommended Tuning Tool: TT-100 or TT-500

Air Dielectric Variable Trimmers

Description

- Concentric tubular design
- Torque mechanism insures low ESR and low dynamic noise resulting in high Q
- Available in PC, panel mount, vertical mount and surface mount terminations
- High Reliability testing available

Characteristics

- Rated voltage: 250 VDC (5300 series 500 VDC)
- Insulation resistance: $>10^6$ M Ω @ 500 VDC
- Contact resistance: $<.01$ Ω
- Operating temperature: -65°C to $+125^{\circ}\text{C}$
- Vibration: 60g, 10-2000 Hz
- Shock: 1500g, .5 milliseconds
- 574°F solder used in construction

Note: The use of a Johanson tuning tool is recommended. Improper screwdriver size will cause internal thread damage.

Applications

- RF amplifiers and oscillators
- Impedance matching
- Interstage coupling
- Filter tuning
- Crystal trimming

Non-Magnetic Air Trimmers

Description

- Non-Magnetic construction
- High stability and Q
- 250 VDC working voltage
- Utilizes self-locking constant torque drive mechanism

Recommended Tuning Tool

* 5862 & 5762 are supplied with a round nut instead of a hexagon.

Note: All Air Trimmers are available with or without hardware. Hardware may be purchased separately.

PTFE Trimmers - A1 Series

The Voltronics A1 Series of high reliability solid dielectric trimmer capacitors is an ideal economical replacement for conventional miniature air and sapphire dielectric trimmers and assures no intermittent noiseless performance.

High reliability solid dielectric, positive tuning stops and up to 13 full turns of linear tuning make the A1 Series an outstanding performer: 40 psi sealed, high voltage and non-magnetic versions are readily available.

Options

The "HV" Option - high voltage applications: Add "HV" to the part number, i.e., A1T4HV.

Specifications are as follows:

Capacitance	DC Volts Working	DC Volts Withstanding
4pF	1,000	2,000
8pF	500	1,000
11pF	500	1,000

Non-Magnetic Option:

Most parts shown can be ordered as non-magnetic. Add "NM" to the part number, i.e., NMA1J8.

Sealed Option:

All parts shown can be ordered as 40 psi sealed. Add "S" to the part number, i.e., A1M4S.

Tape & Reel Options:

Consult Factory - M & J style only
Recommended Tuning Tool: TT-400

General Specifications	A1_4	A1_8	A1_12
Capacitance Range	0.5 to 4pF	0.5 to 8pF	0.6 to 11pF
DC Working Voltage	250	125	125
DC Withstanding Voltage	500	250	250
Self-Resonant Frequency*	2.3 GHz at 4pF	1.7 GHz at 8pF	1.2 GHz at 11pF
Number of Turns	7	7	13
Q (min) at 100 MHz @ Max. C*	4000	3000	2000
Temperature Coefficient	0±50 ppm/°C	0±100 ppm/°C	0±150 ppm/°C
Insulation Resistance @ 25° C	10 ⁶ MΩ		
Operating Temperature	-65°C to +125°C		
Tuning Torque	0.3 to 1.0 in - oz		
Shock	1,500g, 0.5 millisecs.		
Vibration	50g at 10 - 2000 Hz		

* Self-resonant frequency and Q are assured with no terminals on parts.

Miniature PTFE Trimmers - A4 Series

The Voltronics A4 Series unique design using minimal parts simplifies the manufacturing process to effect one of the most economical high performance trimmer capacitors available in the industry.

The Voltronics A4 Series also features a high reliability solid dielectric, positive tuning stops and up to 5 full turns of linear tuning in the shortest length of any similar trimmer capacitor. The Voltronics A4 is an ideal choice for tuning and impedance matching, high frequency and high power amplifier circuits.

Options

The "HV" Option - high voltage applications:
Add "HV" to the part number, i.e., A1T4HV.

Specifications are as follows:

Part No.	DC Volts Working	DC Volts Withstanding
A4_3 HV	500	1,000
A4_5 HV	500	1,000

Non-Magnetic Option -

All parts can be ordered as non-magnetic. Add "NM" to the part number, i.e. NMA4J3

Tape and Reel Options: Consult Factory - M style only

SD Option -

For applications requiring high reliability but lower voltage

Part No.	Working Voltage	Withstanding Voltage
K_1SD	250	500
A or K_4SD	250	500
A_25SD	125	250
A_30*	250	500
A_40SD	250	500
A_55SD	125	250

Note: A_30 not available in high voltage configuration

General Specifications	A4_3	A4_5
Capacitance	0.45 to 3pF	0.6 to 5pF
DC Working Voltage	125	125
DC Withstanding Voltage	250	250
Self-Resonant Frequency*	3 GHz at 3pF	1.8 GHz at 5pF
Number of Turns	4	5
Q (min) at 100 MHz @ Max. C*	3000	2000
Temperature Coefficient	0±100 ppm/°C	0±300 ppm/°C
Insulation Resistance @ 25° C	10 ⁶ MΩ	
Operating Temperature	-65°C to +125°C	
Tuning Torque	0.3 to 1.0 in - oz	
Shock	1,500g, 0.5 millisecs.	
Vibration	50g at 10 - 2000 Hz	

* Self-resonant frequency and Q are assured with no terminals on parts.

The only internally sealed High Voltage PTFE trimmer

Voltronics' concentric ring PTFE dielectric trimmer capacitors are designed for use at frequencies up to 1.5 GHz. They are ideal for HIGH VOLTAGE applications. The solid internal PTFE dielectric prevents ionization, a major advantage in space, high altitude and high voltage applications. The unique internal O-ring seal makes wave soldering and vapor degreasing possible without the need to attach a separate cap.

General specifications	A_4HV	A_10 HV	A_15 HV	A_25 HV
Capacitance Range	1 to 4pF	1 to 10pF	1 to 16pF	1 to 23pF
DC Working	1000	1000	1000	750
DC Withstanding	2000	2000	2000	1500
Q (min) at 100MHz @ Max. C*	2000	2000	2000	2000
Temperature Coefficient - 0±100ppm/°C	-50±50 ppm/°C	-50±50 ppm/°C	50±50 ppm/°C	-50±50 ppm/°C

Tuning Torque	.05 to 5.0 in-oz	.05 to 5.0 in-oz	.05 to 5.0 in-oz	.05 to 5.0 in-oz
Shock	1,500g, 0.5 millisecons.	1,500g, 0.5 millisecons.	1,500g, 0.5 millisecons.	1,500g, 0.5 millisecons.
Vibration	50g at 10-2000 Hz	50g at 10-2000 Hz	50g at 10-2000 Hz	50g at 10-2000 Hz

* Self-resonant frequency and Q are assured with no terminals on parts.

Extended Range

General specifications	A_40HV	A_55HV
Capacitance Range	1.5 to 40pF	1.5 to 55pF
Q (min) at 100MHz @ Max. C*	2000	-
Q (min) at 75MHz @ Max. C*	-	780
Temperature Coefficient	0±100 ppm/°C	0±100 ppm/°C
Insulation Resistance @ 25°C	10 ⁶ MΩ	10 ⁶ MΩ
Seal	40 pounds/in ²	40 pounds/in ²
Operating Temperature	-65°C to +125°C	-65°C to +125°C
Rotational Life	600 Turns	600 Turns
Tuning Torque	.05 to 5.0 in-oz	.05 to 5.0 in-oz
Shock	1,500g, 0.5 millisecons.	1,500g, 0.5 millisecons.
Vibration	50g at 10-2000 Hz	50g at 10-2000 Hz
DC Working Voltage	1000	600
DC Withstanding Voltage	2000	1200

* Self-resonant frequency and Q are assured with no terminals on parts.

Extended metal shaft option: Add "E" to Part Number, i.e., AT40SDE

Other features include:

- Ten or 29 linear turns
- Internal stops
- Extreme stability under shock & vibration
- Screw head does not move in and out
- Extended shaft option of metal or plastic
- Long life with no dynamic tuning noise

Options

Non-Magnetic Option: All parts can be ordered as non-magnetic. Add "NM" to the part number, i.e. NMAT25HV, NMKP10HV.

Extended Shaft Options:

Add "E" to the part number, i.e. AT10HVE.

Extended Plastic Shaft Options:

Add "EI" to the part number, i.e. EF10HVEI.

SD Option:

For applications requiring high reliability but lower voltage.

Part No.	Working Voltage	Withstanding Voltage

Very High Voltage PTFE Trimmers

This range of Voltronics trimmer capacitors provides a further extension in voltage rating to the HV range. Working voltage is 2kV and dielectric withstand voltage is 4kV. The solid internal PTFE dielectric prevents ionization, a major advantage in space, high altitude and high voltage applications. The unique internal O-ring seal makes wave soldering and vapor degreasing possible without the need to attach a separate cap.

General Specifications	A_10-4	A_20-4

Options:

Extended metal shaft.
Add 'E' to the part number i.e. AT10-4E

Dimensions

Note: For Non-Magnetic parts add 'NM' to part number, i.e. NMAT10-4

4kV to 10kV

Voltronics NMNT Series of PTFE trimmers are designed for applications requiring greater capacitance and voltage ratings than the popular smaller trimmers but without the large size and expense of vacuum capacitors.

The NMNT Series offers:

- High voltage
- Non-rotating piston, long life and no tuning noise
- Extremely stable under shock and vibration
- Screw head does not move in and out

Proven RF performance and power handling these high performance trimmer capacitors are utilized in MRI body coils, NMR equipment and RF power transfer applications.

Part Number	DC Working Voltage	DC Withstanding Voltage	Capacitance (pF) <	Capacitance (pF) >	"A" Dim ±.06	"B" Dim ±.06

Description

- Sapphire dielectric
- Ceramic dielectric
- Zirconia High K dielectric
- High Q
- 500 VDC working voltage
- Select part numbers available on tape and reel
- Utilizes the same constant torque drive mechanism as Johanson air capacitors and tuning elements

Characteristics

- Rated voltage: 500 VDC
- Insulation resistance: $>10^6$ M Ω @ 500 VDC
- Rotational life exceeds Mil-C-14409
- Contact resistance: $<.01$ V
- Operating temperature: -65°C to $+125^{\circ}\text{C}$
- Self resonant frequency: >12 GHz
- Vibration: 60g, 10-2000 Hz
- Shock: 100g, 6 milliseconds

Applications

- Impedance matching
- Crystal trimming
- Interstage coupling
- Base station amplifier

JMC Drive Tuning Tool 8762

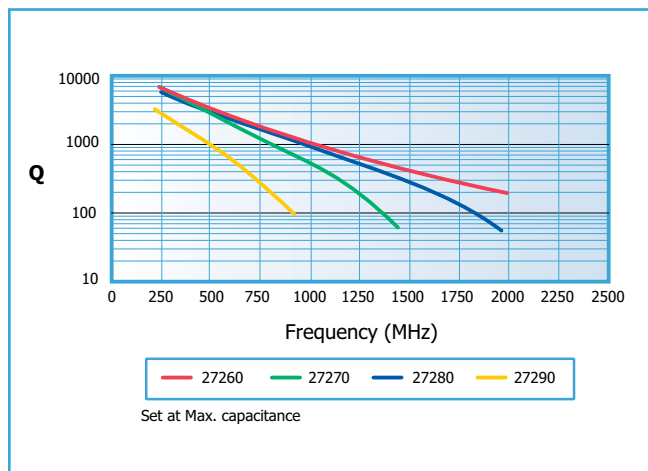

JMC Drive Tuning Tool 8766

Note: The use of a Johanson tuning tool is recommended. Improper screwdriver size will cause internal thread damage.

Non-Magnetic Sapphire Trimmer - V9000

The V9000 trimmer capacitor is a unique design: truly sub miniature at just 0.64" (16.3mm) in length but offers the highest working voltage rating of 2kV and capacitance value, up to 12pF, available in its size.

Using a Sapphire dielectric, for its ideal dielectric constant, it is extremely stable, is chemically inert, moisture resistant and mechanically strong. Recently launched, additional features are still under development, contact Voltronics for our usual custom modifications and adaptations.

General specifications	
Capacitance Range	1.0pF to 12.0pF Typical
DC Working Voltage @ 12.0pF	2000V
DC Withstanding Voltage @ 12.0pF	3000V
Q Factor @ 100 MHz & 12.0 pF	3000 Min
Insulation Resistance	105 MΩ @ 25°C
Temperature Coefficient	500 ± 200 ppm/°C
Mechanical specifications	
Tuning Torque	0.5 in oz to 3.0 in oz
Rotational Life	600 Turns Min
Construction	Non-Magnetic
Environmental	
Operating Temperature	-55°C to +125°C
RoHS Compliant	

Dimensions

Part No.	DC Working Voltage	DC Withstanding Voltage	Capacitance (pF) <	Capacitance (pF) >
V9000	2000V	3000V	1	12

V9000 cutaway

Solder pad layout

Design Features

The unique Voltronics non-rotating precision trimmer capacitor design offers the following advantages over conventional rotating types:

- Linear tuning with no reversals
- A true high frequency device with high Q's, low RF losses, low constant inductance and high self-resonant frequencies
- A superior seal because the screw head and O-ring do not move in and out
- Greater life - 10,000 cycles minimum
- Much smaller sealed MIL sizes
- Ability to provide extended metal or plastic shafts

Dielectric

The dielectric is a tube which has been precision drawn in a vacuum so that its inner diameter is held within $\pm 0.0002"$. The choices are:

- 1. Annular Band Glass:** A solid tube of a specially selected formulation of glass which is metallized on the outside.
- 2. Embedded Band Glass:** Two tubes of glass fired together with a metallized silver band embedded between them. The inner tube is only 0.005" thick to provide much higher capacitance values.
- 3. Quartz:** A pure-grade silicon oxide offering higher Q and voltage ratings in each size with the trade-off of lower capacitance and higher cost.

General Specifications

(where not specified on detail pages)

Piston Action

Non-rotating.

Blind Hole Tuning

Screw head does not move in and out.

Linearity

$\pm 1\%$ with no capacitance reversals.

Resolution

#2-72 tuning screw for fine tuning - approximate pico-farads per turn in active tuning range:

- | | |
|--------------------------------|-------------|
| 1. Annular band glass | 0.6 to 0.8 |
| 2. Embedded band glass | 2.3 to 3.0 |
| 3. Quartz | 0.3 to 0.36 |
| 4. "H" Series high range glass | 3.9 to 4.2 |

Insulation Resistance

Annular band glass and quartz:
 10^6 M Ω at 25°C to 125°C

Embedded band glass:
 10^6 M Ω at 25°C
 10^5 M Ω at 125°C

Tuning Torque

1 to 8 inch ounces.

Life

Over 10,000 cycles.

Temperature Coefficient

Annular Band Glass: ± 50 ppm/°C
 Embedded Band Glass: ± 150 ppm/°C
 Quartz: 0 to +50 ppm/°C

Dielectric Withstanding Voltage

Twice DC working voltage (listed with each part).

Capacitance Tuning Range

From below minimum to above maximum value listed for each part. Capacitance measured at 1 MHz on Boonton Electronics 7600 bridge using Voltronics V1265 guarded test jig. AM measurements taken with leads perpendicular to unit regardless of final configuration.

Temperature Range

All glass dielectrics: -55°C to 125°C
 Quartz dielectric: -55°C to 150°C

Other Specifications

All other specifications including vibration, shock, moisture and seal (where applicable) per MIL-C-14409D.

Drawing Tolerances (where not specified)

Decimal: XXX $\pm 0.016"$
 XX $\pm 0.03"$

Quality Factor

Recommended Tuning Tools: TT-100 or TT-600

Smallest Sealed Glass Trimmers - S Series

The PC17 styles are the only vertically mounted glass trimmers in MIL-C-14409D.

Voltronics "S" Series are up to 40% shorter with 25% more range than any other sealed standard glass RC trimmers. The use of Voltronics' unique non-rotating piston design provides linear tuning, high "Q", long life, and high self-resonant frequencies. The O-ring seal assures protection up to 40 p.s.i. against dust, moisture, flux, solder, and cleaning solvents.

Dielectric	Capacitance Range (pF)		Q (Min.) at 1 MHz	Horizontal Mount Figure 1		Vertical Mount* Figure 2		Surface Mount Figure 3		
	From Below	To Above		Type	A ± .06	B ± .03	Type	X ± .03	Type	X ± .03
EMBEDDED BAND GLASS	1.5	10	800	SP10	.370	.300	SF10A	.340	SM10	.340

	1.5	30	800	SP30	.520	.450	SF30A	.490	SM30	.490
	1.5	40	800	SP40	.630	.560	SF40A	.600	SM40	.600

"Y" dimension-standard - .040". For non-standard, change "A" in type number to "B" for .063" or "C" for .093".

*SF styles available with dual leads from top similar to AF styles on page 14.

General specifications on page 34 apply except:

1. DC Working Voltage: 250
2. Tuning torque: 0.5 to 5 inch ounces
3. Tolerance: XXX ± .005

Extended Range Glass Trimmers - H Series

The "H" Series increases the standard maximum capacitance values of Voltronics' glass trimmer capacitors by almost 100%. This is achieved by a new and unique technique which makes the wall of the inner glass tube thinner than was previously possible.

General specifications for the "H" Series are the same as those of standard embedded band glass trimmers (see Page 34) with the following exceptions:

DC Working Voltage: 125
Temperature Coefficient: -150 ± 150 ppm/°C

General specifications on Page 34

These ranges are panel mount versions of Voltronics' glass and quartz dielectric trimmers. Available sealed or unsealed in Annular Band Glass, Embedded Band Glass and Quartz, the capacitance values are significant, up to 180pF max with 178pF of tunable range. All three dielectric options are also available in MIL Std versions featuring PC38, PC39 and PC48 designations.

Differential Glass Trimmers

For a differential trimmer capacitor, the capacitance of one element increases while the other decreases, with the sum remaining approximately constant.

DIFFERENTIAL STYLES

	Fig.	Capacitance Range (pF)				A	B	C
		Min. (1)	Min. (2)	Max. (1) (2)	Typical Crossover			
TM3D	1	1.5	2.0	3	2.4	.31	-	.09
TM8D	1	1.5	2.5	8	5.5	.55	-	.22

Notes: The TT-500 thru TT-900 tuning tools are ideal for continual use. They fit into the hand with the rotatable top fixed in the palm. The tips are made of high strength ceramic. Use these tools where metal tips affect tuning.

Microwave Tuning Elements

Johanson Microwave Tuning Elements with the self-locking, constant torque drive mechanism, require no external locking devices and permit "one hand" tuning with virtually no dynamic tuning noise which could otherwise imperil associated solid state devices under "power on" conditions. This self-locking feature and high tuning resolutions assure unparalleled control over the most critical of complex circuit tuning adjustments.

In many instances, the use of Johanson Tuning Elements has halved technical tuning time.

Description

- Variable reactance for microwave circuits
- Available with mounting bushing and/or individual tuning rotor
- High resolution tuning
- Exceeds MIL-PRF-14409 vibration requirements

Features

- Self-locking torque mechanism, no lock nuts required
- Gold and chromate finish
- Available in metallic, dielectric and resistive versions

Applications

- Combine applications
- Interdigital applications
- Impedance transformers
- Impatt and Gunn oscillators
- Microstrip and stripline circuits
- Attenuators
- Coaxial structures
- Waveguide circuitry

Tuning Screw Torque Bushings

Posi-torque Bushings are precision devices designed for applications requiring precision, low loss high resolution tuning.

The self-locking, constant torque drive mechanism eliminates the need for locking nuts and assures stable, noise free adjustment in RF to Microwave frequencies.

Posi-Torque Bushings are universal and can be used with standard SI and US customary screws.

MLC capacitors with silver/palladium (Ag/Pd) terminations have often been used in medical applications where non-magnetic components are required, for example in MRI equipment - however, conventional nickel barrier terminations are not suitable due to their magnetic properties. In addition, RoHS requirement to use lead-free solders would cause an increase in soldering temperatures and cause solder leaching problems for the Ag/Pd termination. This has meant alternatives have had to be found and one solution is to use a copper barrier instead of a nickel barrier, with a tin finish on top. This non-magnetic termination is offered with selected non-magnetic COG/NPO (1B), High Q and X7R (2R1) dielectrics, providing a fully non-magnetic component ($\mu = 1.0000$).

To meet high temperature 260°C soldering reflow profiles as detailed in J-STD-020, COG/NPO (1B) dielectrics are supplied with FlexiCap™ or sintered termination whilst X7R (2R1) dielectrics are supplied only with the FlexiCap™ termination.

Available in chip or ribbon led format for certain case sizes (please consult Sales Office).

COG/NPO (1B), High Q - High Power RF capacitors - minimum/maximum capacitance values

A range of ultra-low loss High Q ceramic capacitors with COG/NPO (1B) characteristics suitable for high power applications where minimal power loss and very low self heating is demanded.

Common applications include MRI body coils and wireless charging systems operating in the kHz and MHz frequencies.

Available in chip or ribbon led format.

Note: *Q and X dielectric only. †Ribbon Leads available.

Made from highly stable, low loss dielectric formulations, these traditional porcelain MLCs are known for their high RF power handling capability. Available in all industry common case sizes. The special silver-palladium termination and the proprietary ceramic formulations guarantee consistent non-magnetic performance. All MLCs in these series are RoHS compliant. Chips are available either with standard termination or can be fitted with ribbon leads, depending on your application.

Description

- Porcelain Capacitors • Zero TC • Low Noise • Low ESR, High Q
- High Self-resonance • Established Reliability
- Capacitance range 0.1pF to 5.1nF

Functional Applications

- Impedance Matching • DC Blocking • Bypass • Coupling
- Tuning and Feedback

High Power RF capacitors - F & H materials - Minimum/maximum capacitance values

- 2225 10pF
- - - 4040 5.1nF

ESR Measurement

All ESR figures are measured using a VNA and 2m copper resonant tube and extrapolating to 30MHz by ratio. Measured data can be supplied on request. Measurement of ESR can vary with test method and components should only be compared when tested back-to-back on the same equipment under controlled conditions.

Applications

- MRI / NMR Systems
- Radios / Jammers
- Power Amplifiers
- Radar
- Avionics Instrumentation
- Test Equipment

Characteristics

- Precision machined design. US Patent No. 8,248,198
- 7mm high in SMD, Vertical SMD and thru-hole versions
- Nominal values of 32 to 118nH, 2 to 7 turns
- Q as high as 121 @ 100MHz, SRF 0.7 to 1.2GHz
- Superb shock, vibration and thermal tolerances
- -40°C to +85°C
- Customized version requests welcomed

Due to the severe non-magnetism requirements in the magnetic resonance industries, we use only high purity metals that exhibit no measurable magnetism. Commercial brass is simply not acceptable for these applications. Our strict traceability and testing regimes insure this essential parameter.

We can offer sizes, styles and lengths beyond those shown in the tables below – such as Cheese Head, Round Head and Set Screws. We also offer flat washers to complete your needs.

Coils also require inserts, pins and other special shapes that are custom-designed to the customer's specific requirements. The ability to quickly and precisely supply custom designs is part of our heritage and we are eager to sample our high quality hardware based on your requirements. As with the fasteners, we use only high purity metals that exhibit no measurable magnetism.
