RP10-243.3SA/N**

# Features

- 2:1 input voltage range
- 1.6kVDC isolation
- UL certified
- Efficiency up to 91%
- Six-sided continuous shield
- No minimum load required

# Regulated Converter

## RP10-A

10 Watt

1" x 1"

Single and Dual Output

### Description

The RP10-A series are wide input voltage range 1"x1" power DC/DC converters. Despite their small size, the RP10-A converters are fully specified devices with built-in Class A EMC filters, no minimum load, 1.6kVDC isolation, under-voltage lockout and low ripple/noise figures. The outputs are fully protected against short circuits, overcurrent and overvoltage and can be trimmed over a  $\pm 10\%$  range. The RP10-A series will find many uses in applications where board space is at a premium as no external components are required.

#### Notes:

- Note1: Maximum values at nominal input voltage and full load  
 Note2: Max. Cap load is tested at nominal input and full resistive load

### Model Numbering

#### Notes:

- Note3: add suffix "P" for CTRL function with positive logic (1=ON, 0=OFF) and Trim pin  
 add suffix "N" for CTRL function with negative logic (0=ON, 1=OFF) and Trim pin  
 or add suffix "XC" for omitted CTRL pin and Trim pin (refer to "Dimension Drawing (mm)")  
 Note4: add suffix "-HC" for premounted Heat-sink with clamps

#### Ordering Examples

- RP10-1205SA/P = 12V input, 5V output, single, positive Logic CTRL pin  
 RP10-4805DA/XC-HC = 48V input,  $\pm 5$ V output, dual, without CTRL pin, Heat-sink premounted

**OUTPUT VOLTAGE TRIMMING**

**Output Voltage Trimming**

Single output Powerline converters offer the feature of trimming the output voltage over a certain range around the nominal value by using external trim resistors. No general equation can be given for calculating the trim resistors, but the following trimtables give typical values for choosing these trimming resistors. If voltages between the given trim points are required, extrapolate between the two nearest given values to work out the resistor required or use a variable resistor to set the output voltage. Output can be externally trimmed by using the method shown below.
