OVERVIEW

Description

The DS28E25 evaluation system (EV system) provides the hardware and software necessary to evaluate and program the DS28E25 DeepCover® Secure Authenticator. EV system operation requires a host PC for user-friendly evaluation.

This evaluation system includes a DS9400 USB-to-I²C PC adapter, a DS2465 EV board, a DS9120Q+ evaluation socket board for a TDFN DS28E25, and five DS28E25 sample devices in a TDFN package. The EV software runs on Windows® 8, Windows 7, Windows Vista®, and Windows XP® operating systems. Detailed instructions for downloading and installing software, as well as general EV system operation are included in the EV system data sheet; this is available on request at the link to the right.

Note: The DS9120Q+, DS2465 EV board, and DS9400# subcomponents are not available for direct sale outside of evaluation systems. Data sheets specific to these components are not available.

Key Features

- EV Kit Contains
 - Five DS28E25 Devices in a TDFN-EP Package
 - One USB-to-I²C PC Adapter (DS9400#) Provides PC Connection
 - DS2465EVKIT# Evaluation Board Provides 1 -Wire Interface and SHA-256 Coprocessor
 - One EV Board (DS9120Q+) with TDFN-EP Socket Provides Easy Chip Evaluation
- USB-to-I²C Module Contains Prolific PL-2303HXD USB-to-UART Chip

- Enumerates as a Virtual PC COM Port
- Windows-Certified Logo USB Device Driver Available
- Standard USB Cable Interface
- EV Board Contains Convenient On-Board Test Points
- Evaluation Software Available by Request
