Precautions for Photocouplers

1. Cleaning

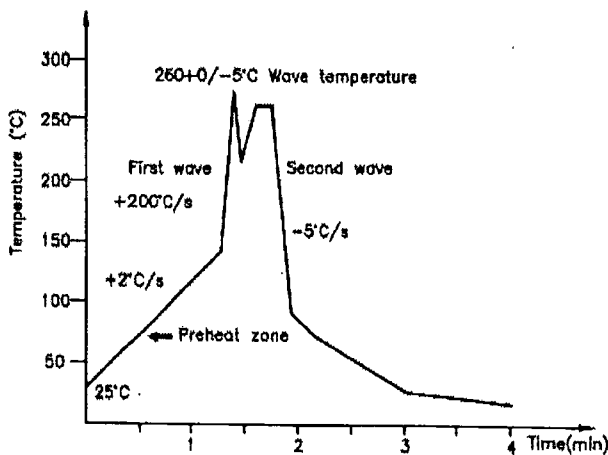

- (1) Solvent cleaning: Solvent temperature 45°C or less  
 Immersion for 3 min or less
- (2) Ultrasonic cleaning: The effect to device by ultrasonic cleaning differs by cleaning bath size, ultrasonic power output, cleaning time, PCB size or device mounting condition etc. Please test it in actual using condition and confirm that any defect doesn't occur before starting the ultrasonic cleaning.
- (3) Applicable solvent: Ethyl alcohol, Methyl alcohol, Isopropyl alcohol  
 When the other solvent is used, there are cases that the packaging resin is eroded.  
 Please use the other solvent after thorough confirmation is performed in actual using condition.

2. Circuit design

- 2.1 The LED used in the Photocoupler generally decreases the light emission power by operation.  
 In case of long operation time, please design the circuit in consideration of the degradation of the light emission power of the LED. (50%/5years)
- 2.2 There are cases that the deviation of the CTR and the degradation of the relative light emission power of the LED increase when the setting value of  $I_F$  is less than 1.0mA. Please design the circuit in consideration of this point.

3. Precautions for Soldering

- (1) In the case of flow soldering (Avoid immersing units body in the solder)  
 One time soldering is recommended within the condition of temperature.  
 Temperature: 260±0/-5°C  
 Time: 10 s.  
 Preheat temperature: 25 to 140°C  
 Preheat time: 30 to 80 s

**PC8512R/NH/ST**

(2) In the case of IR Reflow soldering

One time soldering reflow is recommended within the condition of temperature and time profile shown below.

Profile item	Conditions
Preheat	
▪ Temperature Min ( $T_{Smin}$ )	150°C
▪ Temperature Max ( $T_{Smax}$ )	200°C
▪ Time (Min to Max) (ts)	90±30 s
Soldering zone	
▪ Temperature ( $T_L$ )	217°C
▪ Time ( $t_L$ )	60 s
Peak Temperature ( $T_P$ )	260°C
Ramp-up rate	3°C/s (Max)
Ramp-down rate	3~6°C/s

(3) In the case of hand soldering by soldering iron

Allow single lead soldering in every single process. One time soldering is recommended.

Temperature: 380+0/-5°C

Time: (max.) 3s

(4) Other precautions

- Avoid immersing units body in the solder
- Depending on equipment and soldering conditions (temperature, Using solder etc.), the effect to the device and the PCB is different.

Please confirm that there is no problem on the actual use conditions in advance.
