

**THE DATASHEET OF  
RP40-2412DGW/N-HC**

# Features

- 4:1 wide input voltage range
- 1.6kVDC isolation
- UL certified
- Efficiency up to 89%
- Six-sided continuous shield
- Available as power module (RPM40-GW)

# Regulated Converter

## RP40-GW

40 Watt  
2" x 2"  
Single and Dual Output

### Description

The RP40-GW series wide input range DC/DC converters are certified to UL 60950-1 and to cUL 60950-1. This makes them ideal for all telecom and industrial applications where approved safety standards are required. The industry standard 2" x 2" package meets military standards for thermal shock and vibration tolerance.

#### Notes:

- Note1: Maximum values at nominal input voltage and full load of standard type  
 Note2: Max. Cap load is tested at minimum Input and constant resistive load

### Model Numbering

#### Notes:

- Note3: no suffix for CTRL function with Positive Logic (1=ON, 0=OFF)  
 add suffix "N" for CTRL function with Negative Logic (0=ON, 1=OFF)  
 Note4: add suffix "-HC" for premounted Heat-sink with clips

#### Ordering Examples

RP40-2405SGW = 24V Input, 5V Output, Single, Positive Logic CTRL pin  
 RP40-4812DGW/N-HC = 48V Input, ±12V Output, Dual, Negative Logic CTRL pin, Heat-sink premounted

**Notes:**

- Note5: An external filter capacitor is required for normal operation. The capacitor should be capable of handling 1A ripple current for 48V/24V models. RECOM suggest: Nippon chemi-con KY series, 220µF/100V, ESR 90mΩ
- Note6: For the single output: Maximum output deviation is 10% inclusive of remote sense and trim. If remote sense is not being use, the +Sense should be connected to its corresponding +Vout and likewise the -Sense should be conneted to its corresponding -Vout
- Note7: Simulated source impedance of 12µH. 12µH inductor in series with +Vin
- Note8: The dual output required a minimum loading on the output to maintain specified regulation. Operation under no- load condition will not damage these devices, however they may not meet all listed specification
- Note9: The ON/OFF control function can be positive or negative logic. The pin voltage is referenced to -Vin pin
- Note10: Operating frequency for dual output: master (5V<sub>out</sub>) 300kHz slave (3.3V<sub>out</sub>) 500kHz

**OUTPUT VOLTAGE TRIMMING**

**Output Voltage Trimming**

Some single/dual output Powerline converters offer the feature of trimming the output voltage over a certain range around the nominal value by using external trim resistors. No general equation can be given for calculating the trim resistors, but the following trimtables give typical values for choosing these trimming resistors. If voltages between the given trim points are required, extrapolate between the two nearest given values to work out the resistor required or use a variable resistor to set the output voltage. Output can be externally trimmed by using the method shown below.
